Journal of Electroanalytical Chemistry 459 (1998) 171–191

JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Cumulative Author Index for Volumes 440–459

Abbott, A.P., Eardley, C.A., Harper, J.C. and Hope, E.G.
Electrochemical investigations in liquid and supercritical 1,1,1,2-tetrafluoroethane (HFC 134a) and difluoromethane (HFC 32) **457**, 1
Abdelsalam, M.E., Denuault, G., Baldo, M.A. and Daniele, S.
Voltammetry of hydroxide ion in aqueous solutions on gold microelectrodes **449**, 5
Abdu, R., see Bockris, J.O'M. **448**, 189
Åberg, S. and Sharp, M.
Rationalisation of time-dependent and voltage-dependent electroactivity in Nafion®/$Os(bpy)_3^{3+/2+}$ films in terms of a model that assumes restricted counterion access to non-equivalent redox sites **449**, 121
Åberg, S., see Sharp, M. **449**, 137
Abrahams, I., see VanderNoot, T.J. **448**, 17
Adžić, R.R., see Wang, J.X. **448**, 205
Aeiyach, S., see Camalet, J.L. **445**, 117
Aeiyach, S., see Chane-Ching, K.I. **453**, 139
Agafonovas, G., see Poškus, D. **457**, 171
Ahlberg, E., see Simic, N. **451**, 237
Albalat, R., see Carbó, R. **440**, 57
Albalat, R., see Carbó, R. **446**, 79
Albalat, R., see Carbó, R. **449**, 193
Albin, V., see Cassir, M. **452**, 127
Alcántara, R., Lavela, P., Tirado, J.L., Zhecheva, E. and Stoyanova, R.
SPES, 6Li MAS NMR, and Ni^{3+} EPR evidence for the formation of Co^{2+}-containing spinel phases in $LiCoO_2$ cycled electrode materials **454**, 173
Alcaraz, A., see Holdik, H. **442**, 13
Alcaraz, M.L., see Martínez-Ortiz, F. **443**, 243
Aldaz, A., see Huerta, F. **445**, 155
Alden, J.A., see Cooper, J.A. **442**, 201
Alden, J.A., see Rueda, M. **443**, 227
Alden, J.A., Bond, A.M., Colton, R., Compton, R.G., Eklund, J.C., Mah, Y.A., Mahon, P.J. and Tedesco, V.
The electrochemical oxidation of cobalt tris(dithiocarbamates) and tris(diselenocarbamates) in acetonitrile; a combined spectroscopic and voltammetric study **447**, 155
Alle, R., see Smie, A. **452**, 87
Alleman, K.S. and Peters, D.G.
Catalytic reduction of iodoethane by cobalt(I) salen electrogenerated at vitreous carbon cathodes **451**, 121
Aloisi, G., see Cavallini, M. **444**, 75
Alonso-Vante, N., see Turrión, M. **458**, 99
Alumaa, A., see Tamm, J. **448**, 25
Amadelli, R., see Velichenko, A.B. **454**, 203
Amatore, C., see Bento, M.F. **443**, 137
Amatore, C., see Bento, M.F. **446**, 91
Amatore, C., Berthou, M. and Hébert, S.
Fundamental principles of electrochemical ohmic heating of solutions **457**, 191
Anantaraman, A.V., see Gardner, C.L. **449**, 209
Anderson, M.R., Dorn, H.C., Stevenson, S.A. and Dana, S.M.
The voltammetry of C_{84} isomers **444**, 151
Andreasen, G., see Martins, M.E. **445**, 135
Andreu, R., see Carbajo, J. **440**, 51
Antón, G., see Brillas, E. **445**, 125
Aoki, K. and Teragishi, Y.
A fractal feature of the conducting zone by conversion rates from any redox state into the fully conducting state of polyaniline films **441**, 25
Aoki, K. and Li, J.
Apparent negative activation energy in electrochemical insulating-to-conducting conversion at polymethylthiophene films **441**, 161
Aoki, K. and Kakiuchi, T.
Probability theory of desorption kinetics of self-assembled alkanethiols stabilized with pair interaction **452**, 187
Aoki, K., see Li, J. **453**, 107
Aoki, K., see Li, J. **458**, 155
Arai, G., Noma, T., Hayashi, M. and Yasumori, I.
Electrochemical characteristics of D-amino acid oxidase immobilized in a conductive redox polymer **452**, 43
Aramata, A., see Fukuda, T. **440**, 153
Aramata, A., see Nakamura, M. **446**, 227
Aramata, A., see Taguchi, S. **457**, 73
Arce, E.M., see Palomar-Pardavé, M. **443**, 125
Ardizzone, S., Høiland, H., Lagioni, C. and Sivieri, E.
Pyridine and aniline adsorption from an apolar solvent: the role of the solid adsorbent **447**, 17
Arechabaleta, R., see Duong, B. **447**, 63
Arévalo, M.C., see Zinola, C.F. **454**, 161
Argoul, F., see Texier, F. **446**, 189
Ariño, C., see Berbel, F. **453**, 151
Ariyama, K., see Tatsuma, T. **446**, 205
Arvia, A.J., see Martins, M.E. **445**, 135
Astier, Y., see Simonet, J. **451**, 5
Atherton, J.H., see Booth, J. **440**, 83
Audebert, P., Roche, M. and Bekolo, H.
Electrochemical oxidation of some enol silyl ethers; investigations on the reactivity of cyclizable cation-radicals **445**, 203
Awano, H., see Takamura, T. **455**, 223

Babaei, A. and McQuillan, A.J.
An in situ UV–vis and IR spectroelectrochemical study of the disposition of a hydroquinone anion salt on platinum electrodes from dichloromethane solutions **441**, 197
Badiali, J.P., see Lafage, M. **450**, 203
Bagotskaya, I.A., Damaskin, B.B., Emets, V.V. and Kazarinov, V.E.
The role of metal and solvent in the structure of the electrode|surface-inactive electrolyte solution interface **448**, 229
Bagotzky, V.S., see Osetrova, N.V. **453**, 239
Baizeng, F., Xinyu, L., Xindong, W. and Shuzhen, D.
Surface modification of a MCFC anode by electrodeposition of niobium **441**, 1
Balch, A.L., see Winkler, K. **456**, 229
Bald, A., see Gregorowicz, J. **452**, 63
Baldo, M.A., see Abdelsalam, M.E. **449**, 5
Baldo, M.A., see Daniele, S. **456**, 105
Balkus Jr., K.J., see Briot, E. **454**, 83
Ballarin, B., Gazzano, M., Seeber, R., Tonelli, D. and Vaccari, A.
Electrodes coated by hydrotalcite-like clays. Effect of the metals and the intercalated anions on ion accumulation and retention capability **445**, 27
Ballarin, B., Masiero, S., Seeber, R. and Tonelli, D.
Modification of electrodes with porphyrin-functionalised conductive polymers **449**, 173
Bandey, H.L., see Rodriguez Presa, M.J. **455**, 49
Bandyopadhyay, K., Vijayamohanan, K., Shekhawat, G.S. and Gupta, R.P.
Impedance analysis of self-assembled naphthalene disulfide monolayer on gold using external redox probes **447**, 11
Bănică, F.G., see Ion, A. **444**, 11
Baranski, A.S. and Winkler, K.
The ac-voltammetric study of fast charge transfer processes in benzene solutions **453**, 29

PII S0022-0728(99)00443-4

Barber, J., Morin, S. and Conway, B.E.
Specificity of the kinetics of H_2 evolution to the structure of single-crystal Pt surfaces, and the relation between opd and upd H **446**, 125
Baré, S., Van krieken, M., Buess-Herman, C. and Hamelin, A.
Effect of the crystallographic orientation of gold single-crystal electrodes on the occurrence of 2D phase transitions in adsorbed organic monolayers **445**, 7
Barhoun, A., see Seghiouer, A. **442**, 113
Bark, F.H., see Kharkats, Yu.I. **450**, 37
Barnes, C.J., see Whelan, C.M. **441**, 109
Barrado, E., Montequi, J.I., Medina, J., Pardo, R. and Prieto, F.
Electrochemical study of iron ferrite sludge obtained under the conditions proposed for the purification of waste water at a carbon paste electrode **441**, 227
Barrado, E., see Martínez, A.M. **449**, 67
Bartlett, P.N. and Taylor, S.L.
An accurate microdisc simulation model for recessed microdisc electrodes **453**, 49
Baruzzi, A.M., see Sánchez, C.G. **451**, 111
Basilevsky, M.V., Rostov, I.V. and Newton, M.D.
A two-dimensional Born–Oppenheimer treatment of intramolecular electron transfer reactions **450**, 69
Basura, V.I., Beattie, P.D. and Holdcroft, S.
Solid-state electrochemical oxygen reduction at Pt | Nafion® 117 and Pt | BAM3G(TM) 407 interfaces **458**, 1
Batina, N., see Miranda-Hernández, M. **443**, 81
Batina, N., Huerta, A., Pizio, O., Sokolowski, S. and Trokhymchuk, A.
A primitive model for hexamethylpararosaniline (crystal violet) monomolecular adlayer: a Monte Carlo simulation study **450**, 213
Battaglini, F., see Danilowicz, C. **445**, 89
Baudry, R., see Chane-Ching, K.I. **453**, 139
Bäuerle, P., see Smie, A. **452**, 87
Baumgärtel, H., see Haiss, W. **454**, 107
Baur, J.E. and Spaine, T.W.
Electrochemical deposition of iridium(IV) oxide from alkaline solutions of iridium(III) oxide **443**, 208
Baute, N., see Mertens, M. **441**, 237
Beattie, P.D., see Lee, H.J. **440**, 73
Beattie, P.D., see Basura, V.I. **458**, 1
Beaugy, C., see Fabre, B. **455**, 5
Becagli, S., see Pezzatini, G. **444**, 261
Beck, R.Yu., see Rogozhnikov, N.A. **457**, 31
Beck, S., see McGarvey, C. **456**, 71
Becker, J.Y., see Zhang, Z.-R. **455**, 197
Becucci, L., see Herrero, R. **445**, 71
Beden, B., see Kabbabi, A. **444**, 41
Beden, B., see Melendres, C.A. **449**, 215
Bedioui, F., see Briot, E. **454**, 83
Beer, P.D., see Chen, Z. **444**, 209
Bek, R.Yu. and Rogozhnikov, N.A.
Kinetics of electrochemical processes in the system: silver/cyanide solutions **447**, 109
Bekolo, H., see Audebert, P. **445**, 203
Belaïdi, A., Chazalviel, J.-N., Ozanam, F., Gorochov, O., Chari, A., Fotouhi, B. and Etman, M.
Silicon surface states and subsurface hydrogen **444**, 55
Belaïdi, A., Fotouhi, B., Cachet, H., Kerbache, T., Chari, A., Ozanam, F., Chazalviel, J.-N., Gorochov, O. and Etman, M.
Cation effects on the anodic dissolution of n-Si in fluoride electrolytes **455**, 191
Belal, F., see Radi, A. **441**, 39
Bélanger, D., see Ortiz, B. **455**, 75
Bélanger, D., see Naudin, E. **459**, 1
Belgsir, E.M., see Tremiliosi-Filho, G. **444**, 31
Belhouari, A., see Keita, B. **442**, 49
Belinsky, V., see Kublanovsky, V. **455**, 247
Belloncle, C., Cauliez, P. and Simonet, J.
Electrochemical behaviour of different binaphthalene crown ethers. Part 2: Novel strategy based on in situ removable bromine atom protecting groups for the electrosynthesis of polybinaphthalenes bearing perylene crown ethers as potentially redox switchable macromolecular hosts **444**, 101
Beltramo, G., Santos, E. and Schmickler, W.
Second harmonic generation from silver single-crystal electrodes **447**, 71
Benavente, J., Oleinikova, M., Muñoz, M. and Valiente, M.
Characterization of novel activated composite membranes by impedance spectroscopy **451**, 173
Benito, D., see Navarro-Laboulais, J. **443**, 41
Benito, D., see Navarro-Laboulais, J. **444**, 173
Benito, D., García-Jareño, J.J., Navarro-Laboulais, J. and Vicente, F.
Electrochemical behaviour of poly(neutral red) on an ITO electrode **446**, 47
Benjamin, I., see Michael, D. **450**, 335
Bento, M.F., Thouin, L., Amatore, C. and Montenegro, M.I.
About potential measurements in steady state voltammetry at low electrolyte/analyte concentration ratios **443**, 137
Bento, M.F., Thouin, L. and Amatore, C.
Potential measurements in steady state voltammetry at low electrolyte/analyte concentration ratios. Role of convection on ohmic drop: a simplified model **446**, 91
Berbel, F., Díaz-Cruz, J.M., Ariño, C. and Esteban, M.
Voltammetry of metal ions in mixtures of ligands. Part III: Application to systems including inert complexes **453**, 151
Berbel, F., see Puy, J. **457**, 229
Bergelin, M. and Wasberg, M.
The impinging jet flow method in interfacial electrochemistry: an application to bead-type electrodes **449**, 181
Bergens, S.H., see Palmore, G.T.R. **443**, 155
Bergveld, P., see Hendrikse, J. **458**, 23
Beriet, C. and Girault, H.H.
Electrochemical studies of ion transfer at micro-machined supported liquid membranes **444**, 219
Beriet, C., see Lee, H.J. **453**, 211
Berkowitz, M.L., see Yeh, I.-C. **450**, 313
Bernard, C., see Macounova, K. **457**, 141
Bernardini, M., Commisso, N., Davolio, G. and Mengoli, G.
Formation of nickel hydrides by hydrogen evolution in alkaline media **442**, 125
Bernardini, M., see Mengoli, G. **444**, 155
Bernardini, M., Comisso, N., Fabrizio, M., Mengoli, G. and Randi, A.
Effect of temperature on electrolytic loading of hydrogen into palladium **453**, 221
Bernardini, M., Comisso, N., Mengoli, G. and Sinico, L.
Formation of nickel hydrides by hydrogen evolution in alkaline media: effect of temperature **457**, 205
Berthier, F., Diard, J.-P., Le Gorrec, B. and Montella, C.
Discontinuous immitance due to a saddle node bifurcation. I: 1-, 2- and 3-part immitance diagrams **458**, 231
Berthou, M., see Amatore, C. **457**, 191
Bertschy, H., see Palmore, G.T.R. **443**, 155
Bessière, J., see Walcarius, A. **453**, 249
Beyer, L., see Losada, J. **447**, 147
Bhattacharya, D., Samide, M.J. and Peters, D.G.
Catalytic reduction of cyclohexanecarbonyl chloride with electrogenerated nickel(I) salen in acetonitrile **441**, 103
Bhattacharyya, S., see He, Z. **458**, 7
Bianchini, A., see Cataldi, T.R.I. **448**, 111
Bianco, P., see Lojou, E. **452**, 167
Bidan, G., see Buffenoir, A. **451**, 261
Bidan, G., see Billon, M. **456**, 91
Bieniasz, L.K. and Speiser, B.
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 1. Gaining more insight into the behaviour of kinetic models **441**, 271
Bieniasz, L.K., Dümmling, S., Speiser, B. and Würde, M.
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 2. Model expansion and model reduction **447**, 173
Bieniasz, L.K. and Speiser, B.
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 3. Statistical error/uncertainty propagation in simulation and in nonlinear least-squares parameter estimation **458**, 209
Bilewicz, R., see Bujno, K. **445**, 47
Billon, M., see Chaînet, E. **451**, 273
Billon, M., Divisia-Blohorn, B., Bidan, G., Kern, J.M., Sauvage, J.P. and Parent, P.
Ex-situ study by X-ray absorption near-edge spectroscopy of the topography of complexing cavities immobilized in an electronically conducting polymer **456**, 91
Birss, V.I., see Dinh, H.N. **443**, 63

Birss, V.I., see McGarvey, C. **456**, 71
Birss, V.I., see Dinh, H.N. **459**, 45
Bisquert, J., Garcia-Belmonte, G., Bueno, P., Longo, E. and Bulhões, L.O.S.
Impedance of constant phase element (CPE)-blocked diffusion in film electrodes **452**, 229
Blázquez, M., see Sevilla, J.M. **442**, 107
Blázquez, M., see Sevilla, J.M. **451**, 89
Bo, A., see Liu, S. **458**, 87
Bockris, J.O'M. and Abdu, R.
A theoretical study of the electrochemical reduction of oxygen **448**, 189
Bohannan, E.W., see Judkins, C.M. **451**, 39
Boireau, W., see Marchal, D. **451**, 139
Bonazzola, C. and Calvo, E.J.
An electrochemical impedance and spectroelectrochemical study of the polypyrrole–flavin composite electrode **449**, 111
Bond, A.M., see Webster, R.D. **442**, 217
Bond, A.M., see Alden, J.A. **447**, 155
Bond, A.M., see Schiewe, J. **451**, 129
Bond, A.M., see Coomber, D.C. **452**, 5
Booth, J., Sanders, G.H.W., Compton, R.G., Atherton, J.H. and Brennan, C.M.
Mechanism of solid|liquid interfacial reactions. The reactive dissolution of p-chloranil in aqueous solution as studied by the channel flow cell with electrochemical detection and atomic force microscopy **440**, 83
Bopp, Ph.A. and Heinzinger, K.
MD studies of electrolyte solution|liquid mercury interfaces **450**, 165
Bordin, G., see Harlyk, C. **446**, 139
Bordin, G., see Harlyk, C. **451**, 267
Bordin, G., see Harlyk, C. **458**, 199
Borge, G., Fernández, L.A. and Madariaga, J.M.
On the liquid junction potential for the determination of equilibrium constants by means of the potentiometric technique without constant ionic strength **440**, 183
Boroda, Y.G. and Voth, G.A.
A theory for electron transfer between an electrode and a multilevel acceptor/donor species in an electrolyte solution **450**, 95
Bourdillon, C., see Marchal, D. **451**, 139
Bowmaker, G.A., see Melendres, C.A. **449**, 215
Bracali, M., see Cavallini, M. **444**, 75
Bragato, C., see Daniele, S. **456**, 105
Breda, A.C., see Fuller, J. **459**, 29
Breiter, M.W., see Wasiucionek, M. **443**, 117
Brennan, C.M., see Booth, J. **440**, 83
Brevet, P.-F., see Fermín, D.J. **447**, 125
Brevet, P.-F., see Ding, Z. **458**, 139
Brigelius-Flohé, R., see Lehmann, C. **455**, 259
Brillas, E., Antón, G., Otero, T.F. and Carrasco, J.
Electrogeneration of conducting poly(2,5-di-(-2-thienyl)-furan) **445**, 125
Briot, E., Bedioui, F. and Balkus Jr., K.J.
Electrochemistry of zeolite-encapsulated complexes: new observations **454**, 83
Brotherston, I.D., see Ferraris, J.P. **459**, 57
Bruneel, J.L., see Texier, F. **446**, 189

The application of the concept of reaction layer to the study of electrode processes coupled with the second-order chemical reactions at microelectrodes under steady-state conditions **440**, 103
Ziessel, R., see Chardon-Noblat, S. **444**, 253
Zinola, C.F., see Martins, M.E. **445**, 135
Zinola, C.F., Rodriguez, J.L., Arévalo, M.C. and Pastor, E.
A DEMS study of the electroreduction and oxidation of 3-buten-2-one and 2-butanone adsorbates on platinum in sulphuric solutions **454**, 161
Zinola, C.F. and Castro Luna, A.M.
Adsorption configurations of ethylene and acetylene on gold **456**, 37
Zoltowski, P.
On the electrical capacitance of interfaces exhibiting constant phase element behaviour **443**, 149
Zoppi, R.A. and Nunes, S.P.
Electrochemical impedance studies of hybrids of perfluorosulfonic acid ionomer and silicon oxide by sol-gel reaction from solution **445**, 39
Zotović, J.B., see Zečević, S.K. **448**, 245
Zotti, G., Schiavon, G., Zecchin, S. and Favretto, D.
Dioxygen-decomposition of ferrocenium molecules in acetonitrile: The nature of the electrode-fouling films during ferrocene electrochemistry **456**, 217
Zsoldos, D., see Chardon-Noblat, S. **444**, 253
Zuman, P., see Privman, M. **455**, 235
Zuman, P., see Ludvík, J. **457**, 177
Zurada, M.s., see Gregorowicz, J. **452**, 63

Journal of Electroanalytical Chemistry 459 (1998) 193–249

JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Cumulative Subject Index for Volumes 440–459

Ab initio calculations
Facilitated alkali ion transfer at the water|1,2-dichloroethane interphase: ab initio calculations concerning alkaline metal cation–1,10-phenanthroline complexes (Sánchez et al.) **451**, 111
Underpotential versus overpotential deposition: a first-principles calculation (Sánchez, Leiva) **458**, 183
Absolute electrode potential
Dissociative electron transfer to polyhalogen methanes CY_3X (Y = H, F, Cl and Br; X = Cl and Br) in solvent: a semiempirical PM3 method study (Tikhomirov, German) **450**, 13
Absorption and phase formation
Structural transitions in 2,2′-bipyridine adlayers on Au(111)—an in-situ STM study (Dretschkow et al.) **458**, 121
Ac conductivity
Cation mobility in poly(ethylene oxide) solid electrolytes (Plancha et al.) **442**, 91
Ac impedance
Electron and ion transport in polypyrrole/polystyrenesulfonate composite films (Komura et al.) **456**, 121
Frequency dependence of the electroreflectance signal for redox reaction of solution-phase species at the electrode surface: formulation and experimental verification (Sagara et al.) **454**, 75
Ac impedence spectra
Electric field enhanced water dissociation at the bipolar membrane junction from ac impedance spectra meaurements (Holdik et al.) **442**, 13
Ac impedance technique
An ac impedance study of the anodic dissolution of iron in sulfuric acid solutions containing hydrogen sulfide (Ma et al.) **451**, 11
Ac polarography
Adsorption behaviour of insulin and soybean trypsin inhibitor at the mercury | solution interface (Vidić et al.) **452**, 151
The role of protonation, hydration, elimination, and ring opening in the electroreduction of hexazinone (Privman, Zuman) **455**, 235
Ac resistance
Determination of flat-band potentials of silicon electrodes in HF by means of ac resistance measurements (Ottow et al.) **455**, 29
Ac voltammetry
Mathematical analyses of ac voltammetry of a surface confined redox process (Yap) **454**, 33
The ac-voltammetric study of fast charge transfer processes in benzene solutions (Baranski, Winkler) **453**, 29
Acetonitrile solution
Ion pair formation between the electrogenerated 2,3-dichloro-5,6-dicyoano-1,4-benzoquinone dianion and the sodium ion at platinum surfaces (Oyamo et al.) **451**, 193
Acetylene
Adsorption configurations of ethylene and acetylene on gold (Zinola, Castro Luna) **456**, 37
N-Acetyl-microperoxidase-8
The direct electrochemistry of *N*-acetyl-microperoxidase-8 in aqueous and dimethyl sulfoxide solution (Ci Li, Mabrouk) **455**, 45
3-Acetylopyridine
Surface and interfacial behaviour of 3-acetylopyridine (Słojkowska et al.) **442**, 83
Acid activation
Electrochemical behavior of acid activated montmorillonite modified electrodes (Falaras, Lezou) **455**, 169
Acid medium
Mechanistic approach to the oxidation of phenol at a platinum/gold electrode in an acid medium (Iotov, Kalcheva) **442**, 19
Acid sulphate solution
Determination of Au(III) in the surface layers formed anodically on the gold electrode (Juodkazis et al.) **441**, 19
Acidic chloride
Application of a wall jet disk electrode combined with an electrochemical quartz crystal microbalance to the study of the dissolution of copper in acidic chloride media (Itagaki et al.) **440**, 139
Acidic media
Study of nickel upd at a polycrystalline Pt electrode and its influence on HCOOH oxidation in acidic and nearly neutral media (El-Shafei) **447**, 81
Acids
Electrochemical reduction of acids in dimethyl sulfoxide. CE mechanisms and beyond (Treimer, Evans) **449**, 39
Acrylonitrile grafting
Solvent effect on the electrografting of acrylonitrile on nickel (Mertens et al.) **441**, 237
Activated composite membrane
Characterization of novel activated composite membranes by impedance spectroscopy (Benavente et al.) **451**, 173
Activation
Electrocatalytic dioxygen reduction in the presence of a rhodoxime (Tavagnacco et al.) **448**, 41
Activation energy
A theoretical study of the electrochemical reduction of oxygen (Bockris, Abdu) **448**, 189
Apparent negative activation energy in electrochemical insulating-to-conducting conversion at polymethylthiophene films (Aoki, Li) **441**, 161
Asymmetry of inner-sphere reorganization energy for heterogeneous electron transfer (Tsirlina et al.) **450**, 63
Activation enthalpy
Rates of the halide ion cleavage from halo-9,10-diphenylanthracene anion radicals in DMF (Jaworski et al.) **440**, 163
Active sites
Electrochemical nucleation on active sites—what do we measure in reality? Part I. (Milchev) **457**, 35
Activity coefficients
Applicability of the modified Pitzer equations to the fitting of activity coefficients in electrolyte-aminoacid aqueous mixtures: the case of NaCl + β-Alanine at 298.15 K (Raposo et al.) **454**, 59
Adatoms
Effect of inorganic cations on the electroreduction of nitrate anions on Pt|Pt electrodes in sulfuric acid solutions (Safonova, Petrii) **448**, 211

PII S0022-0728(98)00444-6

Adenine
A methanol/dioxygen biofuel cell that uses NAD^+-dependent dehydrogenases as catalysts: application of an electro-enzymatic method to regenerate nicotinamide adenine dinucleotide at low overpotentials (Palmore et al.) **443**, 155
Electrocatalytic effects of deoxyribonucleic acids, adenine and guanine on the reduction of Ni(II) at a mercury electrode (Muñiz Alvarez et al.) **457**, 53
Adenosine adsorption
Adsorption of adenosine on (111) and (001) bismuth single crystal planes (Lust et al.) **449**, 153
ADI
An exponentially expanding mesh ideally suited to the fast and efficient simulation of diffusion processes at microdisc electrodes. 3. Application to voltammetry. (Gavaghan) **456**, 25
Admittance
Impedance study of the electrochemical reduction of adrenochrome on glassy carbon (Zhang et al.) **444**, 169
Adrenochrome
Impedance study of the electrochemical reduction of adrenochrome on glassy carbon (Zhang et al.) **444**, 169
Adsorbed anion
Correlation of the underpotential deposition (upd) of zinc ions on Pt(111), Pt(100), and Pt(110) with anion specific adsorption (Taguchi, Aramata) **457**, 73
Adsorbed hydrogen
Application of SPE composite microelectrodes to the study of the spillover of adsorbed species on electrode surfaces (Jiang et al.) **445**, 13
Adsorption
A molecular model for polylayer formation on electrode surfaces (Nikitas) **451**, 249
A molecular resolution AFM study of gold-adsorbed glucose oxidase as influenced by enzyme concentration (Quinto et al.) **448**, 51
Adsorption in semi-differential voltammetry (Klička) **455**, 253
Adsorption of Au-containing species and heterogeneous isotope exchange of Au atoms at the Au electrode|dicyanoaurate solution interface (Poškus, Agafonovas) **457**, 171
Adsorption of water molecules in slit pores (Spohr et al.) **450**, 281
An impedance and chronocoulometric study of the adsorption of chloride and bromide ions on bismuth single crystal planes from solutions in methanol (Väärtnõu, Lust) **445**, 165
Comproportionation and disproportionation reactions in the electrochemical reduction of nitroprusside at a hanging mercury drop electrode in acidic solution (Carapuça et al.) **455**, 93
Electrochemical and in situ FTIR studies on the adsorption and oxidation of glycine and lysine in alkaline medium (Ogura et al.) **449**, 101
Electrochemical behaviour of oxocarbons on single crystal platinum electrodes. Part V. Tetrahydroxy-*p*-benzoquinone in 0.5 M sulphuric acid medium (Carbó et al.) **440**, 57
Electrochemical quartz crystal microbalance study of copper adatoms on Au(111) electrodes in solutions of perchloric and sulfuric acid (Uchida et al.) **452**, 97
Electrochemical reactions with adsorption of the reactants and electrosorption. Simple analytical solutions for a Henry isotherm (Laviron, Roullier) **443**, 195
Electrochemical scanning tunneling microscopy and electrochemical quartz crystal microbalance study of the adsorption of phenanthraquinone accompanied by an electrochemical redox reaction on the Au electrode (He et al.) **440**, 65
Electrochemically modulated liquid chromatography (EMLC) as a probe of the adsorption characteristics of monosubstituted benzenes at porous graphitic carbon (Ting, Porter) **443**, 180
Effect of surface order on adsorption of sulfate ions on silver electrodes (Smoliński et al.) **442**, 41
Effects of ligand structure on the adsorption of nickel tetraazamacrocyclic complexes and electrocatalytic CO_2 reduction (Bujno et al.) **445**, 47
Kinetics of electrochemical processes in the system: silver/cyanide solutions (Bek, Rogozhnikov) **447**, 109
Mechanistic and fuel-cell implications of a tristable response in the electrochemical oxidation of methanol (Schell) **457**, 221
On the calculation of surface concentration from measurements by the radiotracer 'electrode lowering' technique (Poškus) **442**, 5
Reaction mechanism and partial charge transfer of $Tl|Tl^+$-systems studied by impedance spectroscopy (SSSS method). Part 1. The $Tl(Hg)|Tl^+$-reaction in the presence of SCN^- (Salié) **447**, 211
Stability of bismuth adlayers on Pt(111) electrodes in the presence of adsorbed organic compounds (Carbó et al.) **446**, 79
Surface cleavage of oxocarbons to CO adspecies on Pt(111) electrodes induced by metal adatoms (Carbó et al.) **449**, 193
The impinging jet flow method in interfacial electrochemistry: an application to bead-type electrodes (Bergelin, Wasberg) **449**, 181
Thermodynamics and kinetics of adsorption of cyanide ions on silver. Part II (Rogozhnikov, Beck) **457**, 31
Adsorption configurations
Adsorption configurations of ethylene and acetylene on gold (Zinola, Castro Luna) **456**, 37
Adsorption isotherm
Large signal (global) analysis of non-linear response of electrocatalytic reaction. I. Multiple steady states (Sadkowski) **447**, 97
Adsorption of HSO_4^-/HSO_4^{2-}, Ag^+ and HEDP
A detailed study of the reliability of some crucial parameters used in the in-situ radiotracer sorption studies (Hirschberg et al.) **456**, 171
Adsorption of phospholipids at interfaces
Phospholipid monolayers at water | oil interfaces: theoretical modelling of surface pressure–molecular area isotherms (Mafé et al.) **457**, 155
Adsorption on the free surface
Surface and interfacial behaviour of 3-acetylopyridine (Słojkowska et al.) **442**, 83
Adsorption, pyridine, aniline
Pyridine and aniline adsorption from an apolar solvent: the role of the solid adsorbent (Ardizzone et al.) **447**, 17
AFM/STM
In situ AFM/STM characterization of porphyrin electrode films for electrochemical detection of neurotransmitters (Duong et al.) **447**, 63
Ag
XPS investigations of the electrochemical double layer on silver in alkaline chloride solutions (Hecht, Strehblow) **440**, 211
Ag(100)
Electrochemical reduction of CO_2 on single crystal electrodes of silver Ag(111), Ag(100) and Ag(110) (Hoshi et al.) **440**, 283
Ag(110)
Electrochemical reduction of CO_2 on single crystal electrodes of silver Ag(111), Ag(100) and Ag(110) (Hoshi et al.) **440**, 283
Ag(111)
An in situ STM investigation of uracil on Ag(111) (Cavallini et al.) **444**, 75
Electrochemical reduction of CO_2 on single crystal electrodes of silver Ag(111), Ag(100) and Ag(110) (Hoshi et al.) **440**, 283
Ag catalysts
Electrochemical synthesis of urea at gas-diffusion electrodes. Part II. Simultaneous reduction of carbon dioxide and nitrite ions at Cu, Ag and Au catalysts (Shibata et al.) **442**, 67
Ag electrodes
Determination of emersed electrochemical interface thickness by ellipsometry: Aqueous electrolytes on Ag (Woelfel, Pemberton) **456**, 161

Al complexation
^{27}Al NMR spectroscopy studies on speciation of Al complex ions in $AlCl_3 + LiAlH_4$ solutions in tetrahydrofuran for electroplating of Al (Lefebvre, Conway) **448**, 217
Al electroplating
^{27}Al NMR spectroscopy studies on speciation of Al complex ions in $AlCl_3 + LiAlH_4$ solutions in tetrahydrofuran for electroplating of Al (Lefebvre, Conway) **448**, 217
^{27}Al NMR
^{27}Al NMR spectroscopy studies on speciation of Al complex ions in $AlCl_3 + LiAlH_4$ solutions in tetrahydrofuran for electroplating of Al (Lefebvre, Conway) **448**, 217
Al_2O_3 films
Development of a theory for the determination of the composition of the anodizing solution inside the pores during the growth of porous anodic Al_2O_3 films on aluminium by a transport phenomenon analysis (Patermarakis) **447**, 25
α-Al_2O_3 powders
Pyridine and aniline adsorption from an apolar solvent: the role of the solid adsorbent (Ardizzone et al.) **447**, 17
Alcohols
An impedance and chronocoulometric study of the adsorption of chloride and bromide ions on bismuth single crystal planes from solutions in methanol (Väärtnõu, Lust) **445**, 165
Aldehyde cyanohydrins
Electrochemical reduction of *O*-acylated aldehyde cyanohydrins (Zheng, Lund) **441**, 221
Alkali/alkaline earth metals
Synthesis, electrochemistry and complexation studies of ferrocene crown ethers (Ion et al.) **440**, 145
Alkali cations
Molecular dynamics study of alkali cations at the water|liquid mercury interface (Tóth) **443**, 73
Alkali ion transfer
Facilitated alkali ion transfer at the water|1,2-dichloroethane interphase: ab initio calculations concerning alkaline metal cation–1,10-phenanthroline complexes (Sánchez et al.) **451**, 111
Alkali metal ion transfer
Amperometric detection of alkali metal ions on micro-fabricated composite polymer membranes (Lee et al.) **453**, 211
Alkaline media
Electrochemical, spectroscopic and structural investigations of the Cd|Cd(II) system in alkaline media. I. Cation effects (Simic, Ahlberg) **451**, 237
Alkaline medium
Radiotracer study of the specific adsorption of HCO_3^- ions on a platinum electrode (Horányi) **453**, 113
Alkaline solutions
Kinetic and mechanistic study of methanol oxidation on a Pt(100) surface in alkaline media (Tripković et al.) **448**, 173
Alkanethiol
An electroreflectance and photoelectrochemical study of hypericin at bare and modified gold electrodes (Sagara et al.) **445**, 171
Alkanethiol monolayer
Alkanethiol monolayers and alkanethiol|phospholipid bilayers supported by mercury: an electrochemical characterization (Buoninsegni et al.) **452**, 33
Alkanethiol | phospholipid bilayer
Alkanethiol monolayers and alkanethiol|phospholipid bilayers supported by mercury: an electrochemical characterization (Buoninsegni et al.) **452**, 33
Alkanethiols
Probability theory of desorption kinetics of self-assembled alkanethiols stabilized with pair interaction (Aoki, Kakiuchi) **452**, 187
Alkene oxidation
Spectral and electrocatalytic studies for unusual oxidation and reduction states of chromium porphyrins in aqueous solutions (Lu, Su) **446**, 25
Alkyl halides
An electrochemical and spectroelectrochemical (IR) investigation of the reduction of RCo(II)TPP (R = benzyl or butyl; TPP = tetraphenylporphyrin): mechanistic implications in the CoTPP catalyzed electrocarboxylation of alkyl halides (Zheng et al.) **453**, 79
ALSV technique
Qualitative and quantitative assessment of phases in electrodeposited Ni + Cd alloys by the ALSV technique (Jović, Tošić) **441**, 69
Aluminum electrode
Voltammetric behaviour and electrocatalytic activity of the aluminum electrode modified with nickel and nickel hexacyanoferrate films, prepared by electroless deposition (Pournaghi-Azar, Razmi-Nerbin) **456**, 83
Amalgam reactions
Reaction mechanism and partial charge transfer of Tl|Tl^+-systems studied by impedance spectroscopy (SSSS method). Part 1. The Tl(Hg)|Tl^+-reaction in the presence of SCN^- (Salié) **447**, 211
Amalgam-forming
A theory for amalgam forming electrode reactions (Koper, Schmickler) **450**, 83
Amalgamation
Cyclic chronopotentiometry with non-linear current–time functions at an SMDE .Amalgamation and reversibility effects and experimental verification (González et al.) **440**, 111
Amine cobalt complex
Influence of the coordination sphere on the mechanism of cobalt nucleation onto glassy carbon (Palomar-Pardavé et al.) **443**, 125
D-Amino acid oxidase
Electrochemical characteristics of D-amino acid oxidase immobilized in a conductive redox polymer (Arai et al.) **452**, 43
Amino acid residue model
Enhancing effect of amino acid residue models on the charge transfer in a Nafion® film incorporating $Ru(bpy)_3^{2+}$ complex (Zhang et al.) **445**, 109
D-Amino acid sensor
Electrochemical characteristics of D-amino acid oxidase immobilized in a conductive redox polymer (Arai et al.) **452**, 43
Aminoacetate electrolyte
Modeling of the cathode layer in the case of zinc electrolysis from aminoacetate electrolyte (Kublanovsky, Belinsky) **455**, 247
Amlagamation
Amalgamation effects in reverse pulse polarography at spherical electrodes. Influence on speciation measurements (Galceran et al.) **442**, 151
Amorphous alloys
Electrochemically deposited thin films of amorphous Fe–P alloy. Part I. Chemical composition and phase structure characterization (Zečević et al.) **448**, 245
Amperometric biosensor
Characterization of organosilasesquioxane-intercalated-laponite-clay modified electrodes and (bio)electrochemical applications (Coche-Guérente et al.) **458**, 73
Amperometric carbohydrate detection
Glucose oxidation at bismuth-modified platinum electrodes (Wittstock et al.) **444**, 61
Amperometric detection
Electrocatalytic oxidation of hydrazines at a 4-pyridyl hydroquinone self-assembled platinum electrode and its application to amperometric detection in capillary electrophoresis (Niu et al.) **448**, 79
Amperometric enzyme electrode
Silica sol-gel immobilized amperometric enzyme electrode for peroxide determination in the organic phase (Li et al.) **448**, 69
Amperometric sensor
Amperometric detection of alkali metal ions on micro-fabricated composite polymer membranes (Lee et al.) **453**, 211

Amperometric ion sensors based on laser-patterned composite polymer membranes (Lee et al.) **440**, 73
Amperometry
A kinetic model for the reduction of enzyme-generated H_2O_2 at a metal-dispersed conducting polymer film (Somasundrum et al.) **440**, 259
Amphiphiles
Self-assembly and catalytic properties of 1,1′-bridged-2,2′-dipyridinium amphiphiles (Judkins et al.) **451**, 39
Amphiphilic aromatic 1,3,4-oxadiazoles
Synthesis and electrochemical behavior of amphiphilic 1,3,4-oxadiazole derivatives (Freydank et al.) **456**, 61
Analysis
A unified approach to trace analysis and evaluation of electrode kinetics with fast Fourier transform electrochemical instrumentation (Schiewe et al.) **451**, 129
Analytical equations
Cyclic chronopotentiometry with non-linear current–time functions at an SMDE .Amalgamation and reversibility effects and experimental verification (González et al.) **440**, 111
Anderson Hamiltonian
A theory for electron transfer between an electrode and a multilevel acceptor/donor species in an electrolyte solution (Boroda, Voth) **450**, 95
Anderson model
A theory for amalgam forming electrode reactions (Koper, Schmickler) **450**, 83
Aniline
Interconversion of polarons and bipolarons of polyaniline during the electrochemical polymerization of aniline (Mu et al.) **446**, 107
Anion
The kinetic study of specific adsorption of phosphate species on Pt(111) in acidic solutions (Fukuda, Aramata) **440**, 153
Anion adsorption
An in situ STM study of sulphate adsorption on copper(111) in acidic aqueous electrolytes (Li, Nichols) **456**, 153
Linear correlation between surface stress and surface charge in anion adsorption on Au(111) (Haiss et al.) **452**, 199
Voltammetric measurement of anion adsorption on Ag(111) (Stevenson et al.) **447**, 43
Anion effect
Effect of anions on the electrochemical behavior of Pb electrodes in alkaline solutions and on the anodic oxide film properties (Veluchamy, Minoura) **440**, 41
Effect of anions on the underpotential deposition of thallium(I) on polycrystalline silver (Daujotis, Gaidamauskas) **446**, 151
Anion-exchanger
Potentiometric studies of bilayers of conducting polymers (Wojda, Maksymiuk) **441**, 205
Anionic clay
Mass transport on an anionic clay-modified electrode as studied by a quartz crystal microbalance (Yao et al.) **457**, 119
Anionic clays
Electrochemical study of ferrocene and nitroxide derivatives intercalated in Zn–Cr and Zn–Al layered double hydroxides (Therias et al.) **454**, 91
Electrodes coated by hydrotalcite-like clays. Effect of the metals and the intercalated anions on ion accumulation and retention capability (Ballarin et al.) **445**, 27
Anionic Fe(II) complex
In situ infrared spectroscopic investigations on the electrochemical properties of Prussian blue–polyaniline-modified electrodes with various anionic Fe(II) complexes working as a mediator for the electroreduction of CO_2 (Nakayama et al.) **440**, 251
Anisotropic conductance
Studies on ion-exchange membranes. II. Measurement of the anisotropic conductance of Nafion® (Gardner, Anantaraman) **449**, 209
Annealing
Electrochromism of annealed vacuum-evaporated V_2O_5 films (Guan et al.) **443**, 175
Anode
Electrochemical deposition and properties of $PbO_2 + Co_3O_4$ composites (Musiani et al.) **440**, 131
Surface modification of a MCFC anode by electrodeposition of niobium (Baizeng et al.) **441**, 1
Anodic electrocatalytic response
Electrocatalytic function of Bi(V) sites in heavily-doped PbO_2-film electrodes applied for anodic detection of selected sulfur compounds (Popovic et al.) **455**, 153
Anodic electrodeposition
Anodic electrodeposition of iridium oxide films (Petit, Plichon) **444**, 247
Anodic oxidation
Anodic oxidation of aniline and *N*-alkylanilines in aqueous sulphuric acid studied by electrochemical thermospray mass spectrometry (Stassen, Hambitzer) **440**, 219
Electrochemical thermospray mass spectrometry—anodic oxidation of *N,N*-dialkylanilines (Hambitzer et al.) **447**, 117
Effect of anions on the electrochemical behavior of Pb electrodes in alkaline solutions and on the anodic oxide film properties (Veluchamy, Minoura) **440**, 41
Ultrasound-assisted anodic oxidation of diuron (Macounova et al.) **457**, 141
Anodic passive film
Nature of the passive film formed at a zinc anode in zinc–nickel containing solutions (Velichenko et al.) **448**, 1
Anodic polarization
Electrochemical oxidation of nickel in alkaline solutions: a voltammetric study and modelling (Seghiouer et al.) **442**, 113
Anodic polymerization
Electrochemical behaviour of different binaphthalene crown ethers. .Part 2: Novel strategy based on in situ removable bromine atom protecting groups for the electrosynthesis of polybinaphthalenes bearing perylene crown ethers as potentially redox switchable macromolecular hosts (Belloncle et al.) **444**, 101
Anodizing
Photocatalytic ZnO films prepared by anodizing (Yamaguchi et al.) **442**, 1
Anodizing solution
Development of a theory for the determination of the composition of the anodizing solution inside the pores during the growth of porous anodic Al_2O_3 films on aluminium by a transport phenomenon analysis (Patermarakis) **447**, 25
Anomalous Warburg impedance
Electrochemical impedance spectroscopy of conductor–insulator composite electrodes: properties in the blocking and diffusive regimes (Navarro-Laboulais et al.) **444**, 173
Anthracene halides
Rates of the halide ion cleavage from halo-9,10-diphenylanthracene anion radicals in DMF (Jaworski et al.) **440**, 163
Anthraquinone
Synthetic and electrochemical studies of anthraquinone-substituted poly(pyrrole) films (Moteki, Sykes) **447**, 91
Antimony
Contrasting electrochemical behavior of irreversibly adsorbed Sb monolayer on Pt(100) and Pt(111) single crystal electrode surfaces (Jung et al.) **453**, 243
Antineoplastic drugs
Electrochemical behaviour and micromolar determination of the antineoplastic agent azaribine and its mixtures with cytidine (Marín et al.) **440**, 95
Aqueous electrolytes
Mott–Schottky analysis of polycrystalline copper(I) bromide in aqueous electrolytes (Knauth, Massiani) **442**, 229

Aqueous micelle solution
Electrochemical mimicking of reduced rubredoxin by iron(II) complexes of cysteine peptide thiolate in aqueous micelle solution (Sun et al.) **448**, 105
Aqueous solution
Manganese-doped fullerene film electrodes (Szücs et al.) **442**, 59
Aqueous solutions
Electrode processes of chloramines in aqueous solutions (Wrona) **453**, 197
Aromatic
New methods for the accurate determination of extinction and diffusion coefficients of aromatic and heteroaromatic radical anions in *N,N*-dimethylformamide (Pedersen et al.) **454**, 123
Arrhenius analysis
Reorganization energetics for ferrocene oxidation/reduction in self-assembled monolayers on gold (Weber, Creager) **458**, 17
Arrhenius plot
Apparent negative activation energy in electrochemical insulating-to-conducting conversion at polymethylthiophene films (Aoki, Li) **441**, 161
Ascorbic acid
Voltammetric behaviour and electrocatalytic activity of the aluminum electrode modified with nickel and nickel hexacyanoferrate films, prepared by electroless deposition (Pournaghi-Azar, Razmi-Nerbin) **456**, 83
ASED-MO method
A theoretical study of the electrochemical reduction of oxygen (Bockris, Abdu) **448**, 189
Assisted ion transfer
Electrochemical extraction of heavy metal ions assisted by cyclic thioether ligands (Lagger et al.) **451**, 29
Assisted ion transfer reactions
Facilitated ion transfer reactions across oil|water interfaces. Part II. Use of the convoluted current for the calculation of the association constants and for an amperometric determination of the stoichiometry of ML_j^{z+} complexes (Reymond et al.) **451**, 59
Facilitated ion transfer reactions across oil|water interfaces. Part I. Algebraic development and calculation of cyclic voltammetry experiments for successive complex formation (Reymond et al.) **449**, 49
Atomic force microscopy
A molecular resolution AFM study of gold-adsorbed glucose oxidase as influenced by enzyme concentration (Quinto et al.) **448**, 51
Identification of different silver nucleation processes on vitreous carbon surfaces from ammonia electrolytic bath (Miranda-Hernández et al.) **443**, 81
Atomic hydrogen
Catalytic reduction of carbon dioxide with atomic hydrogen permeating through palladized Pd sheet electrodes (Iwakura et al.) **459**, 167
Atomic scale
Impedance of rough capacitive electrodes: the role of surface disorder (Kerner, Pajkossy) **448**, 139
Au(100)
The voltammetric features associated with the lifting of charge-induced surface reconstruction on Au(100) (Skołuda) **442**, 9
Au(111)
In-situ infrared spectroscopic studies of thymine adsorption on a Au(111) electrode (Haiss et al.) **454**, 107
Surface reconstruction at metal|solid polymer electrolyte interfaces: Au(111)|Nafion® interface (Wang, Adžić) **448**, 205
Underpotential deposition of zinc ions on Au(111) in phosphate solution (pH 4.6): kinetic and STM studies (Nakamura et al.) **446**, 227
Vibrational spectroscopic study of the adsorption of pyridine at the Au(111)-electrolyte interface by in situ difference frequency generation (Hébert et al.) **447**, 5
Au catalysts
Electrochemical synthesis of urea at gas-diffusion electrodes .Part II. Simultaneous reduction of carbon dioxide and nitrite ions at Cu, Ag and Au catalysts (Shibata et al.) **442**, 67
Au(III) determination
Determination of Au(III) in the surface layers formed anodically on the gold electrode (Juodkazis et al.) **441**, 19
Au electrode
Electrochemical reduction of CO_2 on Au in KOH + methanol at low temperature (Kaneco et al.) **441**, 215
Electrochemical scanning tunneling microscopy and electrochemical quartz crystal microbalance study of the adsorption of phenanthraquinone accompanied by an electrochemical redox reaction on the Au electrode (He et al.) **440**, 65
Au(III) electrodes
Electrochemical quartz crystal microbalance study of copper adatoms on Au(111) electrodes in solutions of perchloric and sulfuric acid (Uchida et al.) **452**, 97
Au(111) surfaces
Probability theory of desorption kinetics of self-assembled alkanethiols stabilized with pair interaction (Aoki, Kakiuchi) **452**, 187
Autoxidation
Mechanistic study of the autoxidation of reduced flavin and quinone compounds (Tatsumi et al.) **443**, 236
Aza-crown-ethers
Novel voltammetric responses of a 1,1′-ferrocene bis(methylene aza-18-crown-6) receptor to group 1 and 2 metal cations in acetonitrile (Chen et al.) **444**, 209
Azamacrocycles
Oxalate-bridged dinuclear nickel azacyclam macrocyclic complexes: synthesis and electrochemical study (Taraszewska et al.) **452**, 49
Azaribine
Electrochemical behaviour and micromolar determination of the antineoplastic agent azaribine and its mixtures with cytidine (Marín et al.) **440**, 95
Azobenzene
Constructing different 'bridges' for interfacial electron transfer in azobenzene LB/SAM composite bilayers (Yu et al.) **448**, 119
Azomethine bond
Electrochemical reduction of metamitron (Ludvik et al.) **457**, 177

Bacterial suspension
Mediated catalytic current for the oxidation of ethanol produced by Acetobacter aceti cells suspended in solution (Ikeda et al.) **440**, 265
BAM3G(TM)
Solid-state electrochemical oxygen reduction at Pt | Nafion® 117 and Pt | BAM3G(TM) 407 interfaces (Basura et al.) **458**, 1
Band A
Investigation of the oxidation of glassy carbon by the method of electroreflectance—relevance to activation processes (Korshin) **446**, 13
Base catalyzed hydrolysis
Thin indium oxide film formation and growth: Impedance spectroscopy and cyclic voltammetry investigations (Metikoš-Huković, Omanović) **455**, 181
Basic solution
An in situ infrared spectroscopic study of imidazole films on copper electrodes (Richmond et al.) **448**, 237
Battery
The electrochemistry of fluorine-substituted polyphenylthiophenes for charge storage applications (Gofer et al.) **443**, 103
Battery cathodes
Impedance of constant phase element (CPE)-blocked diffusion in film electrodes (Bisquert et al.) **452**, 229
Benzoin reduction
Reduction mechanism of benzoin on a mercury electrode (Carbajo et al.) **440**, 51

4-Benzoquinone
Ion pair formation between the electrogenerated 2,3-dichloro-5,6-dicyoano-1,4-benzoquinone dianion and the sodium ion at platinum surfaces (Oyamo et al.) **451**, 193
Benzyl chlorides
Mechanism of the electrochemical reduction of benzyl chlorides catalysed by Co(salen) (Isse et al.) **444**, 241
Bi(V) sites
Electrocatalytic function of Bi(V) sites in heavily-doped PbO_2-film electrodes applied for anodic detection of selected sulfur compounds (Popovic et al.) **455**, 153
2,2′-Bibenzoxazoline
Electrochemical switching of fluorescence emission between red and blue from complexed europium ions in poly(ethylene oxide) (Mukaigawa, Ohno) **452**, 141
Bicatalyst
Bicatalyst electrocatalytic reduction and oxidation of nitrite by Fe(II) and Cu(II) complexes in the same solution (Chen) **457**, 23
Bifurcation analysis
Bifurcation to limit cycle oscillations induced by the ohmic potential drop during the anodic polarisation of iron in 14.8 M H_3PO_4 (Sazou, Pagitsas) **451**, 77
Bilayers
Potentiometric studies of bilayers of conducting polymers (Wojda, Maksymiuk) **441**, 205
Binaphthalene
Electrochemical behaviour of different binaphthalene crown ethers. Part 2: Novel strategy based on in situ removable bromine atom protecting groups for the electrosynthesis of polybinaphthalenes bearing perylene crown ethers as potentially redox switchable macromolecular hosts (Belloncle et al.) **444**, 101
Binary self-assembled monolayers
Phase separation of binary self-assembled thiol monolayers composed of 1-hexadecanethiol and 3-mercaptopropionic acid on Au(111) studied by scanning tunneling microscopy and cyclic voltammetry (Hobara et al.) **444**, 113
Biocatalysis
Kinetic studies on the electron transfer between bacterial c-type cytochromes and metal oxides (Lojou et al.) **452**, 167
Bioelectrocatalysis
Bioelectrocatalysis by a selenoenzyme (Lehmann et al.) **455**, 259
C_{60}-mediated bioelectrocatalyzed oxidation of glucose with glucose oxidase (Patolsky et al.) **454**, 9
Mediated bioelectrocatalysis based on NAD-related enzymes with reversible characteristics (Takagi et al.) **445**, 211
Biomimetic membrane
Impedance measurements with phospholipid-coated mercury electrodes (Rueda et al.) **454**, 155
Biosensor
A molecular resolution AFM study of gold-adsorbed glucose oxidase as influenced by enzyme concentration (Quinto et al.) **448**, 51
Biosensors
A kinetic model for the reduction of enzyme-generated H_2O_2 at a metal-dispersed conducting polymer film (Somasundrum et al.) **440**, 259
In situ AFM/STM characterization of porphyrin electrode films for electrochemical detection of neurotransmitters (Duong et al.) **447**, 63
Biospecific affinity
Self-assembled monolayers with biospecific affinity for NAD(H)-dependent dehydrogenases: characterization by surface plasmon resonance combined with electrochemistry 'in situ' (Schlereth, Kooyman) **444**, 231
Bipolar membranes
Electric field enhanced water dissociation at the bipolar membrane junction from ac impedance spectra meaurements (Holdik et al.) **442**, 13
Bipolaron
Interconversion of polarons and bipolarons of polyaniline during the electrochemical polymerization of aniline (Mu et al.) **446**, 107
Biffircation
Discontinuous immitance due to a saddle node bifurcation. I: 1-, 2- and 3-part immitance diagrams (Berthier et al.) **458**, 231
Bismuth
A mathematical model for anodic oxygen-transfer reactions at Bi(V)-doped PbO_2-film electrodes (Popović et al.) **456**, 203
An impedance and chronocoulometric study of the adsorption of chloride and bromide ions on bismuth single crystal planes from solutions in methanol (Väärtnõu, Lust) **445**, 165
Stability of bismuth adlayers on Pt(111) electrodes in the presence of adsorbed organic compounds (Carbó et al.) **446**, 79
Surface cleavage of oxocarbons to CO adspecies on Pt(111) electrodes induced by metal adatoms (Carbó et al.) **449**, 193
Bismuth underpotential deposition
Glucose oxidation at bismuth-modified platinum electrodes (Wittstock et al.) **444**, 61
Bode plot
Electrochemical impedance of multistep mechanisms: mechanisms with static species (Harrington) **449**, 29
Boron-doped films
Synthetic semiconductor diamond electrodes: The comparative study of the electrochemical behaviour of polycrystalline and single crystal boron-doped films (Pleskov et al.) **455**, 139
Boundary singularities
An exponentially expanding mesh ideally suited to the fast and efficient simulation of diffusion processes at microdisc electrodes. 1. Derivation of the mesh (Gavaghan) **456**, 1
Bromide
Electrocatalysis by vanadium haloperoxidase (Kulys, Vidziunaite) **455**, 161
Bromine anions
Underpotential deposition of lead on Pt(111) in the presence of bromide: $RRD_{Pt(111)}E$ and X-ray scattering studies (Marković et al.) **448**, 183
2-Bromothiazole
Electrochemical reduction of 2-bromothiazole at carbon cathodes in acetonitrile (Ji, Peters) **455**, 147
Brönsted acid
The effect of weak Brönsted acids on the electrocatalytic reduction of carbon dioxide by a rhenium tricarbonyl bipyridyl complex (Wong et al.) **453**, 161
Brönsted reactions
Coupled chemistry revisited in the tentative cathodic electropolymerization of 2-butenenitrile (Deniau et al.) **451**, 145
Bulk electrolysis
Ultrasound-assisted anodic oxidation of diuron (Macounova et al.) **457**, 141
1,3-Butanediol
In situ FTIR spectroscopic studies of electrooxidation of C_4 alcohols on platinum electrodes in acid solutions .Part II. Reaction mechanism of 1,3-butanediol oxidation (Li, Sun) **448**, 5
2-Butanone
A DEMS study of the electroreduction and oxidation of 3-buten-2-one and 2-butanone adsorbates on platinum in sulphuric solutions (Zinola et al.) **454**, 161
3-Buten-2-one
A DEMS study of the electroreduction and oxidation of 3-buten-2-one and 2-butanone adsorbates on platinum in sulphuric solutions (Zinola et al.) **454**, 161
2-Butenenitrile
Coupled chemistry revisited in the tentative cathodic electropolymerization of 2-butenenitrile (Deniau et al.) **451**, 145

C_{60}
C_{60}-mediated bioelectrocatalyzed oxidation of glucose with glucose oxidase (Patolsky et al.) **454**, 9

C_{60} films
The electroreduction of C_{60} films in solutions containing crown ether complexes of alkali metal cations (Winkler et al.) **456**, 229
C_{60}-monolayer
C_{60}-mediated bioelectrocatalyzed oxidation of glucose with glucose oxidase (Patolsky et al.) **454**, 9
C_{70}
Electrochemistry of C_{70} fullerene films in aqueous solutions (Csiszár et al.) **441**, 287
C_{82}
The voltammetry of C_{84} isomers (Anderson et al.) **444**, 151
C_{84}
The voltammetry of C_{84} isomers (Anderson et al.) **444**, 151
Cadmium
Electrochemical behaviour of a metallothionein related peptide in the presence of cadmium using cyclic voltammetry (Harlyk et al.) **446**, 139
Electrochemical extraction of heavy metal ions assisted by cyclic thioether ligands (Lagger et al.) **451**, 29
Calcium phosphates
Mechanistic studies of electrodeposition for bioceramic coatings of calcium phosphates by an in situ pH-microsensor technique (Zhang et al.) **452**, 235
Calix[4]arene
The effects of covalent binding of the electroactive components in durable CHEMFET membranes—impedance spectroscopy and ion sensitivity studies (Lugtenberg et al.) **452**, 69
Calix[4]arenes
Immobilisation at an electrode surface of calix[4]arenes bearing electropolymerisable pyrrole moieties at the upper rim (Buffenoir et al.) **451**, 261
Calorimetry
Calorimetry close to the boiling temperature of the D_2O/Pd electrolytic system (Mengoli et al.) **444**, 155
Capacitance
Electrochemical and mass measurements during small voltage amplitude perturbations of conducting polyaniline films (Dinh, Birss) **443**, 63
The influence of porosity and the nature of the charge storage capacitance on the impedance behaviour of electropolymerized polyaniline films (Roßberg et al.) **443**, 49
Capacitance dispersion
Characterisation of Au(111) and Au(210) | aqueous solution interfaces by electrochemical immittance spectroscopy (Sadkowski et al.) **455**, 107
Impedance of rough capacitive electrodes: the role of surface disorder (Kerner, Pajkossy) **448**, 139
Capacitance–potential curves
Silicon surface states and subsurface hydrogen (Belaïdi et al.) **444**, 55
Capacity
Origin of the effect of ion nature on the differential capacity of an interface between two immiscible electrolyte solutions (Samec et al.) **444**, 1
Capillary condensation
Adsorption of water molecules in slit pores (Spohr et al.) **450**, 281
Capillary waves
Origin of the effect of ion nature on the differential capacity of an interface between two immiscible electrolyte solutions (Samec et al.) **444**, 1
Captafol
Electroreduction of the fungicides Folpet, Captan and Captafol on mercury electrodes (Carabias-Martínez et al.) **456**, 193
Captan
Electroreduction of the fungicides Folpet, Captan and Captafol on mercury electrodes (Carabias-Martínez et al.) **456**, 193
Carbon dioxide
Electrochemical reduction of CO_2 on Au in KOH + methanol at low temperature (Kaneco et al.) **441**, 215
The effect of weak Brönsted acids on the electrocatalytic reduction of carbon dioxide by a rhenium tricarbonyl bipyridyl complex (Wong et al.) **453**, 161
Carbon fiber electrode
Carbon fiber microelectrodes for adsorptive stripping analysis of trace nucleic acids (Wang et al.) **441**, 167
Carbon–halogen bond cleavage
Rates of the halide ion cleavage from halo-9,10-diphenylanthracene anion radicals in DMF (Jaworski et al.) **440**, 163
Carbon monoxide
In situ FTIRS study of the electrocatalytic oxidation of carbon monoxide and methanol at platinum–ruthenium bulk alloy electrodes (Kabbabi et al.) **444**, 41
Stability of bismuth adlayers on Pt(111) electrodes in the presence of adsorbed organic compounds (Carbó et al.) **446**, 79
The impinging jet flow method in interfacial electrochemistry: an application to bead-type electrodes (Bergelin, Wasberg) **449**, 181
Carbon nanotubes
Electrolytic conversion of graphite to carbon nanotubes in fused salts (Chen et al.) **446**, 1
Carbon paste electrode
Electrochemical study of iron ferrite sludge obtained under the conditions proposed for the purification of waste water at a carbon paste electrode (Barrado et al.) **441**, 227
Carbon paste electrodes
Electrochemistry of hydrotalcite-supported bis(2-mercapto-2,2-diphenyl-ethanoate) dioxomolybdate complexes. (Doménech et al.) **458**, 31
Carbon steel
The electrochemical behavior and impedance characteristics of the passive film on carbon steel in nitric acid solutions (Guo et al.) **445**, 95
Carbon-supported Pt
Effect of particle size on the electrocatalysis by carbon-supported Pt electrocatalysts: an in situ XAS investigation (Mukerjee, McBreen) **448**, 163
Carbonaceous materials
Origin of a sharp current peak appearing at a potential slightly more positive than 0 V versus Li | Li^+ on the cyclic voltammograms of carbonaceous materials (Takamura et al.) **455**, 223
Carbonate electroreduction
Electrochemical reduction of carbonate solutions at low temperatures (Osetrova et al.) **453**, 239
Cast films
Electrochemical properties of Langmuir–Blodgett films of polyesters derived from oligothiophenes (Goldenberg et al.) **443**, 266
Catalysis
A mathematical model for anodic oxygen-transfer reactions at Bi(V)-doped PbO_2-film electrodes (Popović et al.) **456**, 203
New electroactive metal oxides electrodeposited from selected Keggin and Dawson-type heteropolyanions (Keita et al.) **443**, 168
Catalyst
A methanol/dioxygen biofuel cell that uses NAD^+-dependent dehydrogenases as catalysts: application of an electro-enzymatic method to regenerate nicotinamide adenine dinucleotide at low overpotentials (Palmore et al.) **443**, 155
An electrochemical and spectroelectrochemical (IR) investigation of the reduction of RCo(II)TPP (R = benzyl or butyl; TPP = tetraphenylporphyrin): mechanistic implications in the CoTPP catalyzed electrocarboxylation of alkyl halides (Zheng et al.) **453**, 79
Catalyst utilization
Modelling the performance of the cathode catalyst layer of polymer electrolyte fuel cells (Eikerling, Kornyshev) **453**, 89

Catalysts
A rapid half-cell technique for the pre-screening of polymer fuel cell catalysts (TamizhMani et al.) **444**, 121
Catalytic activity
Nucleation and growth of metal catalysts. Part I. Electrodeposition of platinum on tungsten (Kelaidopoulou et al.) **444**, 195
Catalytic current
Ligand-catalysed metal ion reduction. Voltammetric determination of rate and formation constants for the nickel complex with 6-mercaptopurine-9-D-riboside (Ion et al.) **444**, 11
Catalytic hydrogen reduction
Inosine reduction study at low pH by a combination of electrochemical methods (Havran et al.) **454**, 65
Catalytic mechanism
Analytical solution corresponding to the i/t response to a multipotential step for a catalytic mechanism (Molina) **443**, 163
General analytical solution for a catalytic mechanism in potential step techniques at hemispherical microelectrodes: Applications to chronoamperometry, cyclic staircase voltammetry and cyclic linear sweep voltammetry (Molina et al.) **454**, 15
Catalytic properties
Self-assembly and catalytic properties of 1,1′-bridged-2,2′-dipyridinium amphiphiles (Judkins et al.) **451**, 39
Catalytic reduction
Catalytic reduction of carbon dioxide with atomic hydrogen permeating through palladized Pd sheet electrodes (Iwakura et al.) **459**, 167
Catalytic reduction of cyclohexanecarbonyl chloride with electrogenerated nickel(I) salen in acetonitrile (Bhattacharya et al.) **441**, 103
Catalytic reduction of iodoethane by cobalt(I) salen electrogenerated at vitreous carbon cathodes (Alleman, Peters) **451**, 121
Cathode catalyst layer
Modelling the performance of the cathode catalyst layer of polymer electrolyte fuel cells (Eikerling, Kornyshev) **453**, 89
Cathodic prepolarization
Electrochemical oxidation of nickel in alkaline solutions: a voltammetric study and modelling (Seghiouer et al.) **442**, 113
Cation effect
Electrochemical quartz crystal microbalance and spectroelectrochemical studies of the influence of cations on the formation and electroactivity of poly(*N*-vinylcarbazole) films in acetonitrile solutions (Carlier et al.) **456**, 139
Cation effects
Electrochemical, spectroscopic and structural investigations of the Cd|Cd(II) system in alkaline media. I. Cation effects (Simic, Ahlberg) **451**, 237
Cation-exchanging matrix
Potentiometric studies of bilayers of conducting polymers (Wojda, Maksymiuk) **441**, 205
Cationic conducting polymers
Restructuring of cationic conducting polymers by $Fe(CN)_6^{4-}$ (Qi, Pickup) **441**, 131
Cations
Cation effects on the anodic dissolution of n-Si in fluoride electrolytes (Belaïdi et al.) **455**, 191
Cd(II) acetylacetone complexes
The enhanced transport of the cadmium acetylacetone complex across the adsorbed aliphatic alcohol monolayer during electroreduction on mercury electrodes (Schmidt et al.) **456**, 131
Cd|Cd(II) system
Electrochemical, spectroscopic and structural investigations of the Cd|Cd(II) system in alkaline media. I. Cation effects (Simic, Ahlberg) **451**, 237
CdS nanoparticle
Effect of immobilized electron relay on the interfacial photoinduced electron transfer at a layered inorganic–organic composite film on gold (Nakanishi et al.) **455**, 229
CdSe
Photocorrosion of polycrystalline CdSe in aqueous KOH: an in situ study by photocalorimetry (Dohrmann, Reck) **452**, 215
CE mechanism
Electrochemical reduction of acids in dimethyl sulfoxide. CE mechanisms and beyond (Treimer, Evans) **449**, 39
Zeroth-order solution and higher-order corrections for the CE mechanism in double potential step techniques (Galvez) **441**, 259
Ceramic-carbon electrodes
Electrochemical oxidation of NADH on sol–gel derived, surface renewable, non-modified and mediator modified composite-carbon electrodes (Sampath, Lev) **446**, 57
Channel electrode
The electrochemical oxidation of cobalt tris(dithiocarbamates) and tris(diselenocarbamates) in acetonitrile; a combined spectroscopic and voltammetric study (Alden et al.) **447**, 155
Channel electrode voltammetry
Channel electrode voltammetry: the kinetics of the complexation of the chloranil radical anion with M^{2+} ions by waveshape analysis (Cooper et al.) **442**, 201
Channel flow cell
Mechanism of solid|liquid interfacial reactions. The reactive dissolution of p-chloranil in aqueous solution as studied by the channel flow cell with electrochemical detection and atomic force microscopy (Booth et al.) **440**, 83
Characterization
Characterizations of iron-rich clay modified electrodes and their applications in optical recognition (Shyu, Wang) **440**, 27
Charge densities
Preparation and electrochemical evaluation of poly (3-phenylthiophene) derivatives: potential materials for electrochemical capacitors (Ferraris et al.) **459**, 57
Charge displacement
The impinging jet flow method in interfacial electrochemistry: an application to bead-type electrodes (Bergelin, Wasberg) **449**, 181
Charge hopping
Enhancing effect of amino acid residue models on the charge transfer in a Nafion® film incorporating $Ru(bpy)_3^{2+}$ complex (Zhang et al.) **445**, 109
Temperature dependence in charge hopping between redox centers in a polymer membrane as studied by potential-step chronocoulospectrometry (Yagi et al.) **448**, 131
Charge transfer
Asymmetry of inner-sphere reorganization energy for heterogeneous electron transfer (Tsirlina et al.) **450**, 63
Charge transfer in poly(*o*-toluidine) gold modified electrodes. An EIS study of the reduced state (Rodríguez Presa et al.) **455**, 49
Electrochemical nucleation on active sites—what do we measure in reality? Part II (Milchev) **457**, 47
Heterogeneous process of charge transfer and phototransfer with participation of dipole particles (Marsagishvili) **450**, 47
Charge transfer kinetics
Potential-modulated reflectance spectroscopy of the methyl orange transfer across the water|1,2-dichloroethane interface (Fermín et al.) **447**, 125
Charge transfer reaction
Cyclic chronopotentiometry with non-linear current–time functions at an SMDE .Amalgamation and reversibility effects and experimental verification (González et al.) **440**, 111
Charge transfer steps
On the theory of the coulostatic pulse technique as applied to redox electrodes with two consecutive charge transfer steps (Kopistko, Nauryzbaev) **451**, 19

Charge transport
Dependence of redox-kinetic parameters at poly(*o*-phenylenediamine)-modified electrodes upon the oxidation and protonation levels of the polymer (Komura et al.) **446**, 113
Enhancing effect of amino acid residue models on the charge transfer in a Nafion® film incorporating $Ru(bpy)_3^{2+}$ complex (Zhang et al.) **445**, 109
Temperature dependence in charge hopping between redox centers in a polymer membrane as studied by potential-step chronocoulospectrometry (Yagi et al.) **448**, 131
Charge transport kinetics
Electron and ion transport in polypyrrole/polystyrenesulfonate composite films (Komura et al.) **456**, 121
Charging process
Charging process in polypyrrole films: effect of ion association (Vorotyntsev et al.) **450**, 121
CHEMFET
The effects of covalent binding of the electroactive components in durable CHEMFET membranes—impedance spectroscopy and ion sensitivity studies (Lugtenberg et al.) **452**, 69
Chemical cleavage
What anodic and chemical stability for 2-thienyl carbinol ethers? Polymerization and/or cleavage? (Marrec, Simonet) **459**, 35
Chemical metal deposition
Chemical deposition of foreign metals on a Pd sheet and its application to continuous hydrogenation of 4-methylstyrene (Yoshida et al.) **444**, 203
Chemically modified electrode
Electrochemical regeneration of coenzyme NADH on a histidine modified silver electrode (Long, Chen) **440**, 239
Monomolecular films of a nickel(II) pentaazamacrocyclic complex for the electrocatalytic oxidation of hydrogen peroxide at gold electrodes (Gobi et al.) **444**, 145
Reaction mechanism and kinetics of alcohol oxidation at nitroxyl radical modified electrodes (Kishioka et al.) **452**, 179
Chemically modified electrodes
A comparative study of the impedance properties of glassy-carbon electrodes covered with poly(styrenesulphonate) and Nafion® films containing $Os(bpy)_3^{3+/2+}$ redox sites (Sharp, Åberg) **449**, 137
Electrodes coated by hydrotalcite-like clays. Effect of the metals and the intercalated anions on ion accumulation and retention capability (Ballarin et al.) **445**, 27
Chemiluminescence
Electrochemically oxidized ferrocenes as catalysts for the chemiluminescence oxidation of luminol (Wilson, Schiffrin) **448**, 125
Chloranil
Channel electrode voltammetry: the kinetics of the complexation of the chloranil radical anion with M^{2+} ions by waveshape analysis (Cooper et al.) **442**, 201
p-Chloranil
Mechanism of solid|liquid interfacial reactions. The reactive dissolution of p-chloranil in aqueous solution as studied by the channel flow cell with electrochemical detection and atomic force microscopy (Booth et al.) **440**, 83
Chloride
Electrocatalysis by vanadium haloperoxidase (Kulys, Vidziunaite) **455**, 161
Choline
Amperometric ion sensors based on laser-patterned composite polymer membranes (Lee et al.) **440**, 73
Chromium atoms
Interaction of chromium atoms with other metals (Zn, Mn, Tl, Pb and Cu) in the mercury phase (Paklepa, Wrona) **453**, 205
Chromium porphyrins
Spectral and electrocatalytic studies for unusual oxidation and reduction states of chromium porphyrins in aqueous solutions (Lu, Su) **446**, 25
Chronoabsorptometry
Spectroelectrochemical approaches to heterogeneous electron transfer reactions at the polarised water | 1,2-dichloroethane interfaces (Ding et al.) **458**, 139
Spectroelectrochemical study of the copper(II) transfer assisted by 6,7-dimethyl-2,3-di(2-pyridyl)quinoxaline at the water|1,2-dichloroethane interface (Tomaszewski et al.) **453**, 171
Chronoamperometric response
An accurate microdisc simulation model for recessed microdisc electrodes (Bartlett, Taylor) **453**, 49
Chronoamperometry
A novel electrochemical method for simultaneously measuring diffusion coefficient and ion transference number (Zhou et al.) **443**, 1
An exponentially expanding mesh ideally suited to the fast and efficient simulation of diffusion processes at microdisc electrodes. 2. Application to chronoamperometry (Gavaghan) **456**, 13
Analytical solution corresponding to the i/t response to a multipotential step for a catalytic mechanism (Molina) **443**, 163
Chronoamperometric study of the reductive desorption of alkanethiol self-assembled monolayers (Yang, Morin) **441**, 173
Determination of the electroactive area of graphite + polyethylene composite electrodes. Uncompensated resistance effects and convolution analysis of chronoamperograms (Navarro-Laboulais et al.) **443**, 41
General analytical solution for a catalytic mechanism in potential step techniques at hemispherical microelectrodes: Applications to chronoamperometry, cyclic staircase voltammetry and cyclic linear sweep voltammetry (Molina et al.) **454**, 15
Identification of different silver nucleation processes on vitreous carbon surfaces from ammonia electrolytic bath (Miranda-Hernández et al.) **443**, 81
Reduction mechanism of benzoin on a mercury electrode (Carbajo et al.) **440**, 51
Restructuring of cationic conducting polymers by $Fe(CN)_6^{4-}$ (Qi, Pickup) **441**, 131
The electrode reactions of $Fe(CN)_6^{3-}$ and $Fe(CN)_6^{4-}$ ions studied at temperatures below the melting point of stoichiometric electrolytes (Opallo) **444**, 187
Chronocoulometry
Adsorption of adenosine on (111) and (001) bismuth single crystal planes (Lust et al.) **449**, 153
Adsorption of normal hexanol on bismuth single crystal plane electrodes (Lust et al.) **442**, 189
Chronopotentiometry
Carbon fiber microelectrodes for adsorptive stripping analysis of trace nucleic acids (Wang et al.) **441**, 167
CIMS
Coupled chemistry revisited in the tentative cathodic electropolymerization of 2-butenenitrile (Deniau et al.) **451**, 145
Clark electrode
Analytical solution for the steady-state diffusion towards an inlaid disc microelectrode in a multi-layered medium (Galceran et al.) **440**, 1
Clay
Multistep one-electron photoelectrocatalytic reduction of oxygen at tris(2,2′-bipyridine)ruthenium(II)-incorporated Nafion®- and clay-coated electrodes in the presence of macrocyclic cobalt(III) complexes (Gobi, Ramaraj) **449**, 81
Clay modified electrode
Characterization of organosilasesquioxane-intercalated-laponite-clay modified electrodes and (bio)electrochemical applications (Coche-Guérente et al.) **458**, 73

Clay-modified electrode
Clay-modified electrodes as studied by the quartz crystal microbalance: redox processes of ruthenium and iron complexes (Yao et al.) **443**, 253
Mass transport on an anionic clay-modified electrode as studied by a quartz crystal microbalance (Yao et al.) **457**, 119
Clay modified electrodes
Electrochemical behavior of acid activated montmorillonite modified electrodes (Falaras, Lezou) **455**, 169
Clay-modified electrodes
Electrochemistry of hydrotalcite-supported bis(2-mercapto-2,2-diphenyl-ethanoate) dioxomolybdate complexes. (Doménech et al.) **458**, 31
Clusters
Application of positron lifetime spectroscopy to the study of electrodeposited chromium layers (Süvegh et al.) **455**, 69
On the cathodic behaviour of tetraalkylammonium cations at a platinum electrode (Simonet et al.) **451**, 5
CME
Preparation, characterization and application of an electrode modified with electropolymerized $CuPtCl_6$ (Pei, Li) **441**, 245
CO
Electrochemical reduction of CO_2 on single crystal electrodes of silver Ag(111), Ag(100) and Ag(110) (Hoshi et al.) **440**, 283
CO_2 reduction
Effects of ligand structure on the adsorption of nickel tetraaza-macrocyclic complexes and electrocatalytic CO_2 reduction (Bujno et al.) **445**, 47
CO_2 reduction with nitrite
Electrochemical synthesis of urea at gas-diffusion electrodes. Part II. Simultaneous reduction of carbon dioxide and nitrite ions at Cu, Ag and Au catalysts (Shibata et al.) **442**, 67
Coating
A voltammetric and FTIR–ATR study of the electropolymerization of phenol on platinum electrodes in carbonate medium. Influence of sulfide (Lapuente et al.) **451**, 163
Coating of non-stoichiometric copper sulphide
Investigations of the interaction between $Cu_{2-x}S$ coating and Ag(I) ions using cyclic voltammetry and X-ray photoelectron spectroscopy (Vinkevičius et al.) **442**, 73
Cobalt deposition
Influence of the coordination sphere on the mechanism of cobalt nucleation onto glassy carbon (Palomar-Pardavé et al.) **443**, 125
Cobalt electrocrystallization
Influence of the coordination sphere on the mechanism of cobalt nucleation onto glassy carbon (Palomar-Pardavé et al.) **443**, 125
Cobalt hydroperoxide
Effects of carbon electrode surface states for the electro-reduction of $(hmc)CoOOH^{2+}$ which is an intermediate during the catalytic reduction of O_2 (Kang) **452**, 161
Cobalt myoglobin
Electron transfer and electrochemical catalysis using cobalt-reconstituted myoglobin in a surfactant film (Gao, Rusling) **449**, 1
Cobalt phthalocyanines
Electrochemical reduction of substituted cobalt phthalocyanines adsorbed on graphite (Schlettwein, Yoshida) **441**, 139
Cobalt porphyrins
An electrochemical and spectroelectrochemical (IR) investigation of the reduction of RCo(II)TPP (R = benzyl or butyl; TPP = tetraphenylporphyrin): mechanistic implications in the CoTPP catalyzed electrocarboxylation of alkyl halides (Zheng et al.) **453**, 79
Cobalt(I) salen
Catalytic reduction of iodoethane by cobalt(I) salen electrogenerated at vitreous carbon cathodes (Alleman, Peters) **451**, 121
Cobalt tris(diselenocarbamate)
The electrochemical oxidation of cobalt tris(dithiocarbamates) and tris(diselenocarbamates) in acetonitrile; a combined spectroscopic and voltammetric study (Alden et al.) **447**, 155
Cobalt tris(dithiocarbamate)
The electrochemical oxidation of cobalt tris(dithiocarbamates) and tris(diselenocarbamates) in acetonitrile; a combined spectroscopic and voltammetric study (Alden et al.) **447**, 155
Cold fusion
A numerical approach to the voltammograms of a thick plate Pd|H electrode (Zhang, Zhang) **445**, 55
Column electrolysis
Continuous-flow column electrolytic spectroelectrochemistry for two-step one-electron transfer reactions (Torimura et al.) **451**, 229
Complex
Electrochemical switching of fluorescence emission between red and blue from complexed europium ions in poly(ethylene oxide) (Mukaigawa, Ohno) **452**, 141
Complexing properties
Theoretical model of radionuclide extraction from soils by the mechanism of ionic electromigration (Kharkats) **450**, 27
Composite electrodes
Electrochemical impedance spectroscopy of conductor–insulator composite electrodes: properties in the blocking and diffusive regimes (Navarro-Laboulais et al.) **444**, 173
Composite microelectrode
Application of SPE composite microelectrodes to the study of the spillover of adsorbed species on electrode surfaces (Jiang et al.) **445**, 13
Composites
Electrochemical impedance studies of hybrids of perfluorosulfonic acid ionomer and silicon oxide by sol-gel reaction from solution (Zoppi, Nunes) **445**, 39
Composition
Development of a theory for the determination of the composition of the anodizing solution inside the pores during the growth of porous anodic Al_2O_3 films on aluminium by a transport phenomenon analysis (Patermarakis) **447**, 25
Comproportionation
Comproportionation and disproportionation reactions in the electrochemical reduction of nitroprusside at a hanging mercury drop electrode in acidic solution (Carapuça et al.) **455**, 93
Comproportionation equilibria
Oxalate-bridged dinuclear nickel azacyclam macrocyclic complexes: synthesis and electrochemical study (Taraszewska et al.) **452**, 49
Computation
Characterization of the microelectrode behaviour in metal electrodeposition by computation of linear potential sweep voltammetry (Stasiukaitis, Skominas) **459**, 121
Computer simulation
A computer simulation model for the diffusion controlled nucleation and growth processes on electrode surfaces—a two-dimensional study (Vilaseca et al.) **458**, 55
Computer simulation of the structure of the electrochemical double layer (Spohr) **450**, 327
Concentration profiles
Mechanisms behind concentration profiles illustrated by charge and concentration distributions around ions in double layers (Kjellander, Greberg) **450**, 233
Concept of reaction layer
The application of the concept of reaction layer to the study of electrode processes coupled with the second-order chemical reactions at microelectrodes under steady-state conditions (Zhuang, Sun) **440**, 103

Conductimetric
Critical comparison among equations derived from the Falkenhagen model to fit conductimetric data of concentrated electrolyte solutions (de Diego et al.) **446**, 177
Conducting materials
Anodic oxidation of dipyrrolyls linked with flexible or rigid spacers: study of the electropolymerization mode (Chane-Ching et al.) **453**, 139
Conducting polymer
A kinetic model for the reduction of enzyme-generated H_2O_2 at a metal-dispersed conducting polymer film (Somasundrum et al.) **440**, 259
Charging process in polypyrrole films: effect of ion association (Vorotyntsev et al.) **450**, 121
Electron and ion transport in polypyrrole/polystyrenesulfonate composite films (Komura et al.) **456**, 121
Electron and proton transport in gas diffusion electrodes containing electronically conductive proton-exchange polymers (Qi et al.) **459**, 9
Conducting polymers
Anodic oxidation of aniline and *N*-alkylanilines in aqueous sulphuric acid studied by electrochemical thermospray mass spectrometry (Stassen, Hambitzer) **440**, 219
Electrochemical behaviour of different binaphthalene crown ethers. Part 2: Novel strategy based on in situ removable bromine atom protecting groups for the electrosynthesis of polybinaphthalenes bearing perylene crown ethers as potentially redox switchable macromolecular hosts (Belloncle et al.) **444**, 101
The electrochemistry of fluorine-substituted polyphenylthiophenes for charge storage applications (Gofer et al.) **443**, 103
The influence of porosity and the nature of the charge storage capacitance on the impedance behaviour of electropolymerized polyaniline films (Roßberg et al.) **443**, 49
Conducting zone propagation
A fractal feature of the conducting zone by conversion rates from any redox state into the fully conducting state of polyaniline films (Aoki, Teragishi) **441**, 25
Conductive polymer
Electrochemical characteristics of D-amino acid oxidase immobilized in a conductive redox polymer (Arai et al.) **452**, 43
Conductive polymers
Moving front phenomena in the switching of conductive polymers (Lacroix et al.) **444**, 83
Conductivities
Electrogeneration of conducting poly(2,5-di-(-2-thienyl)-furan) (Brillas et al.) **445**, 125
Conductivity
Apparent negative activation energy in electrochemical insulating-to-conducting conversion at polymethylthiophene films (Aoki, Li) **441**, 161
Conductivity properties and potentiometric studies of NaBr solutions in mixtures of water with propan-2-ol at 298.15 K (Gregorowicz et al.) **452**, 63
High frequency dielectric studies of hydrated Nafion® (Paddison et al.) **459**, 91
In situ study of the conductivity of the electrochemically deposited polyaniline film using a dual-disk microelectrode (Zhang et al.) **440**, 35
Transport and equilibrium properties of Nafion® membranes with H^+ and Na^+ ions (Okada et al.) **442**, 137
Conductor + insulator composite electrodes
Determination of the electroactive area of graphite + polyethylene composite electrodes. Uncompensated resistance effects and convolution analysis of chronoamperograms (Navarro-Laboulais et al.) **443**, 41
Confocal Raman microspectroscopy
In situ probing of interfacial processes in the electrodeposition of copper by confocal Raman microspectroscopy (Texier et al.) **446**, 189
Conjugate base
Electrochemical reduction of acids in dimethyl sulfoxide. Comparison of weak C–H, N–H and O–H acids (Treimer, Evans) **455**, 19
Constant-current chronopotentiometry
Voltammetric modelling via extended semiintegrals (Mahon, Oldham) **445**, 179
Constant phase element
Characterisation of Au(111) and Au(210) | aqueous solution interfaces by electrochemical immittance spectroscopy (Sadkowski et al.) **455**, 107
On the electrical capacitance of interfaces exhibiting constant phase element behaviour (Zoltowski) **443**, 149
Contact electric resistance (CER) technique
Characterization of a poly(3-methyl thiophene) film by an in-situ dc resistance measurement technique and in-situ FTIR spectroelectrochemistry (Lankinen et al.) **447**, 135
Continuous hydrogenation system
Chemical deposition of foreign metals on a Pd sheet and its application to continuous hydrogenation of 4-methylstyrene (Yoshida et al.) **444**, 203
Controlled release
Polypyrrole as a model membrane for drug delivery (Kontturi et al.) **453**, 231
Convolution
Adsorption in semi-differential voltammetry (Klička) **455**, 253
Combined electrochemical quartz crystal microbalance (EQCM) and probe beam deflection (PBD): validation of the technique by a study of silver ion mass transport (Henderson et al.) **458**, 241
Determination of the electroactive area of graphite + polyethylene composite electrodes. Uncompensated resistance effects and convolution analysis of chronoamperograms (Navarro-Laboulais et al.) **443**, 41
Cooperative phenomena
Probability theory of desorption kinetics of self-assembled alkanethiols stabilized with pair interaction (Aoki, Kakiuchi) **452**, 187
Copper
Application of a wall jet disk electrode combined with an electrochemical quartz crystal microbalance to the study of the dissolution of copper in acidic chloride media (Itagaki et al.) **440**, 139
Electrochemical nucleation on microelectrodes. Theory and experiment for diffusion-controlled growth (Heerman, Tarallo) **451**, 101
XPS and voltammetric studies on $Ni_{1-x}Cu_xCo_2O_4$ spinel oxide electrodes (Tavares et al.) **449**, 91
Copper adatoms
Electrochemical quartz crystal microbalance study of copper adatoms on Au(111) electrodes in solutions of perchloric and sulfuric acid (Uchida et al.) **452**, 97
Copper coating
Electrochemical characterisation of a semiconductor–metal junction: n-type InP|Cu; influence of the structure of the metallic layer (Moulayat et al.) **453**, 129
Copper electrode
An in situ infrared spectroscopic study of imidazole films on copper electrodes (Richmond et al.) **448**, 237
Copper(II) salen
Electrochemical reduction of copper(II) salen at carbon cathodes in dimethylformamide (Samide, Peters) **443**, 95
Copper surface
The potential of mean force on halide ions near the Cu(100) surface (Ignaczak et al.) **450**, 175

Corrosion
Characterization of polyaniline films electrodeposited on mild steel in aqueous *p*-toluenesulfonic acid solution (Camalet et al.) **445**, 117
Simulation of growth and corrosion during the formation of a passive layer (Lafage et al.) **450**, 203
Coulombic interaction
Electrochemistry of heteropolyanions in coulombically linked self-assembled monolayers (Liu et al.) **458**, 87
Coulometry
Electroreduction of the fungicides Folpet, Captan and Captafol on mercury electrodes (Carabias-Martínez et al.) **456**, 193
Coulostatic pulse technique
On the theory of the coulostatic pulse technique as applied to redox electrodes with two consecutive charge transfer steps (Kopistko, Nauryzbaev) **451**, 19
Counterions
Rationalisation of time-dependent and voltage-dependent electroactivity in Nafion®/$Os(bpy)_3^{3+/2+}$ films in terms of a model that assumes restricted counterion access to non-equivalent redox sites (Åberg, Sharp) **449**, 121
Coupling of electrochemical oscillations
Coupling of the electrochemical oscillations from the cathode and anode in the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ system (Li et al.) **445**, 105
Covalent attachment
Electrochemistry of ITO and gold electrodes covalently modified with dithizone and the effect of Cu(II) and Pb(II) ions (Mirkhalaf et al.) **452**, 203
Covalent surface reactions
A voltammetric investigation of the reactions between surface-confined amines and quinones on gold electrodes: evidence for imine formation (He et al.) **458**, 7
CPE, ideally polarisable electrode, impedance spectroscopy, energy dissipation.
Remarks on the energetics of interfaces exhibiting constant phase element behaviour (Láng, Heusler) **457**, 257
Crosslinking
Electrochemical gelation of poly(3-hexylthiophene) film (Li, Aoki) **453**, 107
Crotononitrile
Coupled chemistry revisited in the tentative cathodic electropolymerization of 2-butenenitrile (Deniau et al.) **451**, 145
Crown ether complexes of alkali metals
The electroreduction of C_{60} films in solutions containing crown ether complexes of alkali metal cations (Winkler et al.) **456**, 229
Crown ethers
Electrochemical behaviour of different binaphthalene crown ethers. .Part 2: Novel strategy based on in situ removable bromine atom protecting groups for the electrosynthesis of polybinaphthalenes bearing perylene crown ethers as potentially redox switchable macromolecular hosts (Belloncle et al.) **444**, 101
Crystallographic structure
The driving force for $(p \times \sqrt{3}) \leftrightarrow (1 \times 1)$ phase transition of Au(111) in the presence of organic adsorption: a combined chronocoulometric and surface X-ray scattering study (Wu et al.) **446**, 67
CsF
Computer simulation of the structure of the electrochemical double layer (Spohr) **450**, 327
Cu(II)
Bicatalyst electrocatalytic reduction and oxidation of nitrite by Fe(II) and Cu(II) complexes in the same solution (Chen) **457**, 23
Cu catalysts
Electrochemical synthesis of urea at gas-diffusion electrodes .Part II. Simultaneous reduction of carbon dioxide and nitrite ions at Cu, Ag and Au catalysts (Shibata et al.) **442**, 67
Cu(111) electrode
An in situ STM study of sulphate adsorption on copper(111) in acidic aqueous electrolytes (Li, Nichols) **456**, 153
Cu underpotential
The influence of heterocyclic thiols on the electrodeposition of Cu on Au(111) (Whelan et al.) **441**, 109
$Cu|Cu^{2+}$ electrodes
Study of the $Cu|Cu(NO_3)_2||bru|\cdot||bru|H_2O|Cu$ electrochemical thermocouple at low temperatures (Szabó, Földesi) **452**, 107
$CuPtCl_6$
Preparation, characterization and application of an electrode modified with electropolymerized $CuPtCl_6$ (Pei, Li) **441**, 245
Current decay transient
Theoretical analysis of hydrogen transport through an electrode at the coexistence of two hydrogen-poor and -rich phases based upon the concept of hydrogen trapping (Pyun, Yang) **441**, 183
Current density
Kinetics of electroreduction of tris–oxalate cobalt(III) complexes on the dropping mercury electrode (Kondratiev et al.) **450**, 109
Current distribution
The electrocatalytic activity of Prussian blue in hydrogen peroxide reduction studied using a wall-jet electrode with continuous flow (Karyakin et al.) **456**, 97
Current oscillations
Bifurcation to limit cycle oscillations induced by the ohmic potential drop during the anodic polarisation of iron in 14.8 M H_3PO_4 (Sazou, Pagitsas) **451**, 77
Coupling of the electrochemical oscillations from the cathode and anode in the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ system (Li et al.) **445**, 105
Current transients
Nucleation and growth of metal catalysts. Part I. Electrodeposition of platinum on tungsten (Kelaidopoulou et al.) **444**, 195
Curvature effect
Diffuse layer effect and effect of curvature on the mechanism and the properties of phase transitions at electrified interfaces (Nikitas) **446**, 165
CVD
Electrochemistry at boron-doped diamond films grown on graphite substrates: redox-, adsorption and deposition processes (Goeting et al.) **442**, 207
Cyanide ion
Kinetics of electrochemical processes in the system: silver/cyanide solutions (Bek, Rogozhnikov) **447**, 109
Thermodynamics and kinetics of adsorption of cyanide ions on silver. Part II (Rogozhnikov, Beck) **457**, 31
Cyanomyoglobin
Spectroelectrochemical and electrochemical determination of ligand binding and electron transfer properties of myoglobin, cyanomyoglobin, and imidazolemyoglobin (Cohen et al.) **447**, 53
Cyclam
Effects of ligand structure on the adsorption of nickel tetraaza-macrocyclic complexes and electrocatalytic CO_2 reduction (Bujno et al.) **445**, 47
Cyclic chronopotentiometry
Cyclic chronopotentiometry with non-linear current–time functions at an SMDE .Amalgamation and reversibility effects and experimental verification (González et al.) **440**, 111
Cyclic polysilanes
Electrochemical oxidation of cyclic polysilanes under 'oxygen-free' and 'water-free' conditions (Zhang et al.) **455**, 197
Cyclic siloxanes
Electrochemical oxidation of cyclic polysilanes under 'oxygen-free' and 'water-free' conditions (Zhang et al.) **455**, 197
Cyclic voltammetric technique
Study of nickel upd at a polycrystalline Pt electrode and its influence on HCOOH oxidation in acidic and nearly neutral media (El-Shafei) **447**, 81

Cyclic voltammetry
A numerical approach to the voltammograms of a thick plate Pd|H electrode (Zhang, Zhang) **445**, 55
Adsorption of normal hexanol on bismuth single crystal plane electrodes (Lust et al.) **442**, 189
An electrochemical impedance and spectroelectrochemical study of the polypyrrole–flavin composite electrode (Bonazzola, Calvo) **449**, 111
An in situ UV–vis and IR spectroelectrochemical study of the disposition of a hydroquinone anion salt on platinum electrodes from dichloromethane solutions (Babaei, McQuillan) **441**, 197
Cyclic voltammetry at constant sphericity (Martínez-Ortiz et al.) **443**, 243
Electrochemical and in-situ UV-visible-near-IR and FTIR spectroelectrochemical characterisation of the mixed-valence heteropolyanion $PMo_{12}O_{40}^{n-}$ ($n = 4, 5, 6, 7$) in aprotic media (Sun et al.) **455**, 57
Electrochemical behaviour of amino acids on Pt(*hkl*). A voltammetric and in situ FTIR study. .Part III. Glycine on Pt(100) and Pt(110) (Huerta et al.) **445**, 155
Electrochemical behaviour of oxocarbons on single crystal platinum electrodes. Part V. Tetrahydroxy-*p*-benzoquinone in 0.5 M sulphuric acid medium (Carbó et al.) **440**, 57
Electrochemical oxidation of nickel in alkaline solutions: a voltammetric study and modelling (Seghiouer et al.) **442**, 113
Electrochemical polymerization of aniline and toluidines on a thermally prepared Pt electrode (Yang) **459**, 71
Electrochemical reduction of metamitron (Ludvík et al.) **457**, 177
Electrochemical reduction of the synthetic pyrethroid insecticides tralomethrin and tralocythrin at glassy carbon and mercury electrodes (Coomber et al.) **452**, 5
Electrochemical stability of redox active ions and molecules in liquid and frozen stoichiometric electrolytes (Opallo) **446**, 39
Electrochemical study of a metallothionein related peptide in the presence of zinc using cyclic voltammetry (Harlyk et al.) **451**, 267
Electrochemical study of iron ferrite sludge obtained under the conditions proposed for the purification of waste water at a carbon paste electrode (Barrado et al.) **441**, 227
Electrochemical study of metallothioneins using cyclic voltammetry (Harlyk et al.) **458**, 199
Electrochemically initiated polymerization of zinc(II)5-vinyl-10,15,20-triphenylporphyrin (Kuester et al.) **452**, 13
Electrochemistry of hydrotalcite-supported bis(2-mercapto-2,2-diphenyl-ethanoate) dioxomolybdate complexes. (Doménech et al.) **458**, 31
Electrochemistry of zeolite-encapsulated complexes: new observations (Briot et al.) **454**, 83
Electron transfer and electrochemical catalysis using cobalt-reconstituted myoglobin in a surfactant film (Gao, Rusling) **449**, 1
Electrostatic interactions at self assembled molecular films of charged thiols on gold (Molinero, Calvo) **445**, 17
Facilitated ion transfer reactions across oil|water interfaces. Part II. Use of the convoluted current for the calculation of the association constants and for an amperometric determination of the stoichiometry of ML_j^{z+} complexes (Reymond et al.) **451**, 59
Facilitated ion transfer reactions across oil|water interfaces. Part I. Algebraic development and calculation of cyclic voltammetry experiments for successive complex formation (Reymond et al.) **449**, 49
General analytical solution for a catalytic mechanism in potential step techniques at hemispherical microelectrodes: Applications to chronoamperometry, cyclic staircase voltammetry and cyclic linear sweep voltammetry (Molina et al.) **454**, 15
Glucose oxidation at bismuth-modified platinum electrodes (Wittstock et al.) **444**, 61
In-situ spectroelectrochemical analysis of the passivating surface film formed on a graphite electrode during the electrochemical reduction of lithium salts and organic carbonate solvent (Pyun, Ryu) **455**, 11
Investigations of the interaction between $Cu_{2-x}S$ coating and Ag(I) ions using cyclic voltammetry and X-ray photoelectron spectroscopy (Vinkevičius et al.) **442**, 73
Monomolecular films of a nickel(II) pentaazamacrocyclic complex for the electrocatalytic oxidation of hydrogen peroxide at gold electrodes (Gobi et al.) **444**, 145
Oxidation of formaldehyde, methanol, formic acid and glucose at ac heated cylindrical Pt microelectrodes (Zerihun, Gründler) **441**, 57
Preparation and electrochemical evaluation of poly (3-phenylthiophene) derivatives: potential materials for electrochemical capacitors (Ferraris et al.) **459**, 57
Rationalisation of time-dependent and voltage-dependent electroactivity in Nafion®/$Os(bpy)_3^{3+/2+}$ films in terms of a model that assumes restricted counterion access to non-equivalent redox sites (Åberg, Sharp) **449**, 121
Reaction of electrogenerated oxamniquine radical anion with glutathione (Radi, Belal) **441**, 39
Stability of bismuth adlayers on Pt(111) electrodes in the presence of adsorbed organic compounds (Carbó et al.) **446**, 79
Studies of ferrocene derivative diffusion and heterogeneous kinetics in polymer electrolyte by using microelectrode voltammetry (Zhou et al.) **441**, 153
Surface cleavage of oxocarbons to CO adspecies on Pt(111) electrodes induced by metal adatoms (Carbó et al.) **449**, 193
Synthesis and electrochemical behavior of amphiphilic 1,3,4-oxadiazole derivatives (Freydank et al.) **456**, 61
Synthetic and electrochemical studies of anthraquinone-substituted poly(pyrrole) films (Moteki, Sykes) **447**, 91
The direct electrochemistry of *N*-acetyl-microperoxidase-8 in aqueous and dimethyl sulfoxide solution (Ci Li, Mabrouk) **455**, 45
The electrochemical oxidation of cobalt tris(dithiocarbamates) and tris(diselenocarbamates) in acetonitrile; a combined spectroscopic and voltammetric study (Alden et al.) **447**, 155
The electrode reactions of $Fe(CN)_6^{3-}$ and $Fe(CN)_6^{4-}$ ions studied at temperatures below the melting point of stoichiometric electrolytes (Opallo) **444**, 187
The effect of magnesium ion on the electrochemistry of cytochrome c and cytochrome b_5 at a gold electrode modified with cysteine (Qian et al.) **447**, 187
Thin indium oxide film formation and growth: Impedance spectroscopy and cyclic voltammetry investigations (Metikoš-Huković, Omanović) **455**, 181
Voltammetric measurement of anion adsorption on Ag(111) (Stevenson et al.) **447**, 43
Voltammetric modelling via extended semiintegrals (Mahon, Oldham) **445**, 179
Voltammograms of thin layer Pd | H(D) electrodes in the coexistence of α and β phases (Zhang et al.) **458**, 107
XPS and voltammetric studies on $Ni_{1-x}Cu_xCo_2O_4$ spinel oxide electrodes (Tavares et al.) **449**, 91

Cyclodextrin complexes
The surface-enhanced Raman spectroelectrochemical study on the interaction between β-cyclodextrin and the electrochemically generated radical intermediate of flavin (Wang et al.) **451**, 187

Cyclohexanecarbonyl chloride
Catalytic reduction of cyclohexanecarbonyl chloride with electrogenerated nickel(I) salen in acetonitrile (Bhattacharya et al.) **441**, 103

Cyclopentadienyl ligand
Electrochemical studies of tricyclopentadienyl uranium IV chloride complexes: $(RCp)_3UCl$ ($RCp = RC_5H_4$ with R = H; Me: CH_3; tBu: $(CH_3)_3C$); TMS: $(CH_3)_3Si$). Evidence of a disproportionation mechanism in oxidation (Clappe et al.) **448**, 95

Cysteine oxidation
Spectroelectrochemical studies of tetrasulfonated metallophthalocyanines adsorbed on the basal plane of graphite in the presence of cysteine (Lezna et al.) **452**, 221
Cyt c/Cyt b_5 complex
The effect of magnesium ion on the electrochemistry of cytochrome c and cytochrome b_5 at a gold electrode modified with cysteine (Qian et al.) **447**, 187
Cytidine
Electrochemical behaviour and micromolar determination of the antineoplastic agent azaribine and its mixtures with cytidine (Marin et al.) **440**, 95
Cytochrome b_5
Spectroelectrochemical studies of cytochrome b_5 Phe35 mutants (Yao et al.) **445**, 197
The effect of magnesium ion on the electrochemistry of cytochrome c and cytochrome b_5 at a gold electrode modified with cysteine (Qian et al.) **447**, 187
Cytochrome *c*
The direct electrochemistry of cytochrome *c* at a hanging mercury drop electrode modified with 6-mercaptopurine (Sevilla et al.) **451**, 89
The effect of magnesium ion on the electrochemistry of cytochrome c and cytochrome b_5 at a gold electrode modified with cysteine (Qian et al.) **447**, 187

2D electrocrystallization
Influence of the coordination sphere on the mechanism of cobalt nucleation onto glassy carbon (Palomar-Pardavé et al.) **443**, 125
3D electrocrystallization
Influence of the coordination sphere on the mechanism of cobalt nucleation onto glassy carbon (Palomar-Pardavé et al.) **443**, 125
2D ordering
Effect of the crystallographic orientation of gold single-crystal electrodes on the occurrence of 2D phase transitions in adsorbed organic monolayers (Baré et al.) **445**, 7
D_2O/Pd electrolytic system
Calorimetry close to the boiling temperature of the D_2O/Pd electrolytic system (Mengoli et al.) **444**, 155
Dawson structure
Electrochemical properties of peroxotitanium-containing phosphotungstate with Dawson–Wells structure (Gong et al.) **455**, 39
Dawson type polyanion
Electrochemical and electrocatalytic properties of iridium(IV)-substituted Dawson type polyoxotungstate (Sun et al.) **451**, 49
Dc polarization
Oxidation of formaldehyde, methanol, formic acid and glucose at ac heated cylindrical Pt microelectrodes (Zerihun, Gründler) **441**, 57
Dc polarography
The role of protonation, hydration, elimination, and ring opening in the electroreduction of hexazinone (Privman, Zuman) **455**, 235
Degradation
Multi-technique study of the anodic degradation of polyaniline films (Dinh et al.) **459**, 45
Dehydrogenases
A methanol/dioxygen biofuel cell that uses NAD^+-dependent dehydrogenases as catalysts: application of an electro-enzymatic method to regenerate nicotinamide adenine dinucleotide at low overpotentials (Palmore et al.) **443**, 155
Self-assembled monolayers with biospecific affinity for NAD(H)-dependent dehydrogenases: characterization by surface plasmon resonance combined with electrochemistry 'in situ' (Schlereth, Kooyman) **444**, 231
Delay times
The pseudostationary mercury electrode (Laviron, Raveau-Fouquet) **458**, 43
Deoxybenzoin
Reduction mechanism of benzoin on a mercury electrode (Carbajo et al.) **440**, 51
Desorption kinetics
Probability theory of desorption kinetics of self-assembled alkanethiols stabilized with pair interaction (Aoki, Kakiuchi) **452**, 187
N,N'-Dialkylanilines
Electrochemical thermospray mass spectrometry—anodic oxidation of *N,N*-dialkylanilines (Hambitzer et al.) **447**, 117
Diamond electrode
Electrochemistry at boron-doped diamond films grown on graphite substrates: redox-, adsorption and deposition processes (Goeting et al.) **442**, 207
Diamond electrodes
Synthetic semiconductor diamond electrodes: The comparative study of the electrochemical behaviour of polycrystalline and single crystal boron-doped films (Pleskov et al.) **455**, 139
Diamond film
Electrochemistry at boron-doped diamond films grown on graphite substrates: redox-, adsorption and deposition processes (Goeting et al.) **442**, 207
Diaphorase
Mediated bioelectrocatalysis based on NAD-related enzymes with reversible characteristics (Takagi et al.) **445**, 211
Dibenzo-18-crown-6
Amperometric detection of alkali metal ions on micro-fabricated composite polymer membranes (Lee et al.) **453**, 211
Dicarboxylate
Electrochemical studies on molecular recognition of anions: complex formation between xylylenyl bis-iminoimidazolinium and dicarboxylates in nitrobenzene and water (Shao et al.) **441**, 33
Dichloramine
Electrode processes of chloramines in aqueous solutions (Wrona) **453**, 197
2,3-Dichloro-5
Ion pair formation between the electrogenerated 2,3-dichloro-5,6-dicyoano-1,4-benzoquinone dianion and the sodium ion at platinum surfaces (Oyamo et al.) **451**, 193
Dichloromethane
An in situ UV–vis and IR spectroelectrochemical study of the disposition of a hydroquinone anion salt on platinum electrodes from dichloromethane solutions (Babaei, McQuillan) **441**, 197
6-Dicyano-1
Ion pair formation between the electrogenerated 2,3-dichloro-5,6-dicyoano-1,4-benzoquinone dianion and the sodium ion at platinum surfaces (Oyamo et al.) **451**, 193
Dicyanoaurate
Adsorption of Au-containing species and heterogeneous isotope exchange of Au atoms at the Au electrode|dicyanoaurate solution interface (Poškus, Agafonovas) **457**, 171
Dicyclohexylcarbodiimide
Immobilisation at an electrode surface of calix[4]arenes bearing electropolymerisable pyrrole moieties at the upper rim (Buffenoir et al.) **451**, 261
1,2-Dicyclohexylethene-1,2-diol dicyclohexanoate
Catalytic reduction of cyclohexanecarbonyl chloride with electrogenerated nickel(I) salen in acetonitrile (Bhattacharya et al.) **441**, 103
Dielectric constant
High frequency dielectric studies of hydrated Nafion® (Paddison et al.) **459**, 91
Difference frequency generation
Vibrational spectroscopic study of the adsorption of pyridine at the Au(111)-electrolyte interface by in situ difference frequency generation (Hébert et al.) **447**, 5

Differential cyclic voltabsorptometry
Spectroelectrochemical approaches to heterogeneous electron transfer reactions at the polarised water | 1,2-dichloroethane interfaces (Ding et al.) **458**, 139
Spectroelectrochemical study of the copper(II) transfer assisted by 6,7-dimethyl-2,3-di(2-pyridyl)quinoxaline at the water|1,2-dichloroethane interface (Tomaszewski et al.) **453**, 171
Differential pulse polarography
Inosine reduction study at low pH by a combination of electrochemical methods (Havran et al.) **454**, 65
Voltammetry of metal ions in mixtures of ligands. Part III: Application to systems including inert complexes (Berbel et al.) **453**, 151
Digital simulation
Contribution to the study of square wave voltammetry in the case of simple irreversible reactions (Fatouros, Krulic) **443**, 262
Digital simulation of the growth of a hemispherical nucleus by diffusion limited aggregation (Heerman, Tarallo) **455**, 265
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 1. Gaining more insight into the behaviour of kinetic models (Bieniasz, Speiser) **441**, 271
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 2. Model expansion and model reduction (Bieniasz et al.) **447**, 173
Dihydronicotinamide adenine dinucleotide
Electrochemical oxidation of NADH on sol–gel derived, surface renewable, non-modified and mediator modified composite-carbon electrodes (Sampath, Lev) **446**, 57
Di-imines
A voltammetric investigation of the reactions between surface-confined amines and quinones on gold electrodes: evidence for imine formation (He et al.) **458**, 7
Diketone
Electrochemical reduction of *O*-acylated aldehyde cyanohydrins (Zheng, Lund) **441**, 221
Dimers
Ultrasound-assisted anodic oxidation of diuron (Macounova et al.) **457**, 141
N,N-Dimethylaniline
Electrochemical thermospray mass spectrometry—anodic oxidation of *N,N*-dialkylanilines (Hambitzer et al.) **447**, 117
Dimethyl sulfoxide
A mathematical model for anodic oxygen-transfer reactions at Bi(V)-doped PbO_2-film electrodes (Popović et al.) **456**, 203
Electrochemical reduction of acids in dimethyl sulfoxide. Comparison of weak C–H, N–H and O–H acids (Treimer, Evans) **455**, 19
Dimethyl sulphoxide
The electrochemical behavior of tetrachlorobenzoquinone in dimethyl sulphoxide at low temperature (Diao, Zhang) **457**, 247
Dimethylformamide
Polysulfides in dimethylformamide: only the redox couples S_n^-/S_n^{2-} are involved (Levillain et al.) **440**, 243
Study on electroreduction of Eu(III) and electrodeposition of Eu–Co in europium toluenesulfonate + DMF (Yang et al.) **456**, 223
2,4-Dinitrofluorobenzene
Nucleophilic substitution reaction of 2,4-dinitrofluorobenzene with hydroxide ions at the polarized nitrobenzene|water interface (Kong, Kakiuchi) **446**, 19
Dinuclear complexes
Oxalate-bridged dinuclear nickel azacyclam macrocyclic complexes: synthesis and electrochemical study (Taraszewska et al.) **452**, 49
Dioxygen
Electrocatalytic dioxygen reduction in the presence of a rhodoxime (Tavagnacco et al.) **448**, 41
Dioxygen-decomposition
Dioxygen-decomposition of ferrocenium molecules in acetonitrile: The nature of the electrode-fouling films during ferrocene electrochemistry (Zotti et al.) **456**, 217
Dioxygen electroreduction
A UV-visible study of the electropolymerization of CoTAPP at vitreous carbon and investigation of its catalytic activity towards the electroreduction of dioxygen (El Mouahid et al.) **455**, 209
Dipyrrolyl monomers
Anodic oxidation of dipyrrolyls linked with flexible or rigid spacers: study of the electropolymerization mode (Chane-Ching et al.) **453**, 139
Direct electrochemistry
The direct electrochemistry of *N*-acetyl-microperoxidase-8 in aqueous and dimethyl sulfoxide solution (Ci Li, Mabrouk) **455**, 45
Direct electron transfer
Kinetic analysis of electron transfer from a graphite coating to horseradish peroxidase (Tatsuma et al.) **446**, 205
Disc electrode
Analytical solution for the steady-state diffusion towards an inlaid disc microelectrode in a multi-layered medium (Galceran et al.) **440**, 1
Dislocations
Application of positron lifetime spectroscopy to the study of electrodeposited chromium layers (Süvegh et al.) **455**, 69
Disproportionation reaction
Electrochemical studies of tricyclopentadienyl uranium IV chloride complexes: $(RCp)_3UCl$ ($RCp = RC_5H_4$ with R = H; Me: CH_3; tBu: $(CH_3)_3C$); TMS: $(CH_3)_3Si$). Evidence of a disproportionation mechanism in oxidation (Clappe et al.) **448**, 95
Dissociative electron attachment
Dissociative electron transfer to polyhalogen methanes CY_3X (Y = H, F, Cl and Br; X = Cl and Br) in solvent: a semiempirical PM3 method study (Tikhomirov, German) **450**, 13
Dissociative electron transfer
Electrochemical reduction of acids in dimethyl sulfoxide. Comparison of weak C–H, N–H and O–H acids (Treimer, Evans) **455**, 19
Dissolution
Application of a wall jet disk electrode combined with an electrochemical quartz crystal microbalance to the study of the dissolution of copper in acidic chloride media (Itagaki et al.) **440**, 139
Dissolution of partially immersed nickel during in situ oxidation in molten carbonate: cyclic, stripping and square wave voltammetry measurements (Yazici, Selman) **457**, 89
Mechanism of solid|liquid interfacial reactions. The reactive dissolution of p-chloranil in aqueous solution as studied by the channel flow cell with electrochemical detection and atomic force microscopy (Booth et al.) **440**, 83
Distribution functions
A primitive model for hexamethylpararosaniline (crystal violet) monomolecular adlayer: a Monte Carlo simulation study (Batina et al.) **450**, 213
Dithizone
Electrochemistry of ITO and gold electrodes covalently modified with dithizone and the effect of Cu(II) and Pb(II) ions (Mirkhalaf et al.) **452**, 203
Diuron
Ultrasound-assisted anodic oxidation of diuron (Macounova et al.) **457**, 141
Diffuse layer effect
Diffuse layer effect and effect of curvature on the mechanism and the properties of phase transitions at electrified interfaces (Nikitas) **446**, 165
Diffusion
Moving front phenomena in the switching of conductive polymers (Lacroix et al.) **444**, 83

Theoretical model of radionuclide extraction from soils by the mechanism of ionic electromigration (Kharkats) **450**, 27
Transport and equilibrium properties of Nafion® membranes with H^+ and Na^+ ions (Okada et al.) **442**, 137
Diffusion-adsorption
Electrochemical behaviour of a metallothionein related peptide in the presence of cadmium using cyclic voltammetry (Harlyk et al.) **446**, 139
Diffusion coefficient
A novel electrochemical method for simultaneously measuring diffusion coefficient and ion transference number (Zhou et al.) **443**, 1
A study on the diffusion of quinhydrone in polymer electrolyte (Dong et al.) **441**, 95
Study on electroreduction of Eu(III) and electrodeposition of Eu–Co in europium toluenesulfonate + DMF (Yang et al.) **456**, 223
The electrode reactions of $Fe(CN)_6^{3-}$ and $Fe(CN)_6^{4-}$ ions studied at temperatures below the melting point of stoichiometric electrolytes (Opallo) **444**, 187
Diffusion coefficients
New methods for the accurate determination of extinction and diffusion coefficients of aromatic and heteroaromatic radical anions in *N*,*N*-dimethylformamide (Pedersen et al.) **454**, 123
Studies of ferrocene derivative diffusion and heterogeneous kinetics in polymer electrolyte by using microelectrode voltammetry (Zhou et al.) **441**, 153
Diffusion control
Electrochemical nucleation on active sites—what do we measure in reality? Part II (Milchev) **457**, 47
Diffusion controlled processes
A computer simulation model for the diffusion controlled nucleation and growth processes on electrode surfaces—a two-dimensional study (Vilaseca et al.) **458**, 55
Diffusion impedance
Impedance of constant phase element (CPE)-blocked diffusion in film electrodes (Bisquert et al.) **452**, 229
Diffusion layer
Kinetics of electroreduction of tris–oxalate cobalt(III) complexes on the dropping mercury electrode (Kondratiev et al.) **450**, 109
Diffusion limited aggregation
Digital simulation of the growth of a hemispherical nucleus by diffusion limited aggregation (Heerman, Tarallo) **455**, 265
Diffusion-migration impedances
A study of the electrical properties of permselective membranes with symmetric, reversible interfacial processes using the network method (Moya, Horno) **459**, 145
DNA
Carbon fiber microelectrodes for adsorptive stripping analysis of trace nucleic acids (Wang et al.) **441**, 167
Electrocatalytic effects of deoxyribonucleic acids, adenine and guanine on the reduction of Ni(II) at a mercury electrode (Muñiz Alvarez et al.) **457**, 53
DNA base
In-situ infrared spectroscopic studies of thymine adsorption on a Au(111) electrode (Haiss et al.) **454**, 107
Dopant anions
An electrochemical impedance and spectroelectrochemical study of the polypyrrole–flavin composite electrode (Bonazzola, Calvo) **449**, 111
Doped lead dioxide
Lead dioxide electrodeposition and its application: influence of fluoride and iron ions (Velichenko et al.) **454**, 203
Doping
Characterization of polymeric films derived from α- and β-substituted *N*-vinylpyrroles (DuBois Jr, McCarley) **454**, 99
Manganese-doped fullerene film electrodes (Szücs et al.) **442**, 59
Doping/dedoping
In situ study of polypyrrole morphology by STM: effect of the doping state (Chaînet, Billon) **451**, 273
Double layer
Characterisation of Au(111) and Au(210) | aqueous solution interfaces by electrochemical immittance spectroscopy (Sadkowski et al.) **455**, 107
Kinetics of electroreduction of tris–oxalate cobalt(III) complexes on the dropping mercury electrode (Kondratiev et al.) **450**, 109
On the electrical capacitance of interfaces exhibiting constant phase element behaviour (Zoltowski) **443**, 149
The role of metal and solvent in the structure of the electrode|surface-inactive electrolyte solution interface (Bagotskaya et al.) **448**, 229
XPS investigations of the electrochemical double layer on silver in alkaline chloride solutions (Hecht, Strehblow) **440**, 211
Double-pulse techniques
Analysis of the double pulse response for the following chemical reaction in the EC mechanism (Galvez) **452**, 19
Zeroth-order solution and higher-order corrections for the CE mechanism in double potential step techniques (Galvez) **441**, 259
Drugs
Inclusion of the parent molecules of some drugs with β-cyclodextrin studied by electrochemical and spectrometric methods (Dang et al.) **448**, 61
DSC
Electrochemical study of iron ferrite sludge obtained under the conditions proposed for the purification of waste water at a carbon paste electrode (Barrado et al.) **441**, 227
Dual-disk microelectrode
In situ study of the conductivity of the electrochemically deposited polyaniline film using a dual-disk microelectrode (Zhang et al.) **440**, 35
Dual integral equation
Analytical solution for the steady-state diffusion towards an inlaid disc microelectrode in a multi-layered medium (Galceran et al.) **440**, 1

E-pO^{2-} diagrams
A chemical and electrochemical study of titanium ions in the molten equimolar $CaCl_2$ + NaCl mixture at 550°C. (Martínez et al.) **449**, 67
EC mechanism
Analysis of the double pulse response for the following chemical reaction in the EC mechanism (Galvez) **452**, 19
ECSTM and EQCM
Electrochemical scanning tunneling microscopy and electrochemical quartz crystal microbalance study of the adsorption of phenanthraquinone accompanied by an electrochemical redox reaction on the Au electrode (He et al.) **440**, 65
Effect of temperature
Electrochemical reduction of CO_2 on Au in KOH + methanol at low temperature (Kaneco et al.) **441**, 215
Effective diffusion coefficient
Voltammetry of phosphotungstic acid immobilized in templated silica gel (Holmstrom et al.) **456**, 239
EIS
Specificity of the kinetics of H_2 evolution to the structure of single-crystal Pt surfaces, and the relation between opd and upd H (Barber et al.) **446**, 125
Electric conduction
Electrochemical gelation of poly(3-hexylthiophene) film (Li, Aoki) **453**, 107
Electric double layer
Mechanisms behind concentration profiles illustrated by charge and concentration distributions around ions in double layers (Kjellander, Greberg) **450**, 233

Electric-field enhanced water dissociation
Electric field enhanced water dissociation at the bipolar membrane junction from ac impedance spectra meaurements (Holdik et al.) **442**, 13
Electric percolation threshold
A fractal feature of the conducting zone by conversion rates from any redox state into the fully conducting state of polyaniline films (Aoki, Teragishi) **441**, 25
Electric potential
Kinetics of electroreduction of tris–oxalate cobalt(III) complexes on the dropping mercury electrode (Kondratiev et al.) **450**, 109
Electrical capacitance of interface
On the electrical capacitance of interfaces exhibiting constant phase element behaviour (Zoltowski) **443**, 149
Electrified interface
Diffuse layer effect and effect of curvature on the mechanism and the properties of phase transitions at electrified interfaces (Nikitas) **446**, 165
Electroabsorption
XPS investigations of the electrochemical double layer on silver in alkaline chloride solutions (Hecht, Strehblow) **440**, 211
Electroactive compounds
Investigation of the mass transport of electroactive compounds in an SPE membrane used for electro-organic synthesis (Jiang et al.) **446**, 159
Electroactive species
Electrochemical modification of a carbon electrode using aromatic diazonium salts. 2. Electrochemistry of 4-nitrophenyl modified glassy carbon electrodes in aqueous media (Ortiz et al.) **455**, 75
Electroadsorption
A DEMS study of the electroreduction and oxidation of 3-buten-2-one and 2-butanone adsorbates on platinum in sulphuric solutions (Zinola et al.) **454**, 161
Electroanalysis
Electrocatalytic effects of deoxyribonucleic acids, adenine and guanine on the reduction of Ni(II) at a mercury electrode (Muñiz Alvarez et al.) **457**, 53
Electrocatalysis
A mathematical model for anodic oxygen-transfer reactions at Bi(V)-doped PbO_2-film electrodes (Popović et al.) **456**, 203
Electrocatalytic effects of deoxyribonucleic acids, adenine and guanine on the reduction of Ni(II) at a mercury electrode (Muñiz Alvarez et al.) **457**, 53
Electrochemical characterization of inorganic | organic hybrid films prepared from ferrocene modified silanes (Wang, Collinson) **455**, 127
Electrochemical deposition and properties of $PbO_2 + Co_3O_4$ composites (Musiani et al.) **440**, 131
Electrochemical regeneration of coenzyme NADH on a histidine modified silver electrode (Long, Chen) **440**, 239
Effect of inorganic cations on the electroreduction of nitrate anions on Pt|Pt electrodes in sulfuric acid solutions (Safonova, Petrii) **448**, 211
Effect of particle size on the electrocatalysis by carbon-supported Pt electrocatalysts: an in situ XAS investigation (Mukerjee, McBreen) **448**, 163
Effects of ligand structure on the adsorption of nickel tetraazamacrocyclic complexes and electrocatalytic CO_2 reduction (Bujno et al.) **445**, 47
Large signal (global) analysis of non-linear response of electrocatalytic reaction. I. Multiple steady states (Sadkowski) **447**, 97
Multicomponent hydrous oxide films grown on gold in acid solution (Burke, Nugent) **444**, 19
Preparation, characterization and application of an electrode modified with electropolymerized $CuPtCl_6$ (Pei, Li) **441**, 245
Redox and electrocatalytic properties of electrodes modified by films of polypyrrole nickel(II) Schiff-base complexes (Losada et al.) **447**, 147
Selective electrocatalysis of alkene oxidations in aqueous media. Electrochemical and spectral characterization of oxo-ferryl porphyrin, oxo-ferryl porphyrin radical cation and their reaction products with alkenes at room temperature (Liu, Su) **452**, 113
Spectroelectrochemical studies of tetrasulfonated metallophthalocyanines adsorbed on the basal plane of graphite in the presence of cysteine (Lezna et al.) **452**, 221
Electrocatalyst
Electrochemical behavior of nanocrystalline Ti_2RuFe alloy prepared by high energy ball-milling (Roué et al.) **455**, 83
Electrocatalytic
Bicatalyst electrocatalytic reduction and oxidation of nitrite by Fe(II) and Cu(II) complexes in the same solution (Chen) **457**, 23
Electrocatalytic activity
Hydrogen evolution reaction on smooth $Ni(1-x) + Mo(x)$ alloys $(0 \leq x \leq 0.25)$ (Gennero de Chialvo, Chialvo) **448**, 87
Electrocatalytic effect
Enhanced rate of the redox reaction of indigodisulfonate at electrodes coated with poly[1-methyl-3-(pyrrol-1-ylmethyl)pyridinium]chloride films (Komura et al.) **454**, 145
Electrocatalytic oxidation
Electrocatalytic oxidation of hydrazines at a 4-pyridyl hydroquinone self-assembled platinum electrode and its application to amperometric detection in capillary electrophoresis (Niu et al.) **448**, 79
Mechanistic and fuel-cell implications of a tristable response in the electrochemical oxidation of methanol (Schell) **457**, 221
Monomolecular films of a nickel(II) pentaazamacrocyclic complex for the electrocatalytic oxidation of hydrogen peroxide at gold electrodes (Gobi et al.) **444**, 145
Voltammetric behaviour and electrocatalytic activity of the aluminum electrode modified with nickel and nickel hexacyanoferrate films, prepared by electroless deposition (Pournaghi-Azar, Razmi-Nerbin) **456**, 83
Electrocatalytic reduction
A kinetic model for the reduction of enzyme-generated H_2O_2 at a metal-dispersed conducting polymer film (Somasundrum et al.) **440**, 259
Electrochemical and electrocatalytic properties of iridium(IV)-substituted Dawson type polyoxotungstate (Sun et al.) **451**, 49
Mechanism of the electrochemical reduction of benzyl chlorides catalysed by Co(salen) (Isse et al.) **444**, 241
The effect of weak Brönsted acids on the electrocatalytic reduction of carbon dioxide by a rhenium tricarbonyl bipyridyl complex (Wong et al.) **453**, 161
Electrochemical
Electrochemical, spectroscopic and structural investigations of the Cd|Cd(II) system in alkaline media. I. Cation effects (Simic, Ahlberg) **451**, 237
Electrochemical behavior
Thermodynamic and electrochemical behavior of nickel in molten Li_2CO_3–Na_2CO_3 modified by addition of calcium carbonate (Cassir et al.) **452**, 127
Electrochemical behaviour
Electrode processes of chloramines in aqueous solutions (Wrona) **453**, 197
Osmium complexes bearing functional groups: building blocks for integrated chemical systems (Danilowicz et al.) **445**, 89
Electrochemical catalysis
Electron transfer and electrochemical catalysis using cobalt-reconstituted myoglobin in a surfactant film (Gao, Rusling) **449**, 1
Electrochemical cell
On the theoretical aspects of thermal effects in electrochemical cells (Kharkats et al.) **450**, 37

Oscillatory convective instability in electrochemical systems (Grigin, Davydov) **450**, 7
Electrochemical characterisation
Electrochemical characterization of polyethylene glycols as solid polymer electrolytes (Cha, Park) **459**, 135
Electrochemical cleavage
What anodic and chemical stability for 2-thienyl carbinol ethers? Polymerization and/or cleavage? (Marrec, Simonet) **459**, 35
Electrochemical control techniques
An exponentially expanding mesh ideally suited to the fast and efficient simulation of diffusion processes at microdisc electrodes. 1. Derivation of the mesh (Gavaghan) **456**, 1
Electrochemical coupling
Increase of conjugation length within SAMs of terthiophene-derivatives, through electrochemical intermolecular coupling (Michalitsch et al.) **457**, 129
Electrochemical desorption
Voltammetry of defect sites at a self-assembled monolayer on a gold surface (Che et al.) **453**, 9
Electrochemical doping
Electrochemically pH-controllable 3-substituted polythiophene films (Li, Aoki) **458**, 155
Electrochemical double layer
Computer simulation of the structure of the electrochemical double layer (Spohr) **450**, 327
Electrochemical immittance
Characterisation of Au(111) and Au(210) | aqueous solution interfaces by electrochemical immittance spectroscopy (Sadkowski et al.) **455**, 107
Electrochemical impedance
Dependence of redox-kinetic parameters at poly(*o*-phenylenediamine)-modified electrodes upon the oxidation and protonation levels of the polymer (Komura et al.) **446**, 113
Electrochemical impedance of multistep mechanisms: a general theory (Harrington) **449**, 9
Electrochemical impedance spectroscopy
An electrochemical impedance and spectroelectrochemical study of the polypyrrole–flavin composite electrode (Bonazzola, Calvo) **449**, 111
Electrostatic interactions at self assembled molecular films of charged thiols on gold (Molinero, Calvo) **445**, 17
Electrochemical impedence in spectroscopy
The influence of porosity and the nature of the charge storage capacitance on the impedance behaviour of electropolymerized polyaniline films (Roßberg et al.) **443**, 49
Electrochemical interface
Determination of emersed electrochemical interface thickness by ellipsometry: Aqueous electrolytes on Ag (Woelfel, Pemberton) **456**, 161
Vibrational spectroscopic study of the adsorption of pyridine at the Au(111)-electrolyte interface by in situ difference frequency generation (Hébert et al.) **447**, 5
Electrochemical kinetics
State variable approach to electrochemical dynamics (Sadkowski) **454**, 39
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 2. Model expansion and model reduction (Bieniasz et al.) **447**, 173
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 1. Gaining more insight into the behaviour of kinetic models (Bieniasz, Speiser) **441**, 271
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 3. Statistical error/uncertainty propagation in simulation and in nonlinear least-squares parameter estimation (Bieniasz, Speiser) **458**, 209
Electrochemical mass spectrometry
A DEMS study of the electroreduction and oxidation of 3-buten-2-one and 2-butanone adsorbates on platinum in sulphuric solutions (Zinola et al.) **454**, 161
Electrochemical methods
A voltammetric and FTIR–ATR study of the electropolymerization of phenol on platinum electrodes in carbonate medium. Influence of sulfide (Lapuente et al.) **451**, 163
Electrochemical nucleation
Electrochemical nucleation on active sites—what do we measure in reality? Part I. (Milchev) **457**, 35
Spatial distribution of electrochemically deposited clusters: a simulation study (Tsakova, Milchev) **451**, 211
Electrochemical oxidation
Electrochemical oxidation of cyclic polysilanes under 'oxygen-free' and 'water-free' conditions (Zhang et al.) **455**, 197
Electrochemical polymerisation
Electrochemical preparation and characterization in non-aqueous electrolyte of polyaniline electrochemically prepared from an anilinium salt (Naudin et al.) **459**, 1
Electrochemical polymerization
Interconversion of polarons and bipolarons of polyaniline during the electrochemical polymerization of aniline (Mu et al.) **446**, 107
Low potential electrochemical polymerization of benzene in a composite electrolyte of boron trifluoride diethyl etherate and trifluoroacetic acid (Li et al.) **455**, 1
The electrochemistry of fluorine-substituted polyphenylthiophenes for charge storage applications (Gofer et al.) **443**, 103
Electrochemical properties
Electrochemical mimicking of reduced rubredoxin by iron(II) complexes of cysteine peptide thiolate in aqueous micelle solution (Sun et al.) **448**, 105
Electrochemical quartz crystal microbalance
A combined electrochemical quartz crystal microbalance (EQCM) and probe beam deflection (PBD) study of a poly(*o*-toluidine) modified electrode in perchloric acid solution (Henderson et al.) **454**, 1
Clay-modified electrodes as studied by the quartz crystal microbalance: redox processes of ruthenium and iron complexes (Yao et al.) **443**, 253
Combined electrochemical quartz crystal microbalance (EQCM) and probe beam deflection (PBD): validation of the technique by a study of silver ion mass transport (Henderson et al.) **458**, 241
Electrochemical quartz crystal microbalance investigation of surface fouling due to phenol oxidation (Wang et al.) **444**, 127
Electrochemical quartz crystal microbalance study of copper adatoms on Au(111) electrodes in solutions of perchloric and sulfuric acid (Uchida et al.) **452**, 97
Effect of time scale on redox-driven ion and solvent transfers at nickel hydroxide films in aqueous lithium hydroxide solutions (Gonsalves, Hillman) **454**, 183
Polypyrrole as a model membrane for drug delivery (Kontturi et al.) **453**, 231
Electrochemical rate constant
The electrocatalytic activity of Prussian blue in hydrogen peroxide reduction studied using a wall-jet electrode with continuous flow (Karyakin et al.) **456**, 97
Electrochemical redox reaction
Electrochemical switching of fluorescence emission between red and blue from complexed europium ions in poly(ethylene oxide) (Mukaigawa, Ohno) **452**, 141
Electrochemical reduction
Comproportionation and disproportionation reactions in the electrochemical reduction of nitroprusside at a hanging mercury drop electrode in acidic solution (Carapuça et al.) **455**, 93
Electrocatalytic reduction of NO on metal electrodes and gas diffusion electrodes in an aqueous electrolyte (Hara et al.) **451**, 181

Electrochemical reduction of 2-bromothiazole at carbon cathodes in acetonitrile (Ji, Peters) **455**, 147
Electrochemical reduction of *O*-acylated aldehyde cyanohydrins (Zheng, Lund) **441**, 221
Electrochemical reduction of copper(II) salen at carbon cathodes in dimethylformamide (Samide, Peters) **443**, 95
Electrochemical reduction of CO_2 on Au in KOH + methanol at low temperature (Kaneco et al.) **441**, 215
Electrochemical reduction of metamitron (Ludvík et al.) **457**, 177
Electrochemical reduction of substituted cobalt phthalocyanines adsorbed on graphite (Schlettwein, Yoshida) **441**, 139
Electrochemical reduction of the synthetic pyrethroid insecticides tralomethrin and tralocythrin at glassy carbon and mercury electrodes (Coomber et al.) **452**, 5
Impedance study of the electrochemical reduction of adrenochrome on glassy carbon (Zhang et al.) **444**, 169
Ion pair formation between the electrogenerated 2,3-dichloro-5,6-dicyoano-1,4-benzoquinone dianion and the sodium ion at platinum surfaces (Oyamo et al.) **451**, 193

Electrochemical simulations
The electrochemical oxidation of cobalt tris(dithiocarbamates) and tris(diselenocarbamates) in acetonitrile; a combined spectroscopic and voltammetric study (Alden et al.) **447**, 155

Electrochemical STM
Electrochemical STM observation of $[Fe(CN)_6]^{3-}$ ions adsorbed on a hydrotalcite crystal surface (Yao et al.) **458**, 249

Electrochemical switching
Apparent negative activation energy in electrochemical insulating-to-conducting conversion at polymethylthiophene films (Aoki, Li) **441**, 161

Electrochemical treatment
Electrochemical properties of cation sensitive polypyrrole films (Tamm et al.) **448**, 25

Electrochemically modulated liquid chromatography
Electrochemically modulated liquid chromatography (EMLC) as a probe of the adsorption characteristics of monosubstituted benzenes at porous graphitic carbon (Ting, Porter) **443**, 180

Electrochemically synthesized polyaniline films
A fractal feature of the conducting zone by conversion rates from any redox state into the fully conducting state of polyaniline films (Aoki, Teragishi) **441**, 25

Electrochemiluminescence
Electrochemically oxidized ferrocenes as catalysts for the chemiluminescence oxidation of luminol (Wilson, Schiffrin) **448**, 125

Electrochemistry
An electrochemical and spectroelectrochemical (IR) investigation of the reduction of RCo(II)TPP (R = benzyl or butyl; TPP = tetraphenylporphyrin): mechanistic implications in the CoTPP catalyzed electrocarboxylation of alkyl halides (Zheng et al.) **453**, 79
Electrocatalytic dioxygen reduction in the presence of a rhodoxime (Tavagnacco et al.) **448**, 41
Electrochemistry of C_{70} fullerene films in aqueous solutions (Csiszár et al.) **441**, 287
Protein electrochemistry at carbon nanotube electrodes (Davis et al.) **440**, 279
The direct electrochemistry of cytochrome *c* at a hanging mercury drop electrode modified with 6-mercaptopurine (Sevilla et al.) **451**, 89
The electrochemical behavior of tetrachlorobenzoquinone in dimethyl sulphoxide at low temperature (Diao, Zhang) **457**, 247
Voltammetry of phosphotungstic acid immobilized in templated silica gel (Holmstrom et al.) **456**, 239

Electrochemistry 'in situ'
Self-assembled monolayers with biospecific affinity for NAD(H)-dependent dehydrogenases: characterization by surface plasmon resonance combined with electrochemistry 'in situ' (Schlereth, Kooyman) **444**, 231

Electrochromic devices
Impedance of constant phase element (CPE)-blocked diffusion in film electrodes (Bisquert et al.) **452**, 229

Electrochromism
Electrochromism of annealed vacuum-evaporated V_2O_5 films (Guan et al.) **443**, 175
Influence of dopant, pH and potential on the spectral changes of poly(*o*-methoxyaniline): relationship with the redox processes (Gazotti Jr. et al.) **440**, 193

Electrocrystallization
Spatial distribution of nuclei. Inhibition of local nucleation rates by the most influential neighbours (García-Pastoriza et al.) **441**, 13

Electrode
The mechanism of surface modification of a MCFC anode (Fang et al.) **441**, 65

Electrode–electrolyte interface
A theory for electron transfer between an electrode and a multilevel acceptor/donor species in an electrolyte solution (Boroda, Voth) **450**, 95
First-principles simulations of the electrode|electrolyte interface (Halley et al.) **450**, 273
The role of metal and solvent in the structure of the electrode|surface-inactive electrolyte solution interface (Bagotskaya et al.) **448**, 229

Electrode-fouling films
Dioxygen-decomposition of ferrocenium molecules in acetonitrile: The nature of the electrode-fouling films during ferrocene electrochemistry (Zotti et al.) **456**, 217

Electrode geometries
An exponentially expanding mesh ideally suited to the fast and efficient simulation of diffusion processes at microdisc electrodes. 1. Derivation of the mesh (Gavaghan) **456**, 1

Electrode illumination
Anodic electrosynthesis of Cu_2S and $CuInS_2$ films (Schimmel et al.) **453**, 187

Electrode kinetics
A kinetic and in situ infrared spectroscopic study of the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ couple on platinum single crystal electrodes (Kitamura et al.) **456**, 113
Specificity of the kinetics of H_2 evolution to the structure of single-crystal Pt surfaces, and the relation between opd and upd H (Barber et al.) **446**, 125

Electrode potential
Incorporation and expulsion of electrolyte species by tungsten trioxide-, WO_3 | Polyaniline-, and WO_3 | PAn | polyvinylsulfate-confined electrodes during potential cycling (Ogura et al.) **451**, 219

Electrode processes
Molecular simulation of oxygen on supported platinum clusters (Wu, Chan) **450**, 225

Electrode reaction
Electrochemical reactions with adsorption of the reactants and electrosorption. Simple analytical solutions for a Henry isotherm (Laviron, Roullier) **443**, 195
Kinetics of electrochemical processes in the system: silver/cyanide solutions (Bek, Rogozhnikov) **447**, 109

Electrode reaction mechanism
Inosine reduction study at low pH by a combination of electrochemical methods (Havran et al.) **454**, 65

Electrode reactions
A theory for amalgam forming electrode reactions (Koper, Schmickler) **450**, 83

Electrode surface
Electrochemical nucleation on active sites—what do we measure in reality? Part I. (Milchev) **457**, 35

Electrodeposition
A computer simulation model for the diffusion controlled nucleation and growth processes on electrode surfaces—a two-dimensional study (Vilaseca et al.) **458**, 55

An in situ UV–vis and IR spectroelectrochemical study of the disposition of a hydroquinone anion salt on platinum electrodes from dichloromethane solutions (Babaei, McQuillan) **441**, 197
Application of positron lifetime spectroscopy to the study of electrodeposited chromium layers (Süvegh et al.) **455**, 69
Diffusion controlled growth of hemispheres in ordered arrays (Scharifker) **458**, 253
Electrochemical characterisation of a semiconductor–metal junction: n-type InP|Cu; influence of the structure of the metallic layer (Moulayat et al.) **453**, 129
Electrochemical deposition and properties of $PbO_2 + Co_3O_4$ composites (Musiani et al.) **440**, 131
Electrochemical deposition of iridium(IV) oxide from alkaline solutions of iridium(III) oxide (Baur, Spaine) **443**, 208
Electrochemically deposited thin films of amorphous Fe–P alloy .Part I. Chemical composition and phase structure characterization (Zečević et al.) **448**, 245
Electrosynthesis of indium sulfide on sulfur-modified polycrystalline gold electrodes (de Tacconi, Rajeshwar) **444**, 7
Identification of different silver nucleation processes on vitreous carbon surfaces from ammonia electrolytic bath (Miranda-Hernández et al.) **443**, 81
Impedance analysis of electrodeposited insulating polypyrrole (Komaba, Osaka) **453**, 19
Lead dioxide electrodeposition and its application: influence of fluoride and iron ions (Velichenko et al.) **454**, 203
Mechanistic studies of electrodeposition for bioceramic coatings of calcium phosphates by an in situ pH-microsensor technique (Zhang et al.) **452**, 235
New electroactive metal oxides electrodeposited from selected Keggin and Dawson-type heteropolyanions (Keita et al.) **443**, 168
Non-steady-state electrochemical nucleation under potentiostatic conditions (Isaev) **453**, 25
Qualitative and quantitative assessment of phases in electrodeposited Ni + Cd alloys by the ALSV technique (Jović, Tošić) **441**, 69
Surface modification of a MCFC anode by electrodeposition of niobium (Baizeng et al.) **441**, 1
The influence of heterocyclic thiols on the electrodeposition of Cu on Au(111) (Whelan et al.) **441**, 109
The mechanism of surface modification of a MCFC anode (Fang et al.) **441**, 65

Electrodeposition of Eu–Co
Study on electroreduction of Eu(III) and electrodeposition of Eu–Co in europium toluenesulfonate + DMF (Yang et al.) **456**, 223

Electrodes
Electrooxidation of ethylene glycol on a platinum doped polyaniline electrode (Ficicioglu, Kadirgan) **451**, 95
Effect of surface order on adsorption of sulfate ions on silver electrodes (Smoliński et al.) **442**, 41

Electro-dimerization mechanism
Impedance voltammetry of electro-dimerization mechanisms: application to the reduction of the methyl viologen di-cation at mercury electrodes and aqueous solutions (Rueda et al.) **443**, 227

Electrohydrodimerisation
The electrochemical reduction of dimethyl maleate and dimethyl fumarate (Doherty, Scott) **442**, 35
A comparative kinetic investigation of ethylcinnamate electrohydrodimerization on mercury and liquid gallium (Pezzatini et al.) **444**, 261

Electrolysis
Electro-oxidation of ethanol on gold: analysis of the reaction products and mechanism (Tremiliosi-Filho et al.) **444**, 31

Electrolyte
Mechanisms behind concentration profiles illustrated by charge and concentration distributions around ions in double layers (Kjellander, Greberg) **450**, 233

Electrolyte/analyte ratio
About potential measurements in steady state voltammetry at low electrolyte/analyte concentration ratios (Bento et al.) **443**, 137

Electrolyte electroreflectance
The scanning microscope for semiconductor characterization (SMSC): electrolyte electroreflectance and photovoltage imaging study of the electrochemical activation of RuS_2 photoelectrodes for oxygen evolution (Turrión et al.) **458**, 99

Electrolyte ions
In situ IR spectroscopic study of water at a polycrystalline gold electrode surface (Kitamura et al.) **452**, 241

Electrolyte solution/liquid mercury interface
MD studies of electrolyte solution|liquid mercury interfaces (Bopp, Heinzinger) **450**, 165

Electrolyte solutions
Critical comparison among equations derived from the Falkenhagen model to fit conductimetric data of concentrated electrolyte solutions (de Diego et al.) **446**, 177

Electrolytic hydrogenation
The kinetic study on the electrolytic hydrogenation of nitrobenzene on the hydrogen-storage alloy electrode (Lu et al.) **457**, 149

Electrolytic reduction
Formation of nickel hydrides by hydrogen evolution in alkaline media: effect of temperature (Bernardini et al.) **457**, 205
Formation of nickel hydrides by hydrogen evolution in alkaline media (Bernardini et al.) **442**, 125

Electron mediator
C_{60}-mediated bioelectrocatalyzed oxidation of glucose with glucose oxidase (Patolsky et al.) **454**, 9

Electron microscopy
Electrolytic conversion of graphite to carbon nanotubes in fused salts (Chen et al.) **446**, 1

Electron transfer
Computer simulation of electron transfer processes across the electrode|electrolyte interface: a treatment of solvent and electrode polarizability (Calhoun, Voth) **450**, 253
Constructing different 'bridges' for interfacial electron transfer in azobenzene LB/SAM composite bilayers (Yu et al.) **448**, 119
Electron and proton transferring properties of vitamin K_1 across a self-assembled phospholipid monolayer (Herrero et al.) **445**, 71
Kinetics of electroreduction of tris–oxalate cobalt(III) complexes on the dropping mercury electrode (Kondratiev et al.) **450**, 109
The ac-voltammetric study of fast charge transfer processes in benzene solutions (Baranski, Winkler) **453**, 29

Electron-transfer
A theory for electron transfer between an electrode and a multilevel acceptor/donor species in an electrolyte solution (Boroda, Voth) **450**, 95

Electron transfer properties
Spectroelectrochemical and electrochemical determination of ligand binding and electron transfer properties of myoglobin, cyanomyoglobin, and imidazolemyoglobin (Cohen et al.) **447**, 53

Electron transfer rate constant
Spectroelectrochemical approaches to heterogeneous electron transfer reactions at the polarised water | 1,2-dichloroethane interfaces (Ding et al.) **458**, 139

Electron-transfer rates
Reorganization energetics for ferrocene oxidation/reduction in self-assembled monolayers on gold (Weber, Creager) **458**, 17

Electron transfer reaction
Adsorbed lumiflavin at mercury electrode surfaces (McGarvey et al.) **456**, 71

Electronic conducting polymer
In situ study of polypyrrole morphology by STM: effect of the doping state (Chaînet, Billon) **451**, 273
Electronic spectra
Osmium complexes bearing functional groups: building blocks for integrated chemical systems (Danilowicz et al.) **445**, 89
Electro-organic synthesis
Investigation of the mass transport of electroactive compounds in an SPE membrane used for electro-organic synthesis (Jiang et al.) **446**, 159
Electro-oxidation
In situ FTIRS study of the electrocatalytic oxidation of carbon monoxide and methanol at platinum–ruthenium bulk alloy electrodes (Kabbabi et al.) **444**, 41
Electrooxidation
Electrooxidation of ethylene glycol on a platinum doped polyaniline electrode (Ficicioglu, Kadirgan) **451**, 95
In situ FTIR spectroscopic studies of electrooxidation of C_4 alcohols on platinum electrodes in acid solutions .Part II. Reaction mechanism of 1,3-butanediol oxidation (Li, Sun) **448**, 5
Selective electrocatalysis of alkene oxidations in aqueous media. Electrochemical and spectral characterization of oxo-ferryl porphyrin, oxo-ferryl porphyrin radical cation and their reaction products with alkenes at room temperature (Liu, Su) **452**, 113
The impinging jet flow method in interfacial electrochemistry: an application to bead-type electrodes (Bergelin, Wasberg) **449**, 181
Electropolymerisation
Electrochemical behaviour of poly(neutral red) on an ITO electrode (Benito et al.) **446**, 47
Electrochemical quartz crystal microbalance and spectroelectrochemical studies of the influence of cations on the formation and electroactivity of poly(*N*-vinylcarbazole) films in acetonitrile solutions (Carlier et al.) **456**, 139
Electrogeneration of conducting poly(2,5-di-(-2-thienyl)-furan) (Brillas et al.) **445**, 125
Immobilisation at an electrode surface of calix[4]arenes bearing electropolymerisable pyrrole moieties at the upper rim (Buffenoir et al.) **451**, 261
Polypyrrole as a model membrane for drug delivery (Kontturi et al.) **453**, 231
Electropolymerization
β,β-Disubstituted oligothiophenes, a new oligomeric approach towards the synthesis of conducting polymers (Smie et al.) **452**, 87
A new route to electroactive poly(2,2′-bithiophene-methylene)s from the anodic oxidation of triaryl ether units (Fabre et al.) **455**, 5
Characterization of polyaniline films electrodeposited on mild steel in aqueous *p*-toluenesulfonic acid solution (Camalet et al.) **445**, 117
Coupled chemistry revisited in the tentative cathodic electropolymerization of 2-butenenitrile (Deniau et al.) **451**, 145
Electrochemically initiated polymerization of zinc(II)5-vinyl-10,15,20-triphenylporphyrin (Kuester et al.) **452**, 13
Electroreductive coating of electrodes from soluble polypyrrole-ruthenium (II) complexes: ion modulation effects on their electroactivity (Deronzier et al.) **453**, 179
Preparation, characterization and application of an electrode modified with electropolymerized $CuPtCl_6$ (Pei, Li) **441**, 245
Solvent effect on the electrografting of acrylonitrile on nickel (Mertens et al.) **441**, 237
Electropolymerized films
Redox and electrocatalytic properties of electrodes modified by films of polypyrrole nickel(II) Schiff-base complexes (Losada et al.) **447**, 147
Electroreduction
Effect of inorganic cations on the electroreduction of nitrate anions on Pt|Pt electrodes in sulfuric acid solutions (Safonova, Petrii) **448**, 211
Electroreduction of carbon dioxide
In situ infrared spectroscopic investigations on the electrochemical properties of Prussian blue–polyaniline-modified electrodes with various anionic Fe(II) complexes working as a mediator for the electroreduction of CO_2 (Nakayama et al.) **440**, 251
Electroreduction of Cd(II) complexes
The enhanced transport of the cadmium acetylacetone complex across the adsorbed aliphatic alcohol monolayer during electroreduction on mercury electrodes (Schmidt et al.) **456**, 131
Electroreduction of Eu(III)
Study on electroreduction of Eu(III) and electrodeposition of Eu–Co in europium toluenesulfonate + DMF (Yang et al.) **456**, 223
Electroreflectance spectra
Investigation of the oxidation of glassy carbon by the method of electroreflectance—relevance to activation processes (Korshin) **446**, 13
Electroreflectance spectroscopy
An electroreflectance and photoelectrochemical study of hypericin at bare and modified gold electrodes (Sagara et al.) **445**, 171
Frequency dependence of the electroreflectance signal for redox reaction of solution-phase species at the electrode surface: formulation and experimental verification (Sagara et al.) **454**, 75
Electrorheology
Effect of adsorbed water on the photoelectrorheology of TiO_2 particle suspensions (Sakai et al.) **445**, 1
Influence of the rotation rate of a rotary viscometer on the photoelectrorheological properties of TiO_2 particle suspensions (Komoda et al.) **459**, 155
Electrosorption
Discontinuous immitance due to a saddle node bifurcation .I: 1-, 2- and 3-part immitance diagrams (Berthier et al.) **458**, 231
Electrochemical reactions with adsorption of the reactants and electrosorption. Simple analytical solutions for a Henry isotherm (Laviron, Roullier) **443**, 195
Large signal (global) analysis of non-linear response of electrocatalytic reaction. I. Multiple steady states (Sadkowski) **447**, 97
Surface and interfacial behaviour of 3-acetylopyridine (Słojkowska et al.) **442**, 83
Electrosynthesis
EQCM study of the process of silicomolybdic anion doping in polyaniline films electrosynthesized in the presence of various anions (Mahmoud et al.) **446**, 211
The electrochemical reduction of dimethyl maleate and dimethyl fumarate (Doherty, Scott) **442**, 35
Elementary act
Fluctuational self-consistency of the theory of the elementary act of electrochemical reactions in the neighbourhood of the equilibrium state (Grafov et al.) **450**, 55
Elimination polarography
Inosine reduction study at low pH by a combination of electrochemical methods (Havran et al.) **454**, 65
Ellipsometry
Multi-technique study of the anodic degradation of polyaniline films (Dinh et al.) **459**, 45
Embedded atom method
Embedded atom method study of Cu deposition on Ag(111) (Del Pópolo, Leiva) **440**, 271
Encapsulation
Electrochemistry of zeolite-encapsulated complexes: new observations (Briot et al.) **454**, 83
Entropy
Electrochemical stability of redox active ions and molecules in liquid and frozen stoichiometric electrolytes (Opallo) **446**, 39
Enzyme electrode
Kinetic analysis of electron transfer from a graphite coating to horseradish peroxidase (Tatsuma et al.) **446**, 205

Enzyme kinetics
Comparison of rotating disk and wall-jet electrode systems for studying the kinetics of direct and mediated electron transfer for horseradish peroxidase on a graphite electrode (Lindgren et al.) **458**, 113
EPR
SPES, 6Li MAS NMR, and Ni^{3+} EPR evidence for the formation of Co^{2+}-containing spinel phases in $LiCoO_2$ cycled electrode materials (Alcántara et al.) **454**, 173
EPR spectroscopy
Correlation of voltammetric and spectroscopic data obtained from open- and closed-shell aromatic esters and those obtained from AM1 calculations (Webster et al.) **442**, 217
EQCM
Application of a wall jet disk electrode combined with an electrochemical quartz crystal microbalance to the study of the dissolution of copper in acidic chloride media (Itagaki et al.) **440**, 139
Electrochemical quartz crystal microbalance and spectroelectrochemical studies of the influence of cations on the formation and electroactivity of poly(*N*-vinylcarbazole) films in acetonitrile solutions (Carlier et al.) **456**, 139
Polythiophene puzzle—a plausible solution (Visy, Kankare) **442**, 175
EQCM study
EQCM study of the process of silicomolybdic anion doping in polyaniline films electrosynthesized in the presence of various anions (Mahmoud et al.) **446**, 211
Escherichia coli cells
Electrochemical monitoring of in vivo reconstitution of glucose dehydrogenase in *Escherichia coli* cells with externally added pyrroloquinoline quinone (Ikeda et al.) **449**, 219
Ethanol
Electro-oxidation of ethanol on gold: analysis of the reaction products and mechanism (Tremiliosi-Filho et al.) **444**, 31
Mediated catalytic current for the oxidation of ethanol produced by Acetobacter aceti cells suspended in solution (Ikeda et al.) **440**, 265
Ethyl formate
A preliminary study of room temperature direct ethyl formate fuel cells for consumer electronic applications (Chen, Tseung) **451**, 1
Ethylcinnamate
A comparative kinetic investigation of ethylcinnamate electrohydrodimerization on mercury and liquid gallium (Pezzatini et al.) **444**, 261
Ethylene
Adsorption configurations of ethylene and acetylene on gold (Zinola, Castro Luna) **456**, 37
N,N-Ethylmethylaniline
Electrochemical thermospray mass spectrometry—anodic oxidation of *N,N*-dialkylanilines (Hambitzer et al.) **447**, 117
Europium ion
Electrochemical switching of fluorescence emission between red and blue from complexed europium ions in poly(ethylene oxide) (Mukaigawa, Ohno) **452**, 141
Europium toluenesulfonate
Study on electroreduction of Eu(III) and electrodeposition of Eu–Co in europium toluenesulfonate + DMF (Yang et al.) **456**, 223
Evolutionary strategy
The use of genetic algorithms in the non-linear regression of immittance data (VanderNoot, Abrahams) **448**, 17
Excimer laser
Amperometric ion sensors based on laser-patterned composite polymer membranes (Lee et al.) **440**, 73
Exclusion zone
Spatial distribution of nuclei. Inhibition of local nucleation rates by the most influential neighbours (García-Pastoriza et al.) **441**, 13
Expanded clay
Characterization of organosilasesquioxane-intercalated-laponite-clay modified electrodes and (bio)electrochemical applications (Coche-Guérente et al.) **458**, 73
Experimental data
A theory for amalgam forming electrode reactions (Koper, Schmickler) **450**, 83
Exponentially expanding mesh
An exponentially expanding mesh ideally suited to the fast and efficient simulation of diffusion processes at microdisc electrodes. 2. Application to chronoamperometry (Gavaghan) **456**, 13
Ex-situ
Ex-situ study by X-ray absorption near-edge spectroscopy of the topography of complexing cavities immobilized in an electronically conducting polymer (Billon et al.) **456**, 91
External electric fields
Structure formation and dynamics of water in strong external electric fields (Sutmann) **450**, 289
External electric potential
Molecular simulation of electrolytes in nanopores (Lo et al.) **450**, 265
External redox probes
Impedance analysis of self-assembled naphthalene disulfide monolayer on gold using external redox probes (Bandyopadhyay et al.) **447**, 11
Extinction coefficients
New methods for the accurate determination of extinction and diffusion coefficients of aromatic and heteroaromatic radical anions in *N,N*-dimethylformamide (Pedersen et al.) **454**, 123

Falkenhagen model
Critical comparison among equations derived from the Falkenhagen model to fit conductimetric data of concentrated electrolyte solutions (de Diego et al.) **446**, 177
Faradaic adsorption
Origin of a sharp current peak appearing at a potential slightly more positive than 0 V versus Li | Li^+ on the cyclic voltammograms of carbonaceous materials (Takamura et al.) **455**, 223
Fe(II)
Bicatalyst electrocatalytic reduction and oxidation of nitrite by Fe(II) and Cu(II) complexes in the same solution (Chen) **457**, 23
$Fe(CN)_6^{3-}$ reduction
Coupling of the electrochemical oscillations from the cathode and anode in the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ system (Li et al.) **445**, 105
$Fe(CN)_6^{4-}$ oxidation
Coupling of the electrochemical oscillations from the cathode and anode in the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ system (Li et al.) **445**, 105
$[Fe(CN)_6]^{3-/4-}$ couple
Mass transport on an anionic clay-modified electrode as studied by a quartz crystal microbalance (Yao et al.) **457**, 119
Fe|14.8 M H_3PO_4 system
Bifurcation to limit cycle oscillations induced by the ohmic potential drop during the anodic polarisation of iron in 14.8 M H_3PO_4 (Sazou, Pagitsas) **451**, 77
Fe–Mo alloy
In situ surface Raman investigation on induced-codeposition of an Fe–Mo alloy (Niu et al.) **455**, 205
Ferrite sludge
Electrochemical study of iron ferrite sludge obtained under the conditions proposed for the purification of waste water at a carbon paste electrode (Barrado et al.) **441**, 227
Ferrocene
Electrochemical characterization of inorganic | organic hybrid films prepared from ferrocene modified silanes (Wang, Collinson) **455**, 127
Electrochemically oxidized ferrocenes as catalysts for the chemiluminescence oxidation of luminol (Wilson, Schiffrin) **448**, 125

Electrostatic interactions at self assembled molecular films of charged thiols on gold (Molinero, Calvo) **445**, 17
Novel voltammetric responses of a 1,1′-ferrocene bis(methylene aza-18-crown-6) receptor to group 1 and 2 metal cations in acetonitrile (Chen et al.) **444**, 209
Ferrocene crown ethers
Synthesis, electrochemistry and complexation studies of ferrocene crown ethers (Ion et al.) **440**, 145
Ferrocene derivatives
Studies of ferrocene derivative diffusion and heterogeneous kinetics in polymer electrolyte by using microelectrode voltammetry (Zhou et al.) **441**, 153
Ferrocene sulfonate
Electrochemical study of ferrocene and nitroxide derivatives intercalated in Zn–Cr and Zn–Al layered double hydroxides (Therias et al.) **454**, 91
Ferrocenes
A voltammetric investigation of the reactions between surface-confined amines and quinones on gold electrodes: evidence for imine formation (He et al.) **458**, 7
11-Ferrocenylundecanethiol
Effect of immobilized electron relay on the interfacial photoinduced electron transfer at a layered inorganic–organic composite film on gold (Nakanishi et al.) **455**, 229
Ferrocinium
Dioxygen-decomposition of ferrocenium molecules in acetonitrile: The nature of the electrode-fouling films during ferrocene electrochemistry (Zotti et al.) **456**, 217
FET-structure
Characterization of the ^{E}MOSFET, a novel one-electrode chemical transducer for redox measurements (Hendrikse et al.) **458**, 23
Field–dipole interacions
A molecular model for polylayer formation on electrode surfaces (Nikitas) **451**, 249
Film
Electrochemistry of C_{70} fullerene films in aqueous solutions (Csiszár et al.) **441**, 287
Film growth
Electrochemically initiated polymerization of zinc(II)5-vinyl-10,15,20-triphenylporphyrin (Kuester et al.) **452**, 13
Film-modified electrodes
In situ FTIR studies on Prussian blue (PB)-, polyaniline (PAn)- and inner PB|outer PAn film-modified electrodes (Nakayama et al.) **440**, 125
Finite element method
An accurate microdisc simulation model for recessed microdisc electrodes (Bartlett, Taylor) **453**, 49
FIRM
An exponentially expanding mesh ideally suited to the fast and efficient simulation of diffusion processes at microdisc electrodes. 3. Application to voltammetry. (Gavaghan) **456**, 25
First-principles simulation
First-principles simulations of the electrode|electrolyte interface (Halley et al.) **450**, 273
Flat-band potential
Determination of flat-band potentials of silicon electrodes in HF by means of ac resistance measurements (Ottow et al.) **455**, 29
Flatband potential
Cation effects on the anodic dissolution of n-Si in fluoride electrolytes (Belaïdi et al.) **455**, 191
Flavin
Mechanistic study of the autoxidation of reduced flavin and quinone compounds (Tatsumi et al.) **443**, 236
The surface-enhanced Raman spectroelectrochemical study on the interaction between β-cyclodextrin and the electrochemically generated radical intermediate of flavin (Wang et al.) **451**, 187
Flooded porous electrode
Linear sweep voltammetry in flooded porous electrodes at low sweep rates (Srikumar et al.) **458**, 161
Flory's theory
Electrochemical gelation of poly(3-hexylthiophene) film (Li, Aoki) **453**, 107
Flow cell
The impinging jet flow method in interfacial electrochemistry: an application to bead-type electrodes (Bergelin, Wasberg) **449**, 181
Flow-through external pressure-balanced reference electrode (FTEP-BRE)
Advanced flow-through external pressure-balanced reference electrode for potentiometric and pH studies in high temperature aqueous solutions (Lvov et al.) **443**, 186
Fluctuations
Fluctuational self-consistency of the theory of the elementary act of electrochemical reactions in the neighbourhood of the equilibrium state (Grafov et al.) **450**, 55
Fluorescence
Electrochemical switching of fluorescence emission between red and blue from complexed europium ions in poly(ethylene oxide) (Mukaigawa, Ohno) **452**, 141
Fluorescence spectroscopy
Increase of conjugation length within SAMs of terthiophene-derivatives, through electrochemical intermolecular coupling (Michalitsch et al.) **457**, 129
Fluoride electrolytes
Cation effects on the anodic dissolution of n-Si in fluoride electrolytes (Belaïdi et al.) **455**, 191
Folpet
Electroreduction of the fungicides Folpet, Captan and Captafol on mercury electrodes (Carabias-Martínez et al.) **456**, 193
Formic acid
Catalytic reduction of carbon dioxide with atomic hydrogen permeating through palladized Pd sheet electrodes (Iwakura et al.) **459**, 167
Fourier transform ac voltammetry
A unified approach to trace analysis and evaluation of electrode kinetics with fast Fourier transform electrochemical instrumentation (Schiewe et al.) **451**, 129
Fractal dimension
Electrochemical impedance spectroscopy of conductor–insulator composite electrodes: properties in the blocking and diffusive regimes (Navarro-Laboulais et al.) **444**, 173
Fractal electrodes
Characterisation of Au(111) and Au(210) | aqueous solution interfaces by electrochemical immittance spectroscopy (Sadkowski et al.) **455**, 107
Frequency
Oscillatory convective instability in electrochemical systems (Grigin, Davydov) **450**, 7
Frequency dependence
Frequency dependence of the electroreflectance signal for redox reaction of solution-phase species at the electrode surface: formulation and experimental verification (Sagara et al.) **454**, 75
Frozen electrolyte
Electrochemical stability of redox active ions and molecules in liquid and frozen stoichiometric electrolytes (Opallo) **446**, 39
The electrode reactions of $Fe(CN)_6^{3-}$ and $Fe(CN)_6^{4-}$ ions studied at temperatures below the melting point of stoichiometric electrolytes (Opallo) **444**, 187
Frumkin correction
Kinetics of electroreduction of tris–oxalate cobalt(III) complexes on the dropping mercury electrode (Kondratiev et al.) **450**, 109
Frumkin isotherm
Adsorption behaviour of insulin and soybean trypsin inhibitor at the mercury | solution interface (Vidić et al.) **452**, 151

Discontinuous immitance due to a saddle node bifurcation. I: 1-, 2- and 3-part immitance diagrams (Berthier et al.) **458**, 231
FTIR
Electrochemical gelation of poly(3-hexylthiophene) film (Li, Aoki) **453**, 107
Electrochemistry of heteropolyanions in coulombically linked self-assembled monolayers (Liu et al.) **458**, 87
FTIR spectra
Electrochemically pH-controllable 3-substituted polythiophene films (Li, Aoki) **458**, 155
FTIR spectroscopy
Electrochemical and in-situ UV-visible-near-IR and FTIR spectroelectrochemical characterisation of the mixed-valence heteropolyanion $PMo_{12}O_{40}^{n-}$ ($n = 4, 5, 6, 7$) in aprotic media (Sun et al.) **455**, 57
Electrochemical behaviour of amino acids on Pt(*hkl*). A voltammetric and in situ FTIR study. Part III. Glycine on Pt(100) and Pt(110) (Huerta et al.) **445**, 155
Fuel cell
A rapid half-cell technique for the pre-screening of polymer fuel cell catalysts (TamizhMani et al.) **444**, 121
Electron and proton transport in gas diffusion electrodes containing electronically conductive proton-exchange polymers (Qi et al.) **459**, 9
Mechanistic and fuel-cell implications of a tristable response in the electrochemical oxidation of methanol (Schell) **457**, 221
Transport and equilibrium properties of Nafion® membranes with H^+ and Na^+ ions (Okada et al.) **442**, 137
Fullerene
C_{60}-mediated bioelectrocatalyzed oxidation of glucose with glucose oxidase (Patolsky et al.) **454**, 9
Electrochemistry of C_{70} fullerene films in aqueous solutions (Csiszár et al.) **441**, 287
Manganese-doped fullerene film electrodes (Szücs et al.) **442**, 59
Fullerenes
The voltammetry of C_{84} isomers (Anderson et al.) **444**, 151
Functionalized monomer
Electrochemical behaviour of 3,4-ethylenedioxythiophene functionalized by a sulphonate group. Application to the preparation of poly(3,4-ethylenedioxythiophene) having permanent cation-exchange properties (Stéphan et al.) **443**, 217
Fused salt electrolysis
Electrolytic conversion of graphite to carbon nanotubes in fused salts (Chen et al.) **446**, 1

Gallium
A comparative kinetic investigation of ethylcinnamate electrohydrodimerization on mercury and liquid gallium (Pezzatini et al.) **444**, 261
Gas diffusion electrode
Electron and proton transport in gas diffusion electrodes containing electronically conductive proton-exchange polymers (Qi et al.) **459**, 9
Electrochemical synthesis of urea at gas-diffusion electrodes .Part II. Simultaneous reduction of carbon dioxide and nitrite ions at Cu, Ag and Au catalysts (Shibata et al.) **442**, 67
Gas diffusion electrodes
Electrocatalytic reduction of NO on metal electrodes and gas diffusion electrodes in an aqueous electrolyte (Hara et al.) **451**, 181
Gel
Electrochemical gelation of poly(3-hexylthiophene) film (Li, Aoki) **453**, 107
Gel electrolytes
The dependence of lithium transference numbers on temperature, salt concentration and anion type in poly (vinylidene fluoride)–hexafluoropropylene copolymer-based gel electrolytes (Dai, Zawodzinski) **459**, 111
Gelatine
Electrochemical nucleation on microelectrodes. Theory and experiment for diffusion-controlled growth (Heerman, Tarallo) **451**, 101
General theory
Electrochemical impedance of multistep mechanisms: a general theory (Harrington) **449**, 9
Genetic algorithm
The use of genetic algorithms in the non-linear regression of immittance data (VanderNoot, Abrahams) **448**, 17
Glassy carbon
Investigation of the oxidation of glassy carbon by the method of electroreflectance—relevance to activation processes (Korshin) **446**, 13
Glassy carbon cathodes
Electrochemical reduction of copper(II) salen at carbon cathodes in dimethylformamide (Samide, Peters) **443**, 95
Glassy carbon electrode
Electrochemical deposition of iridium(IV) oxide from alkaline solutions of iridium(III) oxide (Baur, Spaine) **443**, 208
Electrochemical modification of a carbon electrode using aromatic diazonium salts. 2. Electrochemistry of 4-nitrophenyl modified glassy carbon electrodes in aqueous media (Ortiz et al.) **455**, 75
Glassy carbon electrodes
Catalytic reduction of iodoethane by cobalt(I) salen electrogenerated at vitreous carbon cathodes (Alleman, Peters) **451**, 121
Electrochemical reduction of 2-bromothiazole at carbon cathodes in acetonitrile (Ji, Peters) **455**, 147
Glucose dehydrogenase
Electrochemical monitoring of in vivo reconstitution of glucose dehydrogenase in *Escherichia coli* cells with externally added pyrroloquinoline quinone (Ikeda et al.) **449**, 219
Glucose oxidase
A molecular resolution AFM study of gold-adsorbed glucose oxidase as influenced by enzyme concentration (Quinto et al.) **448**, 51
C_{60}-mediated bioelectrocatalyzed oxidation of glucose with glucose oxidase (Patolsky et al.) **454**, 9
Enhancement of biosensor sensitivity in aqueous and organic solvents using a combination of poly(pyrrole-ammonium) and poly(pyrrole-lactobionamide) films as host matrices (Cosnier et al.) **449**, 165
Mechanistic study of the autoxidation of reduced flavin and quinone compounds (Tatsumi et al.) **443**, 236
Glutarate
Electrochemical studies on molecular recognition of anions: complex formation between xylylenyl bis-iminoimidazolinium and dicarboxylates in nitrobenzene and water (Shao et al.) **441**, 33
Glutathione peroxidase
Bioelectrocatalysis by a selenoenzyme (Lehmann et al.) **455**, 259
Glycine
Electrochemical and in situ FTIR studies on the adsorption and oxidation of glycine and lysine in alkaline medium (Ogura et al.) **449**, 101
Electrochemical behaviour of amino acids on Pt(*hkl*). A voltammetric and in situ FTIR study. .Part III. Glycine on Pt(100) and Pt(110) (Huerta et al.) **445**, 155
Gold
Adsorption configurations of ethylene and acetylene on gold (Zinola, Castro Luna) **456**, 37
Adsorption of Au-containing species and heterogeneous isotope exchange of Au atoms at the Au electrode|dicyanoaurate solution interface (Poškus, Agafonovas) **457**, 171
Impedance analysis of self-assembled naphthalene disulfide monolayer on gold using external redox probes (Bandyopadhyay et al.) **447**, 11

Multicomponent hydrous oxide films grown on gold in acid solution (Burke, Nugent) **444**, 19
The driving force for $(p \times \sqrt{3}) \leftrightarrow (1 \times 1)$ phase transition of Au(111) in the presence of organic adsorption: a combined chronocoulometric and surface X-ray scattering study (Wu et al.) **446**, 67
Gold anodic oxidation
Determination of Au(III) in the surface layers formed anodically on the gold electrode (Juodkazis et al.) **441**, 19
Gold electrode
Electro-oxidation of ethanol on gold: analysis of the reaction products and mechanism (Tremiliosi-Filho et al.) **444**, 31
In situ IR spectroscopic study of water at a polycrystalline gold electrode surface (Kitamura et al.) **452**, 241
Kinetics of redox conversion at a gold electrode of water-insoluble ubiquinone ($UQ_{(10)}$) and plastoquinone ($PQ_{(9)}$) incorporated in supported phospholipid layers (Marchal et al.) **451**, 139
Gold electrodes
Electrostatic interactions at self assembled molecular films of charged thiols on gold (Molinero, Calvo) **445**, 17
Gold modified electrodes
Charge transfer in poly(*o*-toluidine) gold modified electrodes. An EIS study of the reduced state (Rodríguez Presa et al.) **455**, 49
Gold single crystal
Chronoamperometric study of the reductive desorption of alkanethiol self-assembled monolayers (Yang, Morin) **441**, 173
Effect of the crystallographic orientation of gold single-crystal electrodes on the occurrence of 2D phase transitions in adsorbed organic monolayers (Baré et al.) **445**, 7
Gold single crystals
Characterisation of Au(111) and Au(210) | aqueous solution interfaces by electrochemical immittance spectroscopy (Sadkowski et al.) **455**, 107
Graphite
Electrochemical impedance spectroscopy of conductor–insulator composite electrodes: properties in the blocking and diffusive regimes (Navarro-Laboulais et al.) **444**, 173
Electrochemical reduction of substituted cobalt phthalocyanines adsorbed on graphite (Schlettwein, Yoshida) **441**, 139
Electrolytic conversion of graphite to carbon nanotubes in fused salts (Chen et al.) **446**, 1
In situ AFM/STM characterization of porphyrin electrode films for electrochemical detection of neurotransmitters (Duong et al.) **447**, 63
Graphite coating
Kinetic analysis of electron transfer from a graphite coating to horseradish peroxidase (Tatsuma et al.) **446**, 205
Graphite electrode
In-situ spectroelectrochemical analysis of the passivating surface film formed on a graphite electrode during the electrochemical reduction of lithium salts and organic carbonate solvent (Pyun, Ryu) **455**, 11
Graphite substrate
Electrochemistry at boron-doped diamond films grown on graphite substrates: redox-, adsorption and deposition processes (Goeting et al.) **442**, 207
Grazing incident angle X-ray diffraction
Surface reconstruction at metal|solid polymer electrolyte interfaces: Au(111)|Nafion® interface (Wang, Adžić) **448**, 205
Growth
A computer simulation model for the diffusion controlled nucleation and growth processes on electrode surfaces—a two-dimensional study (Vilaseca et al.) **458**, 55
Growth simulation
Simulation of growth and corrosion during the formation of a passive layer (Lafage et al.) **450**, 203
Guanine
Electrocatalytic effects of deoxyribonucleic acids, adenine and guanine on the reduction of Ni(II) at a mercury electrode (Muñiz Alvarez et al.) **457**, 53
H-adatoms
The possible existence of subsurface H-atom adsorbates and H_2 electrochemical evolution reaction intermediates on platinum in acid solutions (Martins et al.) **445**, 135
H adsorption
Specificity of the kinetics of H_2 evolution to the structure of single-crystal Pt surfaces, and the relation between opd and upd H (Barber et al.) **446**, 125
H_2 diffusion
Specificity of the kinetics of H_2 evolution to the structure of single-crystal Pt surfaces, and the relation between opd and upd H (Barber et al.) **446**, 125
Halide adsorption
A lattice-gas model for halide adsorption on single-crystal electrodes (Koper) **450**, 189
Halides
The potential of mean force on halide ions near the Cu(100) surface (Ignaczak et al.) **450**, 175
Haloanthracene anion radicals
Rates of the halide ion cleavage from halo-9,10-diphenylanthracene anion radicals in DMF (Jaworski et al.) **440**, 163
Haloperoxidase
Electrocatalysis by vanadium haloperoxidase (Kulys, Vidziunaite) **455**, 161
Hammett
The electrochemistry of fluorine-substituted polyphenylthiophenes for charge storage applications (Gofer et al.) **443**, 103
Hanging mercury drop electrode
Comproportionation and disproportionation reactions in the electrochemical reduction of nitroprusside at a hanging mercury drop electrode in acidic solution (Carapuça et al.) **455**, 93
HCO_3^-
Radiotracer study of the specific adsorption of HCO_3^- ions on a platinum electrode (Horányi) **453**, 113
Heat of formation of the surface
Heat of formation of the surface and the Gibbs-Helmholtz equation (Grafov) **450**, 3
Heavy metal ion
Electrochemical extraction of heavy metal ions assisted by cyclic thioether ligands (Lagger et al.) **451**, 29
Helmholtz plane
Determination of emersed electrochemical interface thickness by ellipsometry: Aqueous electrolytes on Ag (Woelfel, Pemberton) **456**, 161
Hemispherical nucleus
Digital simulation of the growth of a hemispherical nucleus by diffusion limited aggregation (Heerman, Tarallo) **455**, 265
Heteroaromatic
New methods for the accurate determination of extinction and diffusion coefficients of aromatic and heteroaromatic radical anions in *N*,*N*-dimethylformamide (Pedersen et al.) **454**, 123
Heterocyclic thiols
The influence of heterocyclic thiols on the electrodeposition of Cu on Au(111) (Whelan et al.) **441**, 109
Heterogeneity
Impedance of rough capacitive electrodes: the role of surface disorder (Kerner, Pajkossy) **448**, 139
Heterogeneous electron transfer rate constants
Studies of ferrocene derivative diffusion and heterogeneous kinetics in polymer electrolyte by using microelectrode voltammetry (Zhou et al.) **441**, 153

Heterogeneous isotope exchange
Adsorption of Au-containing species and heterogeneous isotope exchange of Au atoms at the Au electrode|dicyanoaurate solution interface (Poškus, Agafonovas) **457**, 171
Heterogeneous kinetic parameters
Cyclic voltammetry at constant sphericity (Martínez-Ortiz et al.) **443**, 243
Heteropolyoxometalates
A voltammetric study on the formation of V(V)- and V(IV)-substituted molybdophosphate(V) complexes in aqueous solution (Himeno, Ishio) **451**, 203
Heteropolytungstate
Electrochemical and electrocatalytic properties of iridium(IV)-substituted Dawson type polyoxotungstate (Sun et al.) **451**, 49
Hexacyanoferrate
A kinetic and in situ infrared spectroscopic study of the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ couple on platinum single crystal electrodes (Kitamura et al.) **456**, 113
Effect on electrochemistry of hexacyanoferrate at carbon fibers after pretreatment with titanium chloride (de Carvalho et al.) **457**, 83
Frequency dependence of the electroreflectance signal for redox reaction of solution-phase species at the electrode surface: formulation and experimental verification (Sagara et al.) **454**, 75
1-Hexadecanethiol
Phase separation of binary self-assembled thiol monolayers composed of 1-hexadecanethiol and 3-mercaptopropionic acid on Au(111) studied by scanning tunneling microscopy and cyclic voltammetry (Hobara et al.) **444**, 113
Hexamethylpararosaniline (crystal violet)
A primitive model for hexamethylpararosaniline (crystal violet) monomolecular adlayer: a Monte Carlo simulation study (Batina et al.) **450**, 213
Hexazinone
The role of protonation, hydration, elimination, and ring opening in the electroreduction of hexazinone (Privman, Zuman) **455**, 235
HFC 134a
Electrochemical investigations in liquid and supercritical 1,1,1,2-tetrafluoroethane (HFC 134a) and difluoromethane (HFC 32) (Abbott et al.) **457**, 1
HFC 32
Electrochemical investigations in liquid and supercritical 1,1,1,2-tetrafluoroethane (HFC 134a) and difluoromethane (HFC 32) (Abbott et al.) **457**, 1
High frequency
High frequency dielectric studies of hydrated Nafion® (Paddison et al.) **459**, 91
Higher-order corrections
Analysis of the double pulse response for the following chemical reaction in the EC mechanism (Galvez) **452**, 19
Zeroth-order solution and higher-order corrections for the CE mechanism in double potential step techniques (Galvez) **441**, 259
L-Histidine
Electrochemical regeneration of coenzyme NADH on a histidine modified silver electrode (Long, Chen) **440**, 239
Homogeneous chromium amalgam
Interaction of chromium atoms with other metals (Zn, Mn, Tl, Pb and Cu) in the mercury phase (Paklepa, Wrona) **453**, 205
Homolytic bond breaking
Mechanism of the electrochemical reduction of benzyl chlorides catalysed by Co(salen) (Isse et al.) **444**, 241
HOPG
Spectroelectrochemical studies of tetrasulfonated metallophthalocyanines adsorbed on the basal plane of graphite in the presence of cysteine (Lezna et al.) **452**, 221
$[(H_2O)(phen)_2FeOFe(phen)_2(H_2O)]^{4+}$
Spectroelectrochemical study of the generation of *tris*-(1,10-phenanthroline)iron(II/III) from μ-oxo-bis[aquabis(1,10-phenanthroline)iron(III)] (Walczak, Flynn) **441**, 43
Horseradish peroxidase
A reagentless amperometric hydrogen peroxide biosensor based on covalently binding horseradish peroxidase and thionine using a thiol-modified gold electrode (Ruan et al.) **455**, 121
H_3PO_4
Effect of temperature on electrolytic loading of hydrogen into palladium (Bernardini et al.) **453**, 221
Hybrid materials
Electrochemical impedance studies of hybrids of perfluorosulfonic acid ionomer and silicon oxide by sol-gel reaction from solution (Zoppi, Nunes) **445**, 39
Hydrazines
Electrocatalytic oxidation of hydrazines at a 4-pyridyl hydroquinone self-assembled platinum electrode and its application to amperometric detection in capillary electrophoresis (Niu et al.) **448**, 79
Hydride
Electrochemical behavior of nanocrystalline Ti_2RuFe alloy prepared by high energy ball-milling (Roué et al.) **455**, 83
Hydrogen
Effect of temperature on electrolytic loading of hydrogen into palladium (Bernardini et al.) **453**, 221
Silicon surface states and subsurface hydrogen (Belaïdi et al.) **444**, 55
Hydrogen adsorption
Underpotential–overpotential transition of a Ag overlayer on Pt. Part 3. Influence of the rearrangement of the overlayer structure on the blocking of hydrogen upd (Vaskevich, Gileadi) **442**, 147
Hydrogen bonding
MD simulation of water at imperfect platinum surfaces. III. Hydrogen bonding (Nagy, Denuault) **450**, 159
Hydrogen (Deuterium) evolution reaction (her)
Formation of nickel hydrides by hydrogen evolution in alkaline media: effect of temperature (Bernardini et al.) **457**, 205
Hydrogen evolution
Electrochemical behavior of nanocrystalline Ti_2RuFe alloy prepared by high energy ball-milling (Roué et al.) **455**, 83
Hydrogen evolution reaction on smooth $Ni(1-x)+Mo(x)$ alloys $(0 \le x \le 0.25)$ (Gennero de Chialvo, Chialvo) **448**, 87
The possible existence of subsurface H-atom adsorbates and H_2 electrochemical evolution reaction intermediates on platinum in acid solutions (Martins et al.) **445**, 135
Hydrogen evolution reaction
Characterization of surface poisoning on a Pd cathode using hydrogen isotopes (Muto et al.) **457**, 99
Hydrogen evolution/oxidation reactions on porous electrodes (Lasia) **454**, 115
Formation of nickel hydrides by hydrogen evolution in alkaline media (Bernardini et al.) **442**, 125
Hydrogen oxidation
Hydrogen evolution/oxidation reactions on porous electrodes (Lasia) **454**, 115
Influence of Nafion® film on the kinetics of anodic hydrogen oxidation (Maruyama et al.) **447**, 201
Hydrogen peroxide
A reagentless amperometric hydrogen peroxide biosensor based on covalently binding horseradish peroxidase and thionine using a thiol-modified gold electrode (Ruan et al.) **455**, 121
Monomolecular films of a nickel(II) pentaazamacrocyclic complex for the electrocatalytic oxidation of hydrogen peroxide at gold electrodes (Gobi et al.) **444**, 145

Hydrogen peroxide reduction
The electrocatalytic activity of Prussian blue in hydrogen peroxide reduction studied using a wall-jet electrode with continuous flow (Karyakin et al.) **456**, 97
Hydrogen pressure
Hydrogen evolution/oxidation reactions on porous electrodes (Lasia) **454**, 115
Hydrogen-storage alloy electrode
The kinetic study on the electrolytic hydrogenation of nitrobenzene on the hydrogen-storage alloy electrode (Lu et al.) **457**, 149
Hydrogen sulfide
An ac impedance study of the anodic dissolution of iron in sulfuric acid solutions containing hydrogen sulfide (Ma et al.) **451**, 11
Hydrogen transport
Theoretical analysis of hydrogen transport through an electrode at the coexistence of two hydrogen-poor and -rich phases based upon the concept of hydrogen trapping (Pyun, Yang) **441**, 183
Hydrogen trapping
Theoretical analysis of hydrogen transport through an electrode at the coexistence of two hydrogen-poor and -rich phases based upon the concept of hydrogen trapping (Pyun, Yang) **441**, 183
Hydroquinone
An in situ UV–vis and IR spectroelectrochemical study of the disposition of a hydroquinone anion salt on platinum electrodes from dichloromethane solutions (Babaei, McQuillan) **441**, 197
Hydrotalcite
Electrochemical STM observation of $[Fe(CN)_6]^{3-}$ ions adsorbed on a hydrotalcite crystal surface (Yao et al.) **458**, 249
Hydrotalcites
Electrodes coated by hydrotalcite-like clays. Effect of the metals and the intercalated anions on ion accumulation and retention capability (Ballarin et al.) **445**, 27
Hydrous oxide
Characterization of the ^{E}MOSFET, a novel one-electrode chemical transducer for redox measurements (Hendrikse et al.) **458**, 23
Electrochemical deposition of iridium(IV) oxide from alkaline solutions of iridium(III) oxide (Baur, Spaine) **443**, 208
Multicomponent hydrous oxide films grown on gold in acid solution (Burke, Nugent) **444**, 19
Hydroxide oxidation
Voltammetry of hydroxide ion in aqueous solutions on gold microelectrodes (Abdelsalam et al.) **449**, 5
Hydroxyapatite
Mechanistic studies of electrodeposition for bioceramic coatings of calcium phosphates by an in situ pH-microsensor technique (Zhang et al.) **452**, 235
Hypericin
An electroreflectance and photoelectrochemical study of hypericin at bare and modified gold electrodes (Sagara et al.) **445**, 171
Hysteresis
Charging process in polypyrrole films: effect of ion association (Vorotyntsev et al.) **450**, 121
Hysteresis behavior
Electrochemical and mass measurements during small voltage amplitude perturbations of conducting polyaniline films (Dinh, Birss) **443**, 63

Ideally polarizable electrode
On the electrical capacitance of interfaces exhibiting constant phase element behaviour (Zoltowski) **443**, 149
Imidazole films
An in situ infrared spectroscopic study of imidazole films on copper electrodes (Richmond et al.) **448**, 237
Imidazolemyoglobin
Spectroelectrochemical and electrochemical determination of ligand binding and electron transfer properties of myoglobin, cyanomyoglobin, and imidazolemyoglobin (Cohen et al.) **447**, 53
Immiscible electrolyte solutions
Origin of the effect of ion nature on the differential capacity of an interface between two immiscible electrolyte solutions (Samec et al.) **444**, 1
Immittance
State variable approach to electrochemical dynamics (Sadkowski) **454**, 39
Immobilisation
Immobilisation at an electrode surface of calix[4]arenes bearing electropolymerisable pyrrole moieties at the upper rim (Buffenoir et al.) **451**, 261
Protein electrochemistry at carbon nanotube electrodes (Davis et al.) **440**, 279
Impedance
Adsorption of adenosine on (111) and (001) bismuth single crystal planes (Lust et al.) **449**, 153
Adsorption of normal hexanol on bismuth single crystal plane electrodes (Lust et al.) **442**, 189
Discontinuous immitance due to a saddle node bifurcation .I: 1-, 2- and 3-part immitance diagrams (Berthier et al.) **458**, 231
Electrochemical and mass measurements during small voltage amplitude perturbations of conducting polyaniline films (Dinh, Birss) **443**, 63
Electrochemical characteristics of the microhole ITIES (Murtomäki, Kontturi) **449**, 225
Electron and proton transport in gas diffusion electrodes containing electronically conductive proton-exchange polymers (Qi et al.) **459**, 9
Impedance analysis of electrodeposited insulating polypyrrole (Komaba, Osaka) **453**, 19
Impedance measurements with phospholipid-coated mercury electrodes (Rueda et al.) **454**, 155
Impedance study of the electrochemical reduction of adrenochrome on glassy carbon (Zhang et al.) **444**, 169
Reaction mechanism and partial charge transfer of $Tl|Tl^+$-systems studied by impedance spectroscopy (SSSS method). Part 1. The $Tl(Hg)|Tl^+$-reaction in the presence of SCN^- (Salié) **447**, 211
State variable approach to electrochemical dynamics (Sadkowski) **454**, 39
The effects of covalent binding of the electroactive components in durable CHEMFET membranes—impedance spectroscopy and ion sensitivity studies (Lugtenberg et al.) **452**, 69
The use of genetic algorithms in the non-linear regression of immittance data (VanderNoot, Abrahams) **448**, 17
Impedance analysis
A unified approach to trace analysis and evaluation of electrode kinetics with fast Fourier transform electrochemical instrumentation (Schiewe et al.) **451**, 129
Impedance analysis of self-assembled naphthalene disulfide monolayer on gold using external redox probes (Bandyopadhyay et al.) **447**, 11
Impedance response
Enhanced rate of the redox reaction of indigodisulfonate at electrodes coated with poly[1-methyl-3-(pyrrol-1-ylmethyl)pyridinium]chloride films (Komura et al.) **454**, 145
Impedance spectroscopy
Characterization of novel activated composite membranes by impedance spectroscopy (Benavente et al.) **451**, 173
On the electrical capacitance of interfaces exhibiting constant phase element behaviour (Zoltowski) **443**, 149
Thin indium oxide film formation and growth: Impedance spectroscopy and cyclic voltammetry investigations (Metikoš-Huković, Omanović) **455**, 181
Impedance voltammetry
Impedance voltammetry of electro-dimerization mechanisms: application to the reduction of the methyl viologen di-cation at mercury electrodes and aqueous solutions (Rueda et al.) **443**, 227

Impedances
The electrochemical behavior and impedance characteristics of the passive film on carbon steel in nitric acid solutions (Guo et al.) **445**, 95
Impedence properties
A comparative study of the impedance properties of glassy-carbon electrodes covered with poly(styrenesulphonate) and Nafion® films containing $Os(bpy)_3^{3+/2+}$ redox sites (Sharp, Åberg) **449**, 137
Impinging jet
The impinging jet flow method in interfacial electrochemistry: an application to bead-type electrodes (Bergelin, Wasberg) **449**, 181
In situ AFM
Mechanism of solid|liquid interfacial reactions. The reactive dissolution of p-chloranil in aqueous solution as studied by the channel flow cell with electrochemical detection and atomic force microscopy (Booth et al.) **440**, 83
In situ conductance
Polythiophene puzzle—a plausible solution (Visy, Kankare) **442**, 175
In-situ dc resistance measurement technique
Characterization of a poly(3-methyl thiophene) film by an in-situ dc resistance measurement technique and in-situ FTIR spectroelectrochemistry (Lankinen et al.) **447**, 135
In-situ electrochemical atomic force microscopy (ECAFM)
An AFM study of the properties of passive films on iron surfaces (Li, Meier) **454**, 53
In situ electrochemical chronoabsorptometry
A fractal feature of the conducting zone by conversion rates from any redox state into the fully conducting state of polyaniline films (Aoki, Teragishi) **441**, 25
In-situ ESR
Interconversion of polarons and bipolarons of polyaniline during the electrochemical polymerization of aniline (Mu et al.) **446**, 107
In-situ external reflectance FTIR spectroscopy
Characterization of a poly(3-methyl thiophene) film by an in-situ dc resistance measurement technique and in-situ FTIR spectroelectrochemistry (Lankinen et al.) **447**, 135
In-situ FTIR
In-situ spectroelectrochemical analysis of the passivating surface film formed on a graphite electrode during the electrochemical reduction of lithium salts and organic carbonate solvent (Pyun, Ryu) **455**, 11
In situ FTIR
Electrochemical and in situ FTIR studies on the adsorption and oxidation of glycine and lysine in alkaline medium (Ogura et al.) **449**, 101
In situ FTIR studies on Prussian blue (PB)-, polyaniline (PAn)- and inner PB|outer PAn film-modified electrodes (Nakayama et al.) **440**, 125
In situ FTIRS
In situ FTIR spectroscopic studies of electrooxidation of C_4 alcohols on platinum electrodes in acid solutions. Part II. Reaction mechanism of 1,3-butanediol oxidation (Li, Sun) **448**, 5
In situ FT-IR spectroelectrochemistry
The electrochemical reduction of dimethyl maleate and dimethyl fumarate (Doherty, Scott) **442**, 35
In-situ infrared spectroscopy
In-situ infrared spectroscopic studies of thymine adsorption on a Au(111) electrode (Haiss et al.) **454**, 107
In situ measurement
In situ study of the conductivity of the electrochemically deposited polyaniline film using a dual-disk microelectrode (Zhang et al.) **440**, 35
In-situ radiotracer sorption studies
A detailed study of the reliability of some crucial parameters used in the in-situ radiotracer sorption studies (Hirschberg et al.) **456**, 171
In situ surface Raman
In situ surface Raman investigation on induced-codeposition of an Fe–Mo alloy (Niu et al.) **455**, 205
In-situ UV–vis spectroelectrochemistry
Synthesis and electrochemical behavior of amphiphilic 1,3,4-oxadiazole derivatives (Freydank et al.) **456**, 61
In situ UV–vis subtractive reflectance spectroscopy
Spectroelectrochemical studies of poly-*o*-phenylenediamine .Part 2. In situ UV–vis subtractive reflectance spectroscopy (Wu et al.) **440**, 173
Inclusion complex
Inclusion of the parent molecules of some drugs with β-cyclodextrin studied by electrochemical and spectrometric methods (Dang et al.) **448**, 61
Novel voltammetric responses of a 1,1′-ferrocene bis(methylene aza-18-crown-6) receptor to group 1 and 2 metal cations in acetonitrile (Chen et al.) **444**, 209
Indigodisulfonate
Enhanced rate of the redox reaction of indigodisulfonate at electrodes coated with poly[1-methyl-3-(pyrrol-1-ylmethyl)pyridinium]chloride films (Komura et al.) **454**, 145
Indium
Electrosynthesis of indium sulfide on sulfur-modified polycrystalline gold electrodes (de Tacconi, Rajeshwar) **444**, 7
Indium hexacyanoferrate
Microgravimetric monitoring of transport of cations during redox reactions of indium(III) hexacyanoferrate(III,II). Radiotracer evidence for the flux of anions in the film (Malik et al.) **452**, 57
Indium(III)-hexacyanoferrate
X-ray photoelectron spectroscopic investigation and electrochemistry of polynuclear indium(III) hexacyanoferrate films (Cataldi et al.) **448**, 111
Indium-hexacyanoferrate
Probe beam deflection study of the transport of ions during the redox reaction of indium-hexacyanoferrate films (Csahók et al.) **457**, 251
Indium oxide films
Thin indium oxide film formation and growth: Impedance spectroscopy and cyclic voltammetry investigations (Metikoš-Huković, Omanović) **455**, 181
Indium–tin oxide
Electrochemical behaviour of poly(neutral red) on an ITO electrode (Benito et al.) **446**, 47
Induced adsorption
Influence of the adsorption phenomena on the NPP and RPP limiting currents for labile metal-macromolecule systems (Puy et al.) **457**, 229
Induced-codepositon
In situ surface Raman investigation on induced-codeposition of an Fe–Mo alloy (Niu et al.) **455**, 205
Inductively coupled plasma spectroscopy
Characterization of novel activated composite membranes by impedance spectroscopy (Benavente et al.) **451**, 173
Infrared reflection–absorption spectra
In-situ synchrotron far infrared spectroscopy of surface films on a copper electrode in aqueous solutions (Melendres et al.) **449**, 215
Infrared reflection spectroscopy
An in situ infrared spectroscopic study of imidazole films on copper electrodes (Richmond et al.) **448**, 237
Inhibition
Characterization of polyaniline films electrodeposited on mild steel in aqueous *p*-toluenesulfonic acid solution (Camalet et al.) **445**, 117
Inhibition of electrode reaction
The enhanced transport of the cadmium acetylacetone complex across the adsorbed aliphatic alcohol monolayer during electroreduction on mercury electrodes (Schmidt et al.) **456**, 131

Inosine associates
Inosine reduction study at low pH by a combination of electrochemical methods (Havran et al.) **454**, 65
Inosine reduction
Inosine reduction study at low pH by a combination of electrochemical methods (Havran et al.) **454**, 65
Input/output phase relations
Mathematical analyses of ac voltammetry of a surface confined redox process (Yap) **454**, 33
Insertion electrodes
Impedance of constant phase element (CPE)-blocked diffusion in film electrodes (Bisquert et al.) **452**, 229
Instabilities
Mechanistic and fuel-cell implications of a tristable response in the electrochemical oxidation of methanol (Schell) **457**, 221
Insulating liquid
Photoinjection of excess electrons into liquid hydrocarbons: a thermodynamic treatment (Schiller et al.) **450**, 21
Insulin
Adsorption behaviour of insulin and soybean trypsin inhibitor at the mercury | solution interface (Vidić et al.) **452**, 151
Integrated chemical systems
Osmium complexes bearing functional groups: building blocks for integrated chemical systems (Danilowicz et al.) **445**, 89
Intercalation
The electroreduction of C_{60} films in solutions containing crown ether complexes of alkali metal cations (Winkler et al.) **456**, 229
Interchain organization
Anodic oxidation of dipyrrolyls linked with flexible or rigid spacers: study of the electropolymerization mode (Chane-Ching et al.) **453**, 139
Interface-state density
Silicon surface states and subsurface hydrogen (Belaïdi et al.) **444**, 55
Interfacial capacity
Evaluation of the surface area of RuO_2 electrodes by periodic current signals (Fernández et al.) **457**, 109
Interfacial charge
Linear correlation between surface stress and surface charge in anion adsorption on Au(111) (Haiss et al.) **452**, 199
Interfacial design
Constructing different 'bridges' for interfacial electron transfer in azobenzene LB/SAM composite bilayers (Yu et al.) **448**, 119
Interfacial impedance
Impedance of rough capacitive electrodes: the role of surface disorder (Kerner, Pajkossy) **448**, 139
Interfacial potential distribution
The effect of the interfacial potential distribution on the reduction of adsorbed methylene blue at a mercury electrode (Honeychurch) **445**, 63
Interfacial processes
In situ probing of interfacial processes in the electrodeposition of copper by confocal Raman microspectroscopy (Texier et al.) **446**, 189
Interfacial structure
Molecular dynamics study of alkali cations at the water|liquid mercury interface (Tóth) **443**, 73
Interfacial tension
A note on the surface stress and tension of solid metal electrodes (Schmickler, Leiva) **453**, 61
Comments on the thermodynamics of solid electrodes (Lipkowski et al.) **452**, 193
Intermediate
An ac impedance study of the anodic dissolution of iron in sulfuric acid solutions containing hydrogen sulfide (Ma et al.) **451**, 11
Intermolecular dimerization
Increase of conjugation length within SAMs of terthiophene-derivatives, through electrochemical intermolecular coupling (Michalitsch et al.) **457**, 129
Intermolecular interaction
Probability theory of desorption kinetics of self-assembled alkanethiols stabilized with pair interaction (Aoki, Kakiuchi) **452**, 187
Intramolecular force
Molecular simulation of oxygen on supported platinum clusters (Wu, Chan) **450**, 225
Iodide
Electrocatalysis by vanadium haloperoxidase (Kulys, Vidziunaite) **455**, 161
Iodoethane
Catalytic reduction of iodoethane by cobalt(I) salen electrogenerated at vitreous carbon cathodes (Alleman, Peters) **451**, 121
Ion compensation
Electrochemical and mass measurements during small voltage amplitude perturbations of conducting polyaniline films (Dinh, Birss) **443**, 63
Ion exchange
Charging process in polypyrrole films: effect of ion association (Vorotyntsev et al.) **450**, 121
Probe beam deflection study of the transport of ions during the redox reaction of indium-hexacyanoferrate films (Csahók et al.) **457**, 251
Transport and equilibrium properties of Nafion® membranes with H^+ and Na^+ ions (Okada et al.) **442**, 137
Ion-exchange
Electrochemical behaviour of 3,4-ethylenedioxythiophene functionalized by a sulphonate group. Application to the preparation of poly(3,4-ethylenedioxythiophene) having permanent cation-exchange properties (Stéphan et al.) **443**, 217
Ion-exchange membranes
Studies on ion-exchange membranes. II. Measurement of the anisotropic conductance of Nafion® (Gardner, Anantaraman) **449**, 209
Ion-gate membrane
Polypyrrole as a model membrane for drug delivery (Kontturi et al.) **453**, 231
Ion pair formation
Thin layer electrochemical Raman study of ion pair formation between the tetrachlorobenzoquinone anion radical and alkaline earth metal cations (Yamanuki et al.) **458**, 191
Ion pairing
The ac-voltammetric study of fast charge transfer processes in benzene solutions (Baranski, Winkler) **453**, 29
Ion-pairing
Restructuring of cationic conducting polymers by $Fe(CN)_6^{4-}$ (Qi, Pickup) **441**, 131
Ion permselectivity
Surface reconstruction at metal|solid polymer electrolyte interfaces: Au(111)|Nafion® interface (Wang, Adžić) **448**, 205
Ion-selective
The effects of covalent binding of the electroactive components in durable CHEMFET membranes—impedance spectroscopy and ion sensitivity studies (Lugtenberg et al.) **452**, 69
Ion sensing
Electrochemical molecular recognition by thin films of ether-substituted polythiophenes (Goldenberg et al.) **447**, 1
Ion transfer
Amperometric ion sensors based on laser-patterned composite polymer membranes (Lee et al.) **440**, 73
On the dynamics of electrochemical ion-transfer reactions (Pecina, Schmickler) **450**, 303

Ionic conductivities
Ionic liquid–polymer gel electrolytes from hydrophilic and hydrophobic ionic liquids (Fuller et al.) **459**, 29
Ionic conductivity
Electrochemical impedance studies of hybrids of perfluorosulfonic acid ionomer and silicon oxide by sol-gel reaction from solution (Zoppi, Nunes) **445**, 39
Low-temperature ionic conductivity of relevant solutions and of SiO_2 gels before and after exchanges in propylene carbonate solutions (Wasiucionek, Breiter) **443**, 117
On the theoretical aspects of thermal effects in electrochemical cells (Kharkats et al.) **450**, 37
Theoretical model of radionuclide extraction from soils by the mechanism of ionic electromigration (Kharkats) **450**, 27
Ionic liquid–polymer gels
Ionic liquid–polymer gel electrolytes from hydrophilic and hydrophobic ionic liquids (Fuller et al.) **459**, 29
Ionophores
Electrochemical behaviour of different binaphthalene crown ethers. Part 2: Novel strategy based on in situ removable bromine atom protecting groups for the electrosynthesis of polybinaphthalenes bearing perylene crown ethers as potentially redox switchable macromolecular hosts (Belloncle et al.) **444**, 101
Ions
An impedance and chronocoulometric study of the adsorption of chloride and bromide ions on bismuth single crystal planes from solutions in methanol (Väärtnõu, Lust) **445**, 165
IR spectroscopy
In situ IR spectroscopic study of water at a polycrystalline gold electrode surface (Kitamura et al.) **452**, 241
IR-spectroelectrochemistry
An electrochemical and spectroelectrochemical (IR) investigation of the reduction of RCo(II)TPP (R = benzyl or butyl; TPP = tetraphenylporphyrin): mechanistic implications in the CoTPP catalyzed electrocarboxylation of alkyl halides (Zheng et al.) **453**, 79
Iridium
Electrochemical and electrocatalytic properties of iridium(IV)-substituted Dawson type polyoxotungstate (Sun et al.) **451**, 49
Iridium oxide
Electrochemical deposition of iridium(IV) oxide from alkaline solutions of iridium(III) oxide (Baur, Spaine) **443**, 208
Iridium oxide film
Anodic electrodeposition of iridium oxide films (Petit, Plichon) **444**, 247
Iridium ultramicroelectrode array
Effects of mercury electrodeposition on the surface degradation of microlithographically fabricated iridium ultramicroelectrodes (Nolan, Kounaves) **453**, 39
Iron
Characterization of polyaniline films electrodeposited on mild steel in aqueous *p*-toluenesulfonic acid solution (Camalet et al.) **445**, 117
Iron(II)/cysteine peptide thiolate complexes
Electrochemical mimicking of reduced rubredoxin by iron(II) complexes of cysteine peptide thiolate in aqueous micelle solution (Sun et al.) **448**, 105
Iron–phosphorous alloy
Electrochemically deposited thin films of amorphous Fe–P alloy. Part I. Chemical composition and phase structure characterization (Zečević et al.) **448**, 245
Iron powders
Pyridine and aniline adsorption from an apolar solvent: the role of the solid adsorbent (Ardizzone et al.) **447**, 17
Iron-rich clay
Characterizations of iron-rich clay modified electrodes and their applications in optical recognition (Shyu, Wang) **440**, 27
Iron surfaces
An AFM study of the properties of passive films on iron surfaces (Li, Meier) **454**, 53
Irreversible adsorption
Contrasting electrochemical behavior of irreversibly adsorbed Sb monolayer on Pt(100) and Pt(111) single crystal electrode surfaces (Jung et al.) **453**, 243
Irreversible reactions
Contribution to the study of square wave voltammetry in the case of simple irreversible reactions (Fatouros, Krulic) **443**, 262
Irreversible trap
Theoretical analysis of hydrogen transport through an electrode at the coexistence of two hydrogen-poor and -rich phases based upon the concept of hydrogen trapping (Pyun, Yang) **441**, 183
N-Isopropylacrylamide
Electrochemistry of Ru (EDTA) coordinated to pyridine group within thermoresponsive gel films (Iwaku et al.) **442**, 27
Isotherms
Effect of surface order on adsorption of sulfate ions on silver electrodes (Smoliński et al.) **442**, 41
Isotopic distributions
Characterization of surface poisoning on a Pd cathode using hydrogen isotopes (Muto et al.) **457**, 99
ITIES
Facilitated ion transfer reactions across oil|water interfaces. Part II. Use of the convoluted current for the calculation of the association constants and for an amperometric determination of the stoichiometry of ML_j^{z+} complexes (Reymond et al.) **451**, 59
Facilitated ion transfer reactions across oil|water interfaces. Part I. Algebraic development and calculation of cyclic voltammetry experiments for successive complex formation (Reymond et al.) **449**, 49
Spectroelectrochemical approaches to heterogeneous electron transfer reactions at the polarised water | 1,2-dichloroethane interfaces (Ding et al.) **458**, 139
ITO
Electrochemistry of ITO and gold electrodes covalently modified with dithizone and the effect of Cu(II) and Pb(II) ions (Mirkhalaf et al.) **452**, 203

Joule heat
On the theoretical aspects of thermal effects in electrochemical cells (Kharkats et al.) **450**, 37
Joule heating
Fundamental principles of electrochemical ohmic heating of solutions (Amatore et al.) **457**, 191

Kinetic and diffusion factors
Characterization of the microelectrode behaviour in metal electrodeposition by computation of linear potential sweep voltammetry (Stasiukaitis, Skominas) **459**, 121
Kinetic investigation
A comparative kinetic investigation of ethylcinnamate electrohydrodimerization on mercury and liquid gallium (Pezzatini et al.) **444**, 261
Kinetic model
Large signal (global) analysis of non-linear response of electrocatalytic reaction. I. Multiple steady states (Sadkowski) **447**, 97
Theoretical model of radionuclide extraction from soils by the mechanism of ionic electromigration (Kharkats) **450**, 27
Kinetic parameters
A chemical and electrochemical study of titanium ions in the molten equimolar $CaCl_2 + NaCl$ mixture at 550°C. (Martínez et al.) **449**, 67
Hydrogen evolution reaction on smooth $Ni(1-x) + Mo(x)$ alloys $(0 \leq x \leq 0.25)$ (Gennero de Chialvo, Chialvo) **448**, 87

The application of the concept of reaction layer to the study of electrode processes coupled with the second-order chemical reactions at microelectrodes under steady-state conditions (Zhuang, Sun) **440**, 103

Kinetic zone
Unified treatment of the pseudo-first order catalytic process for all stepped-potential methods (Fatouros, Krulic) **456**, 211

Kinetics
A numerical approach to the voltammograms of a thick plate Pd|H electrode (Zhang, Zhang) **445**, 55
Channel electrode voltammetry: the kinetics of the complexation of the chloranil radical anion with M^{2+} ions by waveshape analysis (Cooper et al.) **442**, 201
The electrocatalytic activity of Prussian blue in hydrogen peroxide reduction studied using a wall-jet electrode with continuous flow (Karyakin et al.) **456**, 97
Thermodynamics and kinetics of adsorption of cyanide ions on silver. Part II (Rogozhnikov, Beck) **457**, 31
Voltammograms of thin layer Pd | H(D) electrodes in the coexistence of α and β phases (Zhang et al.) **458**, 107

Lactobionamide
Enhancement of biosensor sensitivity in aqueous and organic solvents using a combination of poly(pyrrole-ammonium) and poly(pyrrole-lactobionamide) films as host matrices (Cosnier et al.) **449**, 165

Langmuir–Blodgett films
Constructing different 'bridges' for interfacial electron transfer in azobenzene LB/SAM composite bilayers (Yu et al.) **448**, 119
Electrochemical properties of Langmuir–Blodgett films of polyesters derived from oligothiophenes (Goldenberg et al.) **443**, 266
Solvent trapping during the self-assembly of octadecanethiol monolayer on roughened gold electrodes from surface-enhanced Raman scattering studies (Kudelski, Krysiński) **443**, 5
Synthesis and electrochemical behavior of amphiphilic 1,3,4-oxadiazole derivatives (Freydank et al.) **456**, 61

Laponite
Characterization of organosilasesquioxane-intercalated-laponite-clay modified electrodes and (bio)electrochemical applications (Coche-Guérente et al.) **458**, 73

Lattice-gas model
A lattice-gas model for halide adsorption on single-crystal electrodes (Koper) **450**, 189

LDH modified electrodes
Electrochemical study of ferrocene and nitroxide derivatives intercalated in Zn–Cr and Zn–Al layered double hydroxides (Therias et al.) **454**, 91

Lead
A mathematical model for anodic oxygen-transfer reactions at Bi(V)-doped PbO_2-film electrodes (Popović et al.) **456**, 203
Electrochemical extraction of heavy metal ions assisted by cyclic thioether ligands (Lagger et al.) **451**, 29
Facilitated ion transfer reactions across oil|water interfaces. Part II. Use of the convoluted current for the calculation of the association constants and for an amperometric determination of the stoichiometry of ML_j^{z+} complexes (Reymond et al.) **451**, 59
Stripping chronopotentiometry of immobilized microparticles (Komorsky-Lovrić, Scholz) **445**, 81
Underpotential deposition of lead on Pt(111) in the presence of bromide: $RRD_{Pt(111)}E$ and X-ray scattering studies (Marković et al.) **448**, 183

Lead electrode
Effect of anions on the electrochemical behavior of Pb electrodes in alkaline solutions and on the anodic oxide film properties (Veluchamy, Minoura) **440**, 41

$LiCoO_2$
SPES, 6Li MAS NMR, and Ni^{3+} EPR evidence for the formation of Co^{2+}-containing spinel phases in $LiCoO_2$ cycled electrode materials (Alcántara et al.) **454**, 173

Ligand binding
Spectroelectrochemical and electrochemical determination of ligand binding and electron transfer properties of myoglobin, cyanomyoglobin, and imidazolemyoglobin (Cohen et al.) **447**, 53

Ligand mixtures
Voltammetry of metal ions in mixtures of ligands. Part III: Application to systems including inert complexes (Berbel et al.) **453**, 151

Light absorption
Heterogeneous process of charge transfer and phototransfer with participation of dipole particles (Marsagishvili) **450**, 47

Li-ion anode
Origin of a sharp current peak appearing at a potential slightly more positive than 0 V versus Li | Li^+ on the cyclic voltammograms of carbonaceous materials (Takamura et al.) **455**, 223

Limit of detection
A unified approach to trace analysis and evaluation of electrode kinetics with fast Fourier transform electrochemical instrumentation (Schiewe et al.) **451**, 129

Li + Na carbonate
Thermodynamic and electrochemical behavior of nickel in molten Li_2CO_3–Na_2CO_3 modified by addition of calcium carbonate (Cassir et al.) **452**, 127

Line profiles
Electrochemical characterisation of a semiconductor–metal junction: n-type InP|Cu; influence of the structure of the metallic layer (Moulayat et al.) **453**, 129

Linear potential sweep voltammetry
Characterization of the microelectrode behaviour in metal electrodeposition by computation of linear potential sweep voltammetry (Stasiukaitis, Skominas) **459**, 121

Linear scan voltammetry
Ligand-catalysed metal ion reduction. Voltammetric determination of rate and formation constants for the nickel complex with 6-mercaptopurine-9-D-riboside (Ion et al.) **444**, 11

Linear sweep voltammetry
An exponentially expanding mesh ideally suited to the fast and efficient simulation of diffusion processes at microdisc electrodes. 3. Application to voltammetry. (Gavaghan) **456**, 25
Electrochemical reactions with adsorption of the reactants and electrosorption. Simple analytical solutions for a Henry isotherm (Laviron, Roullier) **443**, 195
Linear sweep voltammetry in flooded porous electrodes at low sweep rates (Srikumar et al.) **458**, 161

Lippmann equation
Comments on the thermodynamics of solid electrodes (Lipkowski et al.) **452**, 193

Liquid chromatography
Electrochemically modulated liquid chromatography (EMLC) as a probe of the adsorption characteristics of monosubstituted benzenes at porous graphitic carbon (Ting, Porter) **443**, 180

Liquid hydrocarbons
Photoinjection of excess electrons into liquid hydrocarbons: a thermodynamic treatment (Schiller et al.) **450**, 21

Liquid|liquid interface
Electrochemical extraction of heavy metal ions assisted by cyclic thioether ligands (Lagger et al.) **451**, 29

Liquid membranes
Electrochemical studies of ion transfer at micro-machined supported liquid membranes (Beriet, Girault) **444**, 219

Liquid mercury
Molecular dynamics study of alkali cations at the water|liquid mercury interface (Tóth) **443**, 73

Lithium batteries
Novel water-borne polyurethane based electrolytes for lithium batteries—(I) tailor-made polymer (Cheng, Wen) **459**, 99
Loaded ionomer
Enhanced rate of the redox reaction of indigodisulfonate at electrodes coated with poly[1-methyl-3-(pyrrol-1-yl-methyl)pyridinium]chloride films (Komura et al.) **454**, 145
Loading
Effect of temperature on electrolytic loading of hydrogen into palladium (Bernardini et al.) **453**, 221
Low [electrolyte]/[analyte] ratios
Potential measurements in steady state voltammetry at low electrolyte/analyte concentration ratios. Role of convection on ohmic drop: a simplified model (Bento et al.) **446**, 91
Low temperature
Low-temperature ionic conductivity of relevant solutions and of SiO_2 gels before and after exchanges in propylene carbonate solutions (Wasiucionek, Breiter) **443**, 117
Low temperatures
Study of the $Cu|Cu(NO_3)_2||bru|\cdot||bru|H_2O|Cu$ electrochemical thermocouple at low temperatures (Szabó, Földesi) **452**, 107
Lumiflavin
Adsorbed lumiflavin at mercury electrode surfaces (McGarvey et al.) **456**, 71
Luminescent probes
Steady-state and time-resolved fluorescence spectroscopic probing of microstructures and properties of perfluorinated polyelectrolyte membranes (Bunker et al.) **459**, 15
Lysine
Electrochemical and in situ FTIR studies on the adsorption and oxidation of glycine and lysine in alkaline medium (Ogura

Macrocyclic cobalt(III) complexes
Multistep one-electron photoelectrocatalytic reduction of oxygen at tris(2,2′-bipyridine)ruthenium(II)-incorporated Nafion®- and clay-coated electrodes in the presence of macrocyclic cobalt(III) complexes (Gobi, Ramaraj) **449**, 81
Macromolecular complexation
Amalgamation effects in reverse pulse polarography at spherical electrodes. Influence on speciation measurements (Galceran et al.) **442**, 151
Influence of the adsorption phenomena on the NPP and RPP limiting currents for labile metal-macromolecule systems (Puy et al.) **457**, 229
Manganese
Manganese-doped fullerene film electrodes (Szücs et al.) **442**, 59
Marcus theory
Use of sensitivity analysis methods in the modelling of electrochemical transients .Part 1. Gaining more insight into the behaviour of kinetic models (Bieniasz, Speiser) **441**, 271
MAS NMR
SPES, 6Li MAS NMR, and Ni^{3+} EPR evidence for the formation of Co^{2+}-containing spinel phases in $LiCoO_2$ cycled electrode materials (Alcántara et al.) **454**, 173
Mass transfer
Modeling of the cathode layer in the case of zinc electrolysis from aminoacetate electrolyte (Kublanovsky, Belinsky) **455**, 247
Mass transport
Investigation of the mass transport of electroactive compounds in an SPE membrane used for electro-organic synthesis (Jiang et al.) **446**, 159
Mass transport processes
Clay-modified electrodes as studied by the quartz crystal microbalance: redox processes of ruthenium and iron complexes (Yao et al.) **443**, 253
MCFC
Surface modification of a MCFC anode by electrodeposition of niobium (Baizeng et al.) **441**, 1
The mechanism of surface modification of a MCFC anode (Fang et al.) **441**, 65
MCM-41
Voltammetric in situ investigation of an MCM-41-modified carbon paste electrode—a new sensor (Walcarius et al.) **453**, 249
MD simulation
MD simulation of water at imperfect platinum surfaces. III. Hydrogen bonding (Nagy, Denuault) **450**, 159
Mechanism of electrode reactions
Reaction mechanism and partial charge transfer of $Tl|Tl^+$-systems studied by impedance spectroscopy (SSSS method). Part 1. The $Tl(Hg)|Tl^+$-reaction in the presence of SCN^- (Salié) **447**, 211
Mediated electrocatalysis
Electrochemical monitoring of in vivo reconstitution of glucose dehydrogenase in *Escherichia coli* cells with externally added pyrroloquinoline quinone (Ikeda et al.) **449**, 219
Mediated catalytic current for the oxidation of ethanol produced by Acetobacter aceti cells suspended in solution (Ikeda et al.) **440**, 265
Melinex
Amperometric ion sensors based on laser-patterned composite polymer membranes (Lee et al.) **440**, 73
Membrane characterization
Characterization of novel activated composite membranes by impedance spectroscopy (Benavente et al.) **451**, 173
Membrane-covered electrode
Analytical solution for the steady-state diffusion towards an inlaid disc microelectrode in a multi-layered medium (Galceran et al.) **440**, 1
Influence of Nafion® film on the kinetics of anodic hydrogen oxidation (Maruyama et al.) **447**, 201
Rotating ring-disk electrode study on the cathodic oxygen reduction at Nafion®-coated gold electrodes (Maruyama et al.) **458**, 175
Membrane model
Electron and proton transferring properties of vitamin K_1 across a self-assembled phospholipid monolayer (Herrero et al.) **445**, 71
2-Mercaptobenzimidazole
The influence of heterocyclic thiols on the electrodeposition of Cu on Au(111) (Whelan et al.) **441**, 109
2-Mercaptobenzothiazole
The influence of heterocyclic thiols on the electrodeposition of Cu on Au(111) (Whelan et al.) **441**, 109
3-Mercaptopropionic acid
Phase separation of binary self-assembled thiol monolayers composed of 1-hexadecanethiol and 3-mercaptopropionic acid on Au(111) studied by scanning tunneling microscopy and cyclic voltammetry (Hobara et al.) **444**, 113
6-Mercaptopurine
Characterization of 6-mercaptopurine monolayers on Hg surfaces (Sevilla et al.) **442**, 107
The direct electrochemistry of cytochrome *c* at a hanging mercury drop electrode modified with 6-mercaptopurine (Sevilla et al.) **451**, 89
6-Mercaptopurine-9-D-riboside
Ligand-catalysed metal ion reduction. Voltammetric determination of rate and formation constants for the nickel complex with 6-mercaptopurine-9-D-riboside (Ion et al.) **444**, 11
Mercury
A comparative kinetic investigation of ethylcinnamate electrohydrodimerization on mercury and liquid gallium (Pezzatini et al.) **444**, 261
Alkanethiol monolayers and alkanethiol|phospholipid bilayers supported by mercury: an electrochemical characterization (Buoninsegni et al.) **452**, 33

Effects of mercury electrodeposition on the surface degradation of microlithographically fabricated iridium ultramicroelectrodes (Nolan, Kounaves) **453**, 39

Mercury electrode

Impedance voltammetry of electro-dimerization mechanisms: application to the reduction of the methyl viologen di-cation at mercury electrodes and aqueous solutions (Rueda et al.) **443**, 227

Surface and interfacial behaviour of 3-acetylopyridine (Słojkowska et al.) **442**, 83

The direct electrochemistry of cytochrome *c* at a hanging mercury drop electrode modified with 6-mercaptopurine (Sevilla et al.) **451**, 89

The effect of the interfacial potential distribution on the reduction of adsorbed methylene blue at a mercury electrode (Honeychurch) **445**, 63

Mercury electrode surface

Adsorbed lumiflavin at mercury electrode surfaces (McGarvey et al.) **456**, 71

Mercury phase

Interaction of chromium atoms with other metals (Zn, Mn, Tl, Pb and Cu) in the mercury phase (Paklepa, Wrona) **453**, 205

Mesoporous silica

Voltammetry of phosphotungstic acid immobilized in templated silica gel (Holmstrom et al.) **456**, 239

Metal

The role of metal and solvent in the structure of the electrode|surface-inactive electrolyte solution interface (Bagotskaya et al.) **448**, 229

Metal centered

Spectral and electrocatalytic studies for unusual oxidation and reduction states of chromium porphyrins in aqueous solutions (Lu, Su) **446**, 25

Metal complexation

Electrochemical extraction of heavy metal ions assisted by cyclic thioether ligands (Lagger et al.) **451**, 29

Metal electrodes

A note on the surface stress and tension of solid metal electrodes (Schmickler, Leiva) **453**, 61

Metal extraction

Spectroelectrochemical study of the copper(II) transfer assisted by 6,7-dimethyl-2,3-di(2-pyridyl)quinoxaline at the water|1,2-dichloroethane interface (Tomaszewski et al.) **453**, 171

Metal ions

Metal deposition near the tip of a scanning tunneling microscope (Divisek et al.) **440**, 169

Metal reduction

Kinetic studies on the electron transfer between bacterial c-type cytochromes and metal oxides (Lojou et al.) **452**, 167

Metallothionein-related peptide

Electrochemical study of a metallothionein related peptide in the presence of zinc using cyclic voltammetry (Harlyk et al.) **451**, 267

Metallothioneins

Electrochemical study of metallothioneins using cyclic voltammetry (Harlyk et al.) **458**, 199

Metamitron

Electrochemical reduction of metamitron (Ludvík et al.) **457**, 177

Metathesis reaction

Ionic liquid–polymer gel electrolytes from hydrophilic and hydrophobic ionic liquids (Fuller et al.) **459**, 29

Methanol

An impedance and chronocoulometric study of the adsorption of chloride and bromide ions on bismuth single crystal planes from solutions in methanol (Väärtnõu, Lust) **445**, 165

In situ FTIRS study of the electrocatalytic oxidation of carbon monoxide and methanol at platinum–ruthenium bulk alloy electrodes (Kabbabi et al.) **444**, 41

Mechanistic and fuel-cell implications of a tristable response in the electrochemical oxidation of methanol (Schell) **457**, 221

Methanol electrolyte

Electrochemical reduction of CO_2 on Au in KOH + methanol at low temperature (Kaneco et al.) **441**, 215

Methanol oxidation

Comparison of methanol oxidations on Pt, Pt|Ru and Pt|Sn electrodes (Morimoto, Yeager) **444**, 95

Effect of particle size on the electrocatalysis by carbon-supported Pt electrocatalysts: an in situ XAS investigation (Mukerjee, McBreen) **448**, 163

Kinetic and mechanistic study of methanol oxidation on a Pt(100) surface in alkaline media (Tripković et al.) **448**, 173

Methyl orange

Potential-modulated reflectance spectroscopy of the methyl orange transfer across the water|1,2-dichloroethane interface (Fermín et al.) **447**, 125

N-Methyl substitution

Effects of ligand structure on the adsorption of nickel tetraazamacrocyclic complexes and electrocatalytic CO_2 reduction (Bujno et al.) **445**, 47

Methyl viologen di-cation

Impedance voltammetry of electro-dimerization mechanisms: application to the reduction of the methyl viologen di-cation at mercury electrodes and aqueous solutions (Rueda et al.) **443**, 227

N,*N*′-Methylenebisacrylamide

Electrochemistry of Ru (EDTA) coordinated to pyridine group within thermoresponsive gel films (Iwaku et al.) **442**, 27

Methylene blue

The effect of the interfacial potential distribution on the reduction of adsorbed methylene blue at a mercury electrode (Honeychurch) **445**, 63

Methylene groups

Self-assembly and catalytic properties of 1,1′-bridged-2,2′-dipyridinium amphiphiles (Judkins et al.) **451**, 39

4-Methylstyrene

Chemical deposition of foreign metals on a Pd sheet and its application to continuous hydrogenation of 4-methylstyrene (Yoshida et al.) **444**, 203

Methylviologen

Frequency dependence of the electroreflectance signal for redox reaction of solution-phase species at the electrode surface: formulation and experimental verification (Sagara et al.) **454**, 75

Micro ITIES

Electrochemical characteristics of the microhole ITIES (Murtomäki, Kontturi) **449**, 225

Microdisc

An accurate microdisc simulation model for recessed microdisc electrodes (Bartlett, Taylor) **453**, 49

Microdisc electrodes

An exponentially expanding mesh ideally suited to the fast and efficient simulation of diffusion processes at microdisc electrodes. 3. Application to voltammetry. (Gavaghan) **456**, 25

An exponentially expanding mesh ideally suited to the fast and efficient simulation of diffusion processes at microdisc electrodes. 2. Application to chronoamperometry (Gavaghan) **456**, 13

Microelectrode

A novel electrochemical method for simultaneously measuring diffusion coefficient and ion transference number (Zhou et al.) **443**, 1

A study on the diffusion of quinhydrone in polymer electrolyte (Dong et al.) **441**, 95

Carbon fiber microelectrodes for adsorptive stripping analysis of trace nucleic acids (Wang et al.) **441**, 167

Electrochemical studies of tricyclopentadienyl uranium IV chloride complexes: $(RCp)_3UCl$ ($RCp = RC_5H_4$ with R = H; Me: CH_3; tBu: $(CH_3)_3C$); TMS: $(CH_3)_3Si$). Evidence of a disproportionation mechanism in oxidation (Clappe et al.) **448**, 95

Effect on electrochemistry of hexacyanoferrate at carbon fibers after pretreatment with titanium chloride (de Carvalho et al.) **457**, 83
The application of the concept of reaction layer to the study of electrode processes coupled with the second-order chemical reactions at microelectrodes under steady-state conditions (Zhuang, Sun) **440**, 103
Voltammetry of hydroxide ion in aqueous solutions on gold microelectrodes (Abdelsalam et al.) **449**, 5
Microelectrode arrays
Diffusion controlled growth of hemispheres in ordered arrays (Scharifker) **458**, 253
Microelectrodes
Electrochemical nucleation on microelectrodes. Theory and experiment for diffusion-controlled growth (Heerman, Tarallo) **451**, 101
General analytical solution for a catalytic mechanism in potential step techniques at hemispherical microelectrodes: Applications to chronoamperometry, cyclic staircase voltammetry and cyclic linear sweep voltammetry (Molina et al.) **454**, 15
Microelectrode voltammetry for the simultaneous reduction of labile complexes of two divalent cations in aqueous solutions with and without supporting electrolyte (Daniele et al.) **456**, 105
Microgravimetry
Microgravimetric monitoring of transport of cations during redox reactions of indium(III) hexacyanoferrate(III,II). Radiotracer evidence for the flux of anions in the film (Malik et al.) **452**, 57
Microinterface
Electrochemical studies of ion transfer at micro-machined supported liquid membranes (Beriet, Girault) **444**, 219
Microparticles
Stripping chronopotentiometry of immobilized microparticles (Komorsky-Lovrić, Scholz) **445**, 81
Micropores
Molecular simulation of electrolytes in nanopores (Lo et al.) **450**, 265
Microwave reflectivity
Photocurrent and excess microwave reflectivity at semiconductor|electrolyte junctions .I. Minority carrier profiles (Schlichthörl, Lewerenz) **443**, 9
Migration
Microelectrode voltammetry for the simultaneous reduction of labile complexes of two divalent cations in aqueous solutions with and without supporting electrolyte (Daniele et al.) **456**, 105
Moving front phenomena in the switching of conductive polymers (Lacroix et al.) **444**, 83
Mild steel
Characterization of polyaniline films electrodeposited on mild steel in aqueous *p*-toluenesulfonic acid solution (Camalet et al.) **445**, 117
Mixed systems
Applicability of the modified Pitzer equations to the fitting of activity coefficients in electrolyte-aminoacid aqueous mixtures: the case of NaCl + β-Alanine at 298.15 K (Raposo et al.) **454**, 59
Mixed-valence heteropolyanion $PMo_{12}O_{40}^{n-}$
Electrochemical and in-situ UV-visible-near-IR and FTIR spectroelectrochemical characterisation of the mixed-valence heteropolyanion $PMo_{12}O_{40}^{n-}$ ($n = 4, 5, 6, 7$) in aprotic media (Sun et al.) **455**, 57
Mixture of metal ions
Microelectrode voltammetry for the simultaneous reduction of labile complexes of two divalent cations in aqueous solutions with and without supporting electrolyte (Daniele et al.) **456**, 105
Mixtures of water with propan-2-ol
Conductivity properties and potentiometric studies of NaBr solutions in mixtures of water with propan-2-ol at 298.15 K (Gregorowicz et al.) **452**, 63
Model
A theory for amalgam forming electrode reactions (Koper, Schmickler) **450**, 83
Model reduction
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 2. Model expansion and model reduction (Bieniasz et al.) **447**, 173
Modified carbon paste electrodes
Voltammetric in situ investigation of an MCM-41-modified carbon paste electrode—a new sensor (Walcarius et al.) **453**, 249
Modified electrode
C_{60}-mediated bioelectrocatalyzed oxidation of glucose with glucose oxidase (Patolsky et al.) **454**, 9
Electrochemistry of zeolite-encapsulated complexes: new observations (Briot et al.) **454**, 83
Effect of time scale on redox-driven ion and solvent transfers at nickel hydroxide films in aqueous lithium hydroxide solutions (Gonsalves, Hillman) **454**, 183
The electrocatalytic activity of Prussian blue in hydrogen peroxide reduction studied using a wall-jet electrode with continuous flow (Karyakin et al.) **456**, 97
Voltammetric behaviour and electrocatalytic activity of the aluminum electrode modified with nickel and nickel hexacyanoferrate films, prepared by electroless deposition (Pournaghi-Azar, Razmi-Nerbin) **456**, 83
Modified electrodes
Characterizations of iron-rich clay modified electrodes and their applications in optical recognition (Shyu, Wang) **440**, 27
Electrochemistry of ITO and gold electrodes covalently modified with dithizone and the effect of Cu(II) and Pb(II) ions (Mirkhalaf et al.) **452**, 203
Electroreductive coating of electrodes from soluble polypyrrole-ruthenium (II) complexes: ion modulation effects on their electroactivity (Deronzier et al.) **453**, 179
New electroactive metal oxides electrodeposited from selected Keggin and Dawson-type heteropolyanions (Keita et al.) **443**, 168
Molecular dynamics
Adsorption of water molecules in slit pores (Spohr et al.) **450**, 281
Computer simulation of electron transfer processes across the electrode|electrolyte interface: a treatment of solvent and electrode polarizability (Calhoun, Voth) **450**, 253
MD studies of electrolyte solution|liquid mercury interfaces (Bopp, Heinzinger) **450**, 165
Molecular dynamics simulation of the water|nitrobenzene interface (Michael, Benjamin) **450**, 335
Molecular dynamics study of alkali cations at the water|liquid mercury interface (Tóth) **443**, 73
Molecular simulation of electrolytes in nanopores (Lo et al.) **450**, 265
On the dynamics of electrochemical ion-transfer reactions (Pecina, Schmickler) **450**, 303
Molecular dynamics computer simulation
Structure and dynamics of water at water|Pt interface as seen by molecular dynamics computer simulation (Yeh, Berkowitz) **450**, 313
Molecular recognition
Electrochemical molecular recognition by thin films of ether-substituted polythiophenes (Goldenberg et al.) **447**, 1
Molten carbonate
Dissolution of partially immersed nickel during in situ oxidation in molten carbonate: cyclic, stripping and square wave voltammetry measurements (Yazici, Selman) **457**, 89
Molten chlorides
A chemical and electrochemical study of titanium ions in the molten equimolar $CaCl_2$ + NaCl mixture at 550°C. (Martínez et al.) **449**, 67

Molybdenum
New electroactive metal oxides electrodeposited from selected Keggin and Dawson-type heteropolyanions (Keita et al.) **443**, 168
Monochloramine
Electrode processes of chloramines in aqueous solutions (Wrona) **453**, 197
Monomolecular adlayer
A primitive model for hexamethylpararosaniline (crystal violet) monomolecular adlayer: a Monte Carlo simulation study (Batina et al.) **450**, 213
Monosubstituted benzenes
Electrochemically modulated liquid chromatography (EMLC) as a probe of the adsorption characteristics of monosubstituted benzenes at porous graphitic carbon (Ting, Porter) **443**, 180
Monte Carlo simulation
A fractal feature of the conducting zone by conversion rates from any redox state into the fully conducting state of polyaniline films (Aoki, Teragishi) **441**, 25
A lattice-gas model for halide adsorption on single-crystal electrodes (Koper) **450**, 189
Embedded atom method study of Cu deposition on Ag(111) (Del Pópolo, Leiva) **440**, 271
The potential of mean force on halide ions near the Cu(100) surface (Ignaczak et al.) **450**, 175
Monte Carlo simulation study
A primitive model for hexamethylpararosaniline (crystal violet) monomolecular adlayer: a Monte Carlo simulation study (Batina et al.) **450**, 213
Montmorillonite film
Electrochemical behavior of acid activated montmorillonite modified electrodes (Falaras, Lezou) **455**, 169
Morphology
The electrochemistry of fluorine-substituted polyphenylthiophenes for charge storage applications (Gofer et al.) **443**, 103
Mott–Schottky analysis
Mott–Schottky analysis of polycrystalline copper(I) bromide in aqueous electrolytes (Knauth, Massiani) **442**, 229
Moving front
Moving front phenomena in the switching of conductive polymers (Lacroix et al.) **444**, 83
Multilayer oxide films
Multicomponent hydrous oxide films grown on gold in acid solution (Burke, Nugent) **444**, 19
Multilevel species
A theory for electron transfer between an electrode and a multilevel acceptor/donor species in an electrolyte solution (Boroda, Voth) **450**, 95
Multiplicity of states
Large signal (global) analysis of non-linear response of electrocatalytic reaction. I. Multiple steady states (Sadkowski) **447**, 97
Multipotential step
Analytical solution corresponding to the i/t response to a multipotential step for a catalytic mechanism (Molina) **443**, 163
General analytical solution for a catalytic mechanism in potential step techniques at hemispherical microelectrodes: Applications to chronoamperometry, cyclic staircase voltammetry and cyclic linear sweep voltammetry (Molina et al.) **454**, 15
Multistable
Mechanistic and fuel-cell implications of a tristable response in the electrochemical oxidation of methanol (Schell) **457**, 221
Multistep electrode processes
The application of the concept of reaction layer to the study of electrode processes coupled with the second-order chemical reactions at microelectrodes under steady-state conditions (Zhuang, Sun) **440**, 103
Multistep mechanisms
Electrochemical impedance of multistep mechanisms: a general theory (Harrington) **449**, 9
Electrochemical impedance of multistep mechanisms: mechanisms with static species (Harrington) **449**, 29
Myoglobin
Spectroelectrochemical and electrochemical determination of ligand binding and electron transfer properties of myoglobin, cyanomyoglobin, and imidazolemyoglobin (Cohen et al.) **447**, 53

Na^+
Ion pair formation between the electrogenerated 2,3-dichloro-5,6-dicyoano-1,4-benzoquinone dianion and the sodium ion at platinum surfaces (Oyamo et al.) **451**, 193
NaBr solutions
Conductivity properties and potentiometric studies of NaBr solutions in mixtures of water with propan-2-ol at 298.15 K (Gregorowicz et al.) **452**, 63
NaCl
Computer simulation of the structure of the electrochemical double layer (Spohr) **450**, 327
NAD^+/NADH
Electrochemical regeneration of coenzyme NADH on a histidine modified silver electrode (Long, Chen) **440**, 239
NAD-dependent enzyme
Mediated bioelectrocatalysis based on NAD-related enzymes with reversible characteristics (Takagi et al.) **445**, 211
Nanocrystalline materials
Electrochemical behavior of nanocrystalline Ti_2RuFe alloy prepared by high energy ball-milling (Roué et al.) **455**, 83
Nanocrystalline microporous TiO_2
Effect of electron and hole acceptors on the photoelectrochemical behaviour of nanocrystalline microporous TiO_2 electrodes (Poznyak et al.) **442**, 99
Nanotubes
Protein electrochemistry at carbon nanotube electrodes (Davis et al.) **440**, 279
Nafion®
A comparative study of the impedance properties of glassy-carbon electrodes covered with poly(styrenesulphonate) and Nafion® films containing $Os(bpy)_3^{3+/2+}$ redox sites (Sharp, Åberg) **449**, 137
Electrochemical impedance studies of hybrids of perfluorosulfonic acid ionomer and silicon oxide by sol-gel reaction from solution (Zoppi, Nunes) **445**, 39
Enhancing effect of amino acid residue models on the charge transfer in a Nafion® film incorporating $Ru(bpy)_3^{2+}$ complex (Zhang et al.) **445**, 109
High frequency dielectric studies of hydrated Nafion® (Paddison et al.) **459**, 91
Influence of Nafion® film on the kinetics of anodic hydrogen oxidation (Maruyama et al.) **447**, 201
Multistep one-electron photoelectrocatalytic reduction of oxygen at tris(2,2′-bipyridine)ruthenium(II)-incorporated Nafion®- and clay-coated electrodes in the presence of macrocyclic cobalt(III) complexes (Gobi, Ramaraj) **449**, 81
Rationalisation of time-dependent and voltage-dependent electroactivity in Nafion®/$Os(bpy)_3^{3+/2+}$ films in terms of a model that assumes restricted counterion access to non-equivalent redox sites (Åberg, Sharp) **449**, 121
Rotating ring-disk electrode study on the cathodic oxygen reduction at Nafion®-coated gold electrodes (Maruyama et al.) **458**, 175
Solid-state electrochemical oxygen reduction at Pt | Nafion® 117 and Pt | BAM3G(TM) 407 interfaces (Basura et al.) **458**, 1

Steady-state and time-resolved fluorescence spectroscopic probing of microstructures and properties of perfluorinated polyelectrolyte membranes (Bunker et al.) **459**, 15
Studies on ion-exchange membranes. II. Measurement of the anisotropic conductance of Nafion® (Gardner, Anantaraman) **449**, 209
Surface reconstruction at metal|solid polymer electrolyte interfaces: Au(111)|Nafion® interface (Wang, Adžić) **448**, 205
Nafion® membrane
Investigation of the mass transport of electroactive compounds in an SPE membrane used for electro-organic synthesis (Jiang et al.) **446**, 159
Temperature dependence in charge hopping between redox centers in a polymer membrane as studied by potential-step chronocoulospectrometry (Yagi et al.) **448**, 131
Naphthalene disulfide
Impedance analysis of self-assembled naphthalene disulfide monolayer on gold using external redox probes (Bandyopadhyay et al.) **447**, 11
Natural convection
Determination of the electroactive area of graphite + polyethylene composite electrodes. Uncompensated resistance effects and convolution analysis of chronoamperograms (Navarro-Laboulais et al.) **443**, 41
Nearly neutral media
Study of nickel upd at a polycrystalline Pt electrode and its influence on HCOOH oxidation in acidic and nearly neutral media (El-Shafei) **447**, 81
Nernst diffusion layer
Voltammetric modelling via extended semiintegrals (Mahon, Oldham) **445**, 179
Nernst–Planck and Poisson equations
A study of the electrical properties of permselective membranes with symmetric, reversible interfacial processes using the network method (Moya, Horno) **459**, 145
Network method
A study of the electrical properties of permselective membranes with symmetric, reversible interfacial processes using the network method (Moya, Horno) **459**, 145
Neurotransmitters
In situ AFM/STM characterization of porphyrin electrode films for electrochemical detection of neurotransmitters (Duong et al.) **447**, 63
Ni(II) complexes
Effects of ligand structure on the adsorption of nickel tetraazamacrocyclic complexes and electrocatalytic CO_2 reduction (Bujno et al.) **445**, 47
Ni(II) films
The passivating films on nickel in alkaline solutions I. General aspects of the Ni (II) region (D'Alkaine, Santanna) **457**, 5
Ni(II) prewave
Electrocatalytic effects of deoxyribonucleic acids, adenine and guanine on the reduction of Ni(II) at a mercury electrode (Muñiz Alvarez et al.) **457**, 53
Ni + Cd alloys
Qualitative and quantitative assessment of phases in electrodeposited Ni + Cd alloys by the ALSV technique (Jović, Tošić) **441**, 69
Ni + Mo alloys
Hydrogen evolution reaction on smooth $Ni(1-x)+Mo(x)$ alloys $(0 \le x \le 0.25)$ (Gennero de Chialvo, Chialvo) **448**, 87
Nickel
Dissolution of partially immersed nickel during in situ oxidation in molten carbonate: cyclic, stripping and square wave voltammetry measurements (Yazici, Selman) **457**, 89
Thermodynamic and electrochemical behavior of nickel in molten Li_2CO_3–Na_2CO_3 modified by addition of calcium carbonate (Cassir et al.) **452**, 127
XPS and voltammetric studies on $Ni_{1-x}Cu_xCo_2O_4$ spinel oxide electrodes (Tavares et al.) **449**, 91
Nickel (II) anodic films
Passivating films on nickel in alkaline solutions II. Ni(II) anodic film growth: quantitative treatment and the influence of the OH^- concentration (D'Alkaine, Santanna) **457**, 13
Nickel (II)|Ni(III)
Oxalate-bridged dinuclear nickel azacyclam macrocyclic complexes: synthesis and electrochemical study (Taraszewska et al.) **452**, 49
Nickel complexes
Ligand-catalysed metal ion reduction. Voltammetric determination of rate and formation constants for the nickel complex with 6-mercaptopurine-9-D-riboside (Ion et al.) **444**, 11
Nickel-containing solution
Nature of the passive film formed at a zinc anode in zinc–nickel containing solutions (Velichenko et al.) **448**, 1
Nickel hexacyanoferrate
Voltammetric behaviour and electrocatalytic activity of the aluminum electrode modified with nickel and nickel hexacyanoferrate films, prepared by electroless deposition (Pournaghi-Azar, Razmi-Nerbin) **456**, 83
Nickel hydrides
Formation of nickel hydrides by hydrogen evolution in alkaline media: effect of temperature (Bernardini et al.) **457**, 205
Nickel hydroxide
Effect of time scale on redox-driven ion and solvent transfers at nickel hydroxide films in aqueous lithium hydroxide solutions (Gonsalves, Hillman) **454**, 183
Nickel polymer electrolytes
Cation mobility in poly(ethylene oxide) solid electrolytes (Plancha et al.) **442**, 91
Nickel(I) salen
Catalytic reduction of cyclohexanecarbonyl chloride with electrogenerated nickel(I) salen in acetonitrile (Bhattacharya et al.) **441**, 103
Nickel upd process
Study of nickel upd at a polycrystalline Pt electrode and its influence on HCOOH oxidation in acidic and nearly neutral media (El-Shafei) **447**, 81
Nine-member square scheme
Kinetics of redox conversion at a gold electrode of water-insoluble ubiquinone ($UQ_{(10)}$) and plastoquinone ($PQ_{(9)}$) incorporated in supported phospholipid layers (Marchal et al.) **451**, 139
Nitrate anions
Effect of inorganic cations on the electroreduction of nitrate anions on Pt|Pt electrodes in sulfuric acid solutions (Safonova, Petrii) **448**, 211
Nitric acid
The electrochemical behavior and impedance characteristics of the passive film on carbon steel in nitric acid solutions (Guo et al.) **445**, 95
Nitric oxide
Electrocatalytic reduction of NO on metal electrodes and gas diffusion electrodes in an aqueous electrolyte (Hara et al.) **451**, 181
Nitrite
Bicatalyst electrocatalytic reduction and oxidation of nitrite by Fe(II) and Cu(II) complexes in the same solution (Chen) **457**, 23
Electrochemical and electrocataiytic properties of iridium(IV)-substituted Dawson type polyoxotungstate (Sun et al.) **451**, 49
Nitrobenzene
The kinetic study on the electrolytic hydrogenation of nitrobenzene on the hydrogen-storage alloy electrode (Lu et al.) **457**, 149

4-Nitrophenyl
Electrochemical modification of a carbon electrode using aromatic diazonium salts. 2. Electrochemistry of 4-nitrophenyl modified glassy carbon electrodes in aqueous media (Ortiz et al.) **455**, 75
Nitroprusside ion
Comproportionation and disproportionation reactions in the electrochemical reduction of nitroprusside at a hanging mercury drop electrode in acidic solution (Carapuça et al.) **455**, 93
Nitroxide
Electrochemical study of ferrocene and nitroxide derivatives intercalated in Zn–Cr and Zn–Al layered double hydroxides (Therias et al.) **454**, 91
Nitroxyl radical
Reaction mechanism and kinetics of alcohol oxidation at nitroxyl radical modified electrodes (Kishioka et al.) **452**, 179
NMR and IR
Electrochemical preparation and characterization in non-aqueous electrolyte of polyaniline electrochemically prepared from an anilinium salt (Naudin et al.) **459**, 1
Nonlinear analysis
State variable approach to electrochemical dynamics (Sadkowski) **454**, 39
Non-linear phenomena
Coupling of the electrochemical oscillations from the cathode and anode in the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ system (Li et al.) **445**, 105
Nonlinear regression
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 3. Statistical error/uncertainty propagation in simulation and in nonlinear least-squares parameter estimation (Bieniasz, Speiser) **458**, 209
Non-linear regression
The use of genetic algorithms in the non-linear regression of immittance data (VanderNoot, Abrahams) **448**, 17
Non-linearity
Discontinuous immitance due to a saddle node bifurcation .I: 1-, 2- and 3-part immitance diagrams (Berthier et al.) **458**, 231
Large signal (global) analysis of non-linear response of electrocatalytic reaction. I. Multiple steady states (Sadkowski) **447**, 97
Nonlocal dielectric response
Nonlocal nonlinear static dielectric response of polar liquids (Kornyshev, Sutmann) **450**, 143
Non-steady-state chronoamperometry
A study on the diffusion of quinhydrone in polymer electrolyte (Dong et al.) **441**, 95
Normal hexanol
Adsorption of normal hexanol on bismuth single crystal plane electrodes (Lust et al.) **442**, 189
Normal pulse polarography
Electrochemical reactions with adsorption of the reactants and electrosorption. Simple analytical solutions for a Henry isotherm (Laviron, Roullier) **443**, 195
N-substituted pyrroles
Immobilisation at an electrode surface of calix[4]arenes bearing electropolymerisable pyrrole moieties at the upper rim (Buffenoir et al.) **451**, 261
Nucleation
A computer simulation model for the diffusion controlled nucleation and growth processes on electrode surfaces—a two-dimensional study (Vilaseca et al.) **458**, 55
Digital simulation of the growth of a hemispherical nucleus by diffusion limited aggregation (Heerman, Tarallo) **455**, 265
Electrochemical nucleation on active sites—what do we measure in reality? Part II (Milchev) **457**, 47
Electrochemical nucleation on microelectrodes. Theory and experiment for diffusion-controlled growth (Heerman, Tarallo) **451**, 101
Non-steady-state electrochemical nucleation under potentiostatic conditions (Isaev) **453**, 25
Spatial distribution of nuclei. Inhibition of local nucleation rates by the most influential neighbours (García-Pastoriza et al.) **441**, 13
Nucleic acids
Carbon fiber microelectrodes for adsorptive stripping analysis of trace nucleic acids (Wang et al.) **441**, 167
Nucleophilic substitution
Nucleophilic substitution reaction of 2,4-dinitrofluorobenzene with hydroxide ions at the polarized nitrobenzene|water interface (Kong, Kakiuchi) **446**, 19
Numerical evaluation of kinetic parameters
Reaction mechanism and partial charge transfer of $Tl|Tl^+$-systems studied by impedance spectroscopy (SSSS method). Part 1. The $Tl(Hg)|Tl^+$-reaction in the presence of SCN^- (Salié) **447**, 211
Nyquist impedance diagram
An ac impedance study of the anodic dissolution of iron in sulfuric acid solutions containing hydrogen sulfide (Ma et al.) **451**, 11

Occupancy
First-principles simulations of the electrode|electrolyte interface (Halley et al.) **450**, 273
OH adsorption
Kinetic and mechanistic study of methanol oxidation on a Pt(100) surface in alkaline media (Tripković et al.) **448**, 173
Ohmic drop
Apparent negative activation energy in electrochemical insulating-to-conducting conversion at polymethylthiophene films (Aoki, Li) **441**, 161
Determination of the electroactive area of graphite + polyethylene composite electrodes. Uncompensated resistance effects and convolution analysis of chronoamperograms (Navarro-Laboulais et al.) **443**, 41
Potential measurements in steady state voltammetry at low electrolyte/analyte concentration ratios. Role of convection on ohmic drop: a simplified model (Bento et al.) **446**, 91
The pseudostationary mercury electrode (Laviron, Raveau-Fouquet) **458**, 43
Ohmic heating
Fundamental principles of electrochemical ohmic heating of solutions (Amatore et al.) **457**, 191
Ohmic model
Passivating films on nickel in alkaline solutions II. Ni(II) anodic film growth: quantitative treatment and the influence of the OH^- concentration (D'Alkaine, Santanna) **457**, 13
Ohmic potential drop
Bifurcation to limit cycle oscillations induced by the ohmic potential drop during the anodic polarisation of iron in 14.8 M H_3PO_4 (Sazou, Pagitsas) **451**, 77
Optical recognition
Characterizations of iron-rich clay modified electrodes and their applications in optical recognition (Shyu, Wang) **440**, 27
Optically transparent electrodes
An electrochemical impedance and spectroelectrochemical study of the polypyrrole–flavin composite electrode (Bonazzola, Calvo) **449**, 111
Optically transparent thin layer electrode
Electrochemical and in-situ UV-visible-near-IR and FTIR spectroelectrochemical characterisation of the mixed-valence heteropolyanion $PMo_{12}O_{40}^{n-}$ ($n = 4, 5, 6, 7$) in aprotic media (Sun et al.) **455**, 57
Order–disorder transition
A lattice-gas model for halide adsorption on single-crystal electrodes (Koper) **450**, 189
Organic adsorption
The driving force for $(p \times \sqrt{3}) \leftrightarrow (1 \times 1)$ phase transition of Au(111) in the presence of organic adsorption: a combined chronocoulometric and surface X-ray scattering study (Wu et al.) **446**, 67

Organic carbonate solution
In-situ spectroelectrochemical analysis of the passivating surface film formed on a graphite electrode during the electrochemical reduction of lithium salts and organic carbonate solvent (Pyun, Ryu) **455**, 11
Organic monolayers
A primitive model for hexamethylpararosaniline (crystal violet) monomolecular adlayer: a Monte Carlo simulation study (Batina et al.) **450**, 213
Organic phase biosensor
Enhancement of biosensor sensitivity in aqueous and organic solvents using a combination of poly(pyrrole-ammonium) and poly(pyrrole-lactobionamide) films as host matrices (Cosnier et al.) **449**, 165
Organically modified silicate (ORMOSIL)
Electrochemical characterization of inorganic | organic hybrid films prepared from ferrocene modified silanes (Wang, Collinson) **455**, 127
Organized molecular assembly
Monomolecular films of a nickel(II) pentaazamacrocyclic complex for the electrocatalytic oxidation of hydrogen peroxide at gold electrodes (Gobi et al.) **444**, 145
Organometallic polymers
Electroreduction of CO_2 catalyzed by polymeric $[Ru(bpy)(CO)_2]_n$ films in aqueous media: parameters influencing the reaction selectivity (Chardon-Noblat et al.) **444**, 253
Orientation
Photocatalytic ZnO films prepared by anodizing (Yamaguchi et al.) **442**, 1
Oscillation
Oscillatory convective instability in electrochemical systems (Grigin, Davydov) **450**, 7
Oscillations
Probe beam deflection study of p-Si electrodissolution in acidic fluoride medium in the oscillating regimes (Dini et al.) **446**, 7
Osmium complexes
Osmium complexes bearing functional groups: building blocks for integrated chemical systems (Danilowicz et al.) **445**, 89
Osteryoung square wave voltammetry
Inclusion of the parent molecules of some drugs with β-cyclodextrin studied by electrochemical and spectrometric methods (Dang et al.) **448**, 61
Overpotential
Modelling the performance of the cathode catalyst layer of polymer electrolyte fuel cells (Eikerling, Kornyshev) **453**, 89
Overpotential deposition
Underpotential versus overpotential deposition: a first-principles calculation (Sánchez, Leiva) **458**, 183
Oxalate
Photoelectrochemistry of oxalate on particulate TiO_2 electrodes (Byrne, Eggins) **457**, 61
Oxamniquine
Reaction of electrogenerated oxamniquine radical anion with glutathione (Radi, Belal) **441**, 39
Oxidation
About potential measurements in steady state voltammetry at low electrolyte/analyte concentration ratios (Bento et al.) **443**, 137
Electro-oxidation of ethanol on gold: analysis of the reaction products and mechanism (Tremiliosi-Filho et al.) **444**, 31
Electrochemical and in situ FTIR studies on the adsorption and oxidation of glycine and lysine in alkaline medium (Ogura et al.) **449**, 101
Electrochemical oxidation of NADH on sol–gel derived, surface renewable, non-modified and mediator modified composite-carbon electrodes (Sampath, Lev) **446**, 57
Mechanistic approach to the oxidation of phenol at a platinum/gold electrode in an acid medium (Iotov, Kalcheva) **442**, 19
Oxidation of alcohol
Reaction mechanism and kinetics of alcohol oxidation at nitroxyl radical modified electrodes (Kishioka et al.) **452**, 179
Oxidation of HCOOH
Study of nickel upd at a polycrystalline Pt electrode and its influence on HCOOH oxidation in acidic and nearly neutral media (El-Shafei) **447**, 81
Oxides
Electrochemical deposition and properties of $PbO_2 + Co_3O_4$ composites (Musiani et al.) **440**, 131
Oxidised state
Electrogeneration of conducting poly(2,5-di-(-2-thienyl)-furan) (Brillas et al.) **445**, 125
Oxocarbon
Surface cleavage of oxocarbons to CO adspecies on Pt(111) electrodes induced by metal adatoms (Carbó et al.) **449**, 193
Oxometalates
New electroactive metal oxides electrodeposited from selected Keggin and Dawson-type heteropolyanions (Keita et al.) **443**, 168
Oxygen
A mathematical model for anodic oxygen-transfer reactions at Bi(V)-doped PbO_2-film electrodes (Popović et al.) **456**, 203
Molecular simulation of oxygen on supported platinum clusters (Wu, Chan) **450**, 225
Oxygen and ozone evolution
Lead dioxide electrodeposition and its application: influence of fluoride and iron ions (Velichenko et al.) **454**, 203
Oxygen electroreduction
A theoretical study of the electrochemical reduction of oxygen (Bockris, Abdu) **448**, 189
Oxygen evolution reaction
Electrochemical deposition and properties of $PbO_2 + Co_3O_4$ composites (Musiani et al.) **440**, 131
Oxygen reduction
Electron and proton transport in gas diffusion electrodes containing electronically conductive proton-exchange polymers (Qi et al.) **459**, 9
Effects of carbon electrode surface states for the electro-reduction of (hmc)$CoOOH^{2+}$ which is an intermediate during the catalytic reduction of O_2 (Kang) **452**, 161
Multistep one-electron photoelectrocatalytic reduction of oxygen at tris(2,2′-bipyridine)ruthenium(II)-incorporated Nafion®- and clay-coated electrodes in the presence of macrocyclic cobalt(III) complexes (Gobi, Ramaraj) **449**, 81
Rotating ring-disk electrode study on the cathodic oxygen reduction at Nafion®-coated gold electrodes (Maruyama et al.) **458**, 175
Solid-state electrochemical oxygen reduction at Pt | Nafion® 117 and Pt | BAM3G(TM) 407 interfaces (Basura et al.) **458**, 1

Pair distributions
Mechanisms behind concentration profiles illustrated by charge and concentration distributions around ions in double layers (Kjellander, Greberg) **450**, 233
Palladium
Effect of temperature on electrolytic loading of hydrogen into palladium (Bernardini et al.) **453**, 221
Palladium membrane cathode
Characterization of surface poisoning on a Pd cathode using hydrogen isotopes (Muto et al.) **457**, 99
Parameter estimation
Use of sensitivity analysis methods in the modelling of electrochemical transients .Part 3. Statistical error/uncertainty propagation in simulation and in nonlinear least-squares parameter estimation (Bieniasz, Speiser) **458**, 209

Parsons–Zobel plot
The Parsons–Zobel plot for systems of suspended particles: a specific experimental test (De Faria, Trasatti) **448**, 159
Partial charge transfer
Fluctuational self-consistency of the theory of the elementary act of electrochemical reactions in the neighbourhood of the equilibrium state (Grafov et al.) **450**, 55
Reaction mechanism and partial charge transfer of $Tl|Tl^+$-systems studied by impedance spectroscopy (SSSS method). Part 1. The $Tl(Hg)|Tl^+$-reaction in the presence of SCN^- (Salié) **447**, 211
Partial current density
Electrochemical reduction of CO_2 on single crystal electrodes of silver Ag(111), Ag(100) and Ag(110) (Hoshi et al.) **440**, 283
Particle size
Effect of particle size on the electrocatalysis by carbon-supported Pt electrocatalysts: an in situ XAS investigation (Mukerjee, McBreen) **448**, 163
Passivation
In-situ spectroelectrochemical analysis of the passivating surface film formed on a graphite electrode during the electrochemical reduction of lithium salts and organic carbonate solvent (Pyun, Ryu) **455**, 11
The passivating films on nickel in alkaline solutions I. General aspects of the Ni (II) region (D'Alkaine, Santanna) **457**, 5
Passive film
An AFM study of the properties of passive films on iron surfaces (Li, Meier) **454**, 53
Passive layer formation
Simulation of growth and corrosion during the formation of a passive layer (Lafage et al.) **450**, 203
Passivity
Thin indium oxide film formation and growth: Impedance spectroscopy and cyclic voltammetry investigations (Metikoš-Huković, Omanović) **455**, 181
Passivity theories
Passivating films on nickel in alkaline solutions II. Ni(II) anodic film growth: quantitative treatment and the influence of the OH^- concentration (D'Alkaine, Santanna) **457**, 13
Pb deposition
Electrochemistry at boron-doped diamond films grown on graphite substrates: redox-, adsorption and deposition processes (Goeting et al.) **442**, 207
PbO films
Effect of anions on the electrochemical behavior of Pb electrodes in alkaline solutions and on the anodic oxide film properties (Veluchamy, Minoura) **440**, 41
PbO_2-film electrodes
Electrocatalytic function of Bi(V) sites in heavily-doped PbO_2-film electrodes applied for anodic detection of selected sulfur compounds (Popovic et al.) **455**, 153
Pd | H electrode
Voltammograms of thin layer Pd | H(D) electrodes in the coexistence of α and β phases (Zhang et al.) **458**, 107
Pd|H electrode
A numerical approach to the voltammograms of a thick plate Pd|H electrode (Zhang, Zhang) **445**, 55
Pd | H system
Voltammograms of thin layer Pd | H(D) electrodes in the coexistence of α and β phases (Zhang et al.) **458**, 107
Pd|H system
A numerical approach to the voltammograms of a thick plate Pd|H electrode (Zhang, Zhang) **445**, 55
Pd sheet electrode
Chemical deposition of foreign metals on a Pd sheet and its application to continuous hydrogenation of 4-methylstyrene (Yoshida et al.) **444**, 203
Pd sheet electrodes
Catalytic reduction of carbon dioxide with atomic hydrogen permeating through palladized Pd sheet electrodes (Iwakura et al.) **459**, 167
Peak current density
Characterization of the microelectrode behaviour in metal electrodeposition by computation of linear potential sweep voltammetry (Stasiukaitis, Skominas) **459**, 121
Peak overpotential
Characterization of the microelectrode behaviour in metal electrodeposition by computation of linear potential sweep voltammetry (Stasiukaitis, Skominas) **459**, 121
Peltier coefficient
Photocorrosion of polycrystalline CdSe in aqueous KOH: an in situ study by photocalorimetry (Dohrmann, Reck) **452**, 215
PEMFC
Influence of Nafion® film on the kinetics of anodic hydrogen oxidation (Maruyama et al.) **447**, 201
Peptidic fragment
Electrochemical behaviour of a metallothionein related peptide in the presence of cadmium using cyclic voltammetry (Harlyk et al.) **446**, 139
Percarbonates
Electrochemical reduction of carbonate solutions at low temperatures (Osetrova et al.) **453**, 239
Perchloric acid
Electrochemical quartz crystal microbalance study of copper adatoms on Au(111) electrodes in solutions of perchloric and sulfuric acid (Uchida et al.) **452**, 97
Percolation
Electrochemical impedance spectroscopy of conductor–insulator composite electrodes: properties in the blocking and diffusive regimes (Navarro-Laboulais et al.) **444**, 173
Periodic current signals
Evaluation of the surface area of RuO_2 electrodes by periodic current signals (Fernández et al.) **457**, 109
Permeability
Alkanethiol monolayers and alkanethiol|phospholipid bilayers supported by mercury: an electrochemical characterization (Buoninsegni et al.) **452**, 33
Analytical solution for the steady-state diffusion towards an inlaid disc microelectrode in a multi-layered medium (Galceran et al.) **440**, 1
Characterization of polymeric films derived from α- and β-substituted *N*-vinylpyrroles (DuBois Jr, McCarley) **454**, 99
Permselective membrane
A preliminary study of room temperature direct ethyl formate fuel cells for consumer electronic applications (Chen, Tseung) **451**, 1
Peroxidase
Kinetic analysis of electron transfer from a graphite coating to horseradish peroxidase (Tatsuma et al.) **446**, 205
Peroxidase orientation
Comparison of rotating disk and wall-jet electrode systems for studying the kinetics of direct and mediated electron transfer for horseradish peroxidase on a graphite electrode (Lindgren et al.) **458**, 113
Peroxide determination
Silica sol-gel immobilized amperometric enzyme electrode for peroxide determination in the organic phase (Li et al.) **448**, 69
Perylene
Electrochemical behaviour of different binaphthalene crown ethers. .Part 2: Novel strategy based on in situ removable bromine atom protecting groups for the electrosynthesis of polybinaphthalenes bearing perylene crown ethers as potentially redox switchable macromolecular hosts (Belloncle et al.) **444**, 101
Pesticides
Electrochemical reduction of metamitron (Ludvík et al.) **457**, 177

pH
Selective electrocatalysis of alkene oxidations in aqueous media. Electrochemical and spectral characterization of oxo-ferryl porphyrin, oxo-ferryl porphyrin radical cation and their reaction products with alkenes at room temperature (Liu, Su) **452**, 113
pH control
Electrochemically pH-controllable 3-substituted polythiophene films (Li, Aoki) **458**, 155
pH effect
Influence of dopant, pH and potential on the spectral changes of poly(*o*-methoxyaniline): relationship with the redox processes (Gazotti Jr. et al.) **440**, 193
pH electrode
Electrochemical deposition of iridium(IV) oxide from alkaline solutions of iridium(III) oxide (Baur, Spaine) **443**, 208
pH-microsensor
Mechanistic studies of electrodeposition for bioceramic coatings of calcium phosphates by an in situ pH-microsensor technique (Zhang et al.) **452**, 235
Phase distribution
Qualitative and quantitative assessment of phases in electrodeposited Ni + Cd alloys by the ALSV technique (Jović, Tošić) **441**, 69
Phase transition
Diffuse layer effect and effect of curvature on the mechanism and the properties of phase transitions at electrified interfaces (Nikitas) **446**, 165
Effect of the crystallographic orientation of gold single-crystal electrodes on the occurrence of 2D phase transitions in adsorbed organic monolayers (Baré et al.) **445**, 7
In-situ infrared spectroscopic studies of thymine adsorption on a Au(111) electrode (Haiss et al.) **454**, 107
Non-steady-state electrochemical nucleation under potentiostatic conditions (Isaev) **453**, 25
Vibrational spectroscopic study of the adsorption of pyridine at the Au(111)-electrolyte interface by in situ difference frequency generation (Hébert et al.) **447**, 5
Voltammograms of thin layer Pd | H(D) electrodes in the coexistence of α and β phases (Zhang et al.) **458**, 107
Phenanthraquinone
Electrochemical scanning tunneling microscopy and electrochemical quartz crystal microbalance study of the adsorption of phenanthraquinone accompanied by an electrochemical redox reaction on the Au electrode (He et al.) **440**, 65
Phenol
A voltammetric and FTIR–ATR study of the electropolymerization of phenol on platinum electrodes in carbonate medium. Influence of sulfide (Lapuente et al.) **451**, 163
Phenol oxidation
Electrochemical quartz crystal microbalance investigation of surface fouling due to phenol oxidation (Wang et al.) **444**, 127
ortho-Phenylenediamine
Electrochemical quartz crystal microbalance studies on the electropolymerization processes of *ortho*-phenylenediamine in sulfuric acid solutions (Dai et al.) **456**, 47
Phosphate
The kinetic study of specific adsorption of phosphate species on Pt(111) in acidic solutions (Fukuda, Aramata) **440**, 153
Phosphate adsorption
Underpotential deposition of zinc ions on Au(111) in phosphate solution (pH 4.6): kinetic and STM studies (Nakamura et al.) **446**, 227
Phosphate adsorption/desorption
The kinetic study of specific adsorption of phosphate species on Pt(111) in acidic solutions (Fukuda, Aramata) **440**, 153
Phosphate solution
Correlation of the underpotential deposition (upd) of zinc ions on Pt(111), Pt(100), and Pt(110) with anion specific adsorption (Taguchi, Aramata) **457**, 73
Phospholipid-coated mercury electrodes
Impedance measurements with phospholipid-coated mercury electrodes (Rueda et al.) **454**, 155
Phospholipid monolayer
Electron and proton transferring properties of vitamin K_1 across a self-assembled phospholipid monolayer (Herrero et al.) **445**, 71
Phospholipid monolayers
Phospholipid monolayers at water | oil interfaces: theoretical modelling of surface pressure–molecular area isotherms (Mafé et al.) **457**, 155
Phosphotungstic acid
Voltammetry of phosphotungstic acid immobilized in templated silica gel (Holmstrom et al.) **456**, 239
Photoanodes
Photoelectrochemistry of oxalate on particulate TiO_2 electrodes (Byrne, Eggins) **457**, 61
Photocalorimetry
Photocorrosion of polycrystalline CdSe in aqueous KOH: an in situ study by photocalorimetry (Dohrmann, Reck) **452**, 215
Photocatalysis
Photoelectrochemistry of oxalate on particulate TiO_2 electrodes (Byrne, Eggins) **457**, 61
Photocatalyst
Photocatalytic ZnO films prepared by anodizing (Yamaguchi et al.) **442**, 1
Photo-charge separated state
Long-lived visible light induced voltages in all-polymeric thin film systems (Mehta et al.) **458**, 257
Photocorrosion
Photocorrosion of polycrystalline CdSe in aqueous KOH: an in situ study by photocalorimetry (Dohrmann, Reck) **452**, 215
Photocurrent
Micromorphology changes of silicon oxide on Si(111) during current oscillations: a comparative in situ AFM and FTIR study (Nast et al.) **442**, 169
Photocurrent and excess microwave reflectivity at semiconductor|electrolyte junctions .I. Minority carrier profiles (Schlichthörl, Lewerenz) **443**, 9
Photoeffects
Effect of adsorbed water on the photoelectrorheology of TiO_2 particle suspensions (Sakai et al.) **445**, 1
Photoelectrocatalysis
Multistep one-electron photoelectrocatalytic reduction of oxygen at tris(2,2′-bipyridine)ruthenium(II)-incorporated Nafion®- and clay-coated electrodes in the presence of macrocyclic cobalt(III) complexes (Gobi, Ramaraj) **449**, 81
Photoelectrochemistry
Electrosynthesis of indium sulfide on sulfur-modified polycrystalline gold electrodes (de Tacconi, Rajeshwar) **444**, 7
Effect of anions on the electrochemical behavior of Pb electrodes in alkaline solutions and on the anodic oxide film properties (Veluchamy, Minoura) **440**, 41
Effect of immobilized electron relay on the interfacial photoinduced electron transfer at a layered inorganic–organic composite film on gold (Nakanishi et al.) **455**, 229
Photoelectron spectroscopy
Glucose oxidation at bismuth-modified platinum electrodes (Wittstock et al.) **444**, 61
Photoelectrophoresis
Effect of adsorbed water on the photoelectrorheology of TiO_2 particle suspensions (Sakai et al.) **445**, 1

Influence of the rotation rate of a rotary viscometer on the photoelectrorheological properties of TiO_2 particle suspensions (Komoda et al.) **459**, 155

Photoelectrorheology

Influence of the rotation rate of a rotary viscometer on the photoelectrorheological properties of TiO_2 particle suspensions (Komoda et al.) **459**, 155

Photo-induced electron transfer

An electroreflectance and photoelectrochemical study of hypericin at bare and modified gold electrodes (Sagara et al.) **445**, 171

Photo-induced voltage

Long-lived visible light induced voltages in all-polymeric thin film systems (Mehta et al.) **458**, 257

Photoinjection

Photoinjection of excess electrons into liquid hydrocarbons: a thermodynamic treatment (Schiller et al.) **450**, 21

Photometry

Determination of Au(III) in the surface layers formed anodically on the gold electrode (Juodkazis et al.) **441**, 19

Photopolymerization

Electroreductive coating of electrodes from soluble polypyrrole-ruthenium (II) complexes: ion modulation effects on their electroactivity (Deronzier et al.) **453**, 179

Phototransfer

Heterogeneous process of charge transfer and phototransfer with participation of dipole particles (Marsagishvili) **450**, 47

Photovoltage digital images

The scanning microscope for semiconductor characterization (SMSC): electrolyte electroreflectance and photovoltage imaging study of the electrochemical activation of RuS_2 photoelectrodes for oxygen evolution (Turrión et al.) **458**, 99

Phthalocyanines

Spectroelectrochemical studies of tetrasulfonated metallophthalocyanines adsorbed on the basal plane of graphite in the presence of cysteine (Lezna et al.) **452**, 221

Platinum

A DEMS study of the electroreduction and oxidation of 3-buten-2-one and 2-butanone adsorbates on platinum in sulphuric solutions (Zinola et al.) **454**, 161

A voltammetric and FTIR–ATR study of the electropolymerization of phenol on platinum electrodes in carbonate medium. Influence of sulfide (Lapuente et al.) **451**, 163

Comparison of methanol oxidations on Pt, Pt|Ru and Pt|Sn electrodes (Morimoto, Yeager) **444**, 95

Contrasting electrochemical behavior of irreversibly adsorbed Sb monolayer on Pt(100) and Pt(111) single crystal electrode surfaces (Jung et al.) **453**, 243

In situ FTIR studies on Prussian blue (PB)-, polyaniline (PAn)- and inner PB|outer PAn film-modified electrodes (Nakayama et al.) **440**, 125

Stability of bismuth adlayers on Pt(111) electrodes in the presence of adsorbed organic compounds (Carbó et al.) **446**, 79

Surface cleavage of oxocarbons to CO adspecies on Pt(111) electrodes induced by metal adatoms (Carbó et al.) **449**, 193

Platinum cathode

On the cathodic behaviour of tetraalkylammonium cations at a platinum electrode (Simonet et al.) **451**, 5

Platinum clusters

Molecular simulation of oxygen on supported platinum clusters (Wu, Chan) **450**, 225

Platinum electrode

Radiotracer study of the specific adsorption of HCO_3^- ions on a platinum electrode (Horányi) **453**, 113

Scanning electrochemical microscopy (SECM): study of the formation and reduction of oxides on platinum electrode surfaces in Na_2SO_4 solution (pH = 7) (Yang, Denuault) **443**, 273

The impinging jet flow method in interfacial electrochemistry: an application to bead-type electrodes (Bergelin, Wasberg) **449**, 181

Platinum electrodes

Electrochemical behaviour of oxocarbons on single crystal platinum electrodes. Part V. Tetrahydroxy-*p*-benzoquinone in 0.5 M sulphuric acid medium (Carbó et al.) **440**, 57

Electrode processes of chloramines in aqueous solutions (Wrona) **453**, 197

Ion pair formation between the electrogenerated 2,3-dichloro-5,6-dicyoano-1,4-benzoquinone dianion and the sodium ion at platinum surfaces (Oyamo et al.) **451**, 193

The possible existence of subsurface H-atom adsorbates and H_2 electrochemical evolution reaction intermediates on platinum in acid solutions (Martins et al.) **445**, 135

Platinum/gold

Mechanistic approach to the oxidation of phenol at a platinum/gold electrode in an acid medium (Iotov, Kalcheva) **442**, 19

Platinum oxide

Scanning electrochemical microscopy (SECM): study of the formation and reduction of oxides on platinum electrode surfaces in Na_2SO_4 solution (pH = 7) (Yang, Denuault) **443**, 273

Platinum–ruthenium bulk alloys

In situ FTIRS study of the electrocatalytic oxidation of carbon monoxide and methanol at platinum–ruthenium bulk alloy electrodes (Kabbabi et al.) **444**, 41

Platinum single crystal electrodes

A kinetic and in situ infrared spectroscopic study of the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ couple on platinum single crystal electrodes (Kitamura et al.) **456**, 113

Platinum surfaces

MD simulation of water at imperfect platinum surfaces. III. Hydrogen bonding (Nagy, Denuault) **450**, 159

PM3 method

Dissociative electron transfer to polyhalogen methanes CY_3X (Y = H, F, Cl and Br; X = Cl and Br) in solvent: a semiempirical PM3 method study (Tikhomirov, German) **450**, 13

Pmf

The potential of mean force on halide ions near the Cu(100) surface (Ignaczak et al.) **450**, 175

Poisoning

A preliminary study of room temperature direct ethyl formate fuel cells for consumer electronic applications (Chen, Tseung) **451**, 1

Characterization of surface poisoning on a Pd cathode using hydrogen isotopes (Muto et al.) **457**, 99

Polar electrolyte

A theory for electron transfer between an electrode and a multilevel acceptor/donor species in an electrolyte solution (Boroda, Voth) **450**, 95

Polar liquids

Nonlocal nonlinear static dielectric response of polar liquids (Kornyshev, Sutmann) **450**, 143

Polarizability

Computer simulation of electron transfer processes across the electrode|electrolyte interface: a treatment of solvent and electrode polarizability (Calhoun, Voth) **450**, 253

Polarization

Potential oscillations of a stainless steel electrode during galvanostatic polarization in a mixed solution of sulfuric and chromic acids (Ogura et al.) **441**, 191

Polarization curve

An ac impedance study of the anodic dissolution of iron in sulfuric acid solutions containing hydrogen sulfide (Ma et al.) **451**, 11

Polarization model

Effect of adsorbed water on the photoelectrorheology of TiO_2 particle suspensions (Sakai et al.) **445**, 1

Polarized NB|W interface
Nucleophilic substitution reaction of 2,4-dinitrofluorobenzene with hydroxide ions at the polarized nitrobenzene|water interface (Kong, Kakiuchi) **446**, 19
Polarography
Electrochemical behaviour and micromolar determination of the antineoplastic agent azaribine and its mixtures with cytidine (Marín et al.) **440**, 95
Electrochemical reactions with adsorption of the reactants and electrosorption. Simple analytical solutions for a Henry isotherm (Laviron, Roullier) **443**, 195
Electrochemical reduction of metamitron (Ludvík et al.) **457**, 177
Electroreduction of the fungicides Folpet, Captan and Captafol on mercury electrodes (Carabias-Martínez et al.) **456**, 193
Nucleophilic substitution reaction of 2,4-dinitrofluorobenzene with hydroxide ions at the polarized nitrobenzene|water interface (Kong, Kakiuchi) **446**, 19
Polaron
Interconversion of polarons and bipolarons of polyaniline during the electrochemical polymerization of aniline (Mu et al.) **446**, 107
Pology
Unified treatment of the pseudo-first order catalytic process for all stepped-potential methods (Fatouros, Krulic) **456**, 211
Poly (*p*-phenylene)
Low potential electrochemical polymerization of benzene in a composite electrolyte of boron trifluoride diethyl etherate and trifluoroacetic acid (Li et al.) **455**, 1
Poly(2,5-di-(-2-thienyl)-furan)
Electrogeneration of conducting poly(2,5-di-(-2-thienyl)-furan) (Brillas et al.) **445**, 125
Poly(3,4-ethylenedioxythiophene)
Electrochemical behaviour of 3,4-ethylenedioxythiophene functionalized by a sulphonate group. Application to the preparation of poly(3,4-ethylenedioxythiophene) having permanent cation-exchange properties (Stéphan et al.) **443**, 217
Poly(3-alkylthiophene)
Electrochemically pH-controllable 3-substituted polythiophene films (Li, Aoki) **458**, 155
Poly(3-hexylthiophene)
Electrochemical gelation of poly(3-hexylthiophene) film (Li, Aoki) **453**, 107
Poly(3-methyl thiophene) film
Characterization of a poly(3-methyl thiophene) film by an in-situ dc resistance measurement technique and in-situ FTIR spectroelectrochemistry (Lankinen et al.) **447**, 135
Poly(3-methylthiophene)
Polythiophene puzzle—a plausible solution (Visy, Kankare) **442**, 175
Poly(3-thiophene acetic acid)
Electrochemically pH-controllable 3-substituted polythiophene films (Li, Aoki) **458**, 155
Poly(ethylene oxide)
Electrochemical switching of fluorescence emission between red and blue from complexed europium ions in poly(ethylene oxide) (Mukaigawa, Ohno) **452**, 141
Poly(*N*-vinylcarbazole)
Electrochemical quartz crystal microbalance and spectroelectrochemical studies of the influence of cations on the formation and electroactivity of poly(*N*-vinylcarbazole) films in acetonitrile solutions (Carlier et al.) **456**, 139
Poly(neutral red)
Electrochemical behaviour of poly(neutral red) on an ITO electrode (Benito et al.) **446**, 47
Poly(*o*-methoxyaniline)
Influence of dopant, pH and potential on the spectral changes of poly(*o*-methoxyaniline): relationship with the redox processes (Gazotti Jr. et al.) **440**, 193
Poly(*o*-phenylenediamine)
Dependence of redox-kinetic parameters at poly(*o*-phenylenediamine)-modified electrodes upon the oxidation and protonation levels of the polymer (Komura et al.) **446**, 113
Poly(*o*-toluidine)
A combined electrochemical quartz crystal microbalance (EQCM) and probe beam deflection (PBD) study of a poly(*o*-toluidine) modified electrode in perchloric acid solution (Henderson et al.) **454**, 1
Charge transfer in poly(*o*-toluidine) gold modified electrodes. An EIS study of the reduced state (Rodríguez Presa et al.) **455**, 49
Poly(pyrrole)
Synthetic and electrochemical studies of anthraquinone-substituted poly(pyrrole) films (Moteki, Sykes) **447**, 91
Poly(styrenesulphonate)
A comparative study of the impedance properties of glassy-carbon electrodes covered with poly(styrenesulphonate) and Nafion® films containing $Os(bpy)_3^{3+/2+}$ redox sites (Sharp, Åberg) **449**, 137
Poly-cobalt tetra(*o*-aminophenyl)porphyrin
A UV-visible study of the electropolymerization of CoTAPP at vitreous carbon and investigation of its catalytic activity towards the electroreduction of dioxygen (El Mouahid et al.) **455**, 209
Poly-*o*-phenylenediamine
Spectroelectrochemical studies of poly-*o*-phenylenediamine .Part 2. In situ UV–vis subtractive reflectance spectroscopy (Wu et al.) **440**, 173
Poly[1-methyl-3-(pyrrol-1-ylmethyl)pyridinium]chloride film
Enhanced rate of the redox reaction of indigodisulfonate at electrodes coated with poly[1-methyl-3-(pyrrol-1-ylmethyl)pyridinium]chloride films (Komura et al.) **454**, 145
Polyaniline
Characterization of polyaniline films electrodeposited on mild steel in aqueous *p*-toluenesulfonic acid solution (Camalet et al.) **445**, 117
Electrochemical and mass measurements during small voltage amplitude perturbations of conducting polyaniline films (Dinh, Birss) **443**, 63
Electrochemical polymerization of aniline and toluidines on a thermally prepared Pt electrode (Yang) **459**, 71
Electrochemical preparation and characterization in non-aqueous electrolyte of polyaniline electrochemically prepared from an anilinium salt (Naudin et al.) **459**, 1
Electrooxidation of ethylene glycol on a platinum doped polyaniline electrode (Ficicioglu, Kadirgan) **451**, 95
In situ FTIR studies on Prussian blue (PB)-, polyaniline (PAn)- and inner PB|outer PAn film-modified electrodes (Nakayama et al.) **440**, 125
In situ study of the conductivity of the electrochemically deposited polyaniline film using a dual-disk microelectrode (Zhang et al.) **440**, 35
Multi-technique study of the anodic degradation of polyaniline films (Dinh et al.) **459**, 45
The influence of porosity and the nature of the charge storage capacitance on the impedance behaviour of electropolymerized polyaniline films (Roßberg et al.) **443**, 49
Polyaniline films
EQCM study of the process of silicomolybdic anion doping in polyaniline films electrosynthesized in the presence of various anions (Mahmoud et al.) **446**, 211
Polycatenate
Ex-situ study by X-ray absorption near-edge spectroscopy of the topography of complexing cavities immobilized in an electronically conducting polymer (Billon et al.) **456**, 91
Polycrystalline
Effect of electron and hole acceptors on the photoelectrochemical behaviour of nanocrystalline microporous TiO_2 electrodes (Poznyak et al.) **442**, 99

Polycrystalline electrodes
Mott–Schottky analysis of polycrystalline copper(I) bromide in aqueous electrolytes (Knauth, Massiani) **442**, 229
Polycrystalline films
Synthetic semiconductor diamond electrodes: The comparative study of the electrochemical behaviour of polycrystalline and single crystal boron-doped films (Pleskov et al.) **455**, 139
Polycrystalline platinum
Glucose oxidation at bismuth-modified platinum electrodes (Wittstock et al.) **444**, 61
Polyesters
Electrochemical properties of Langmuir–Blodgett films of polyesters derived from oligothiophenes (Goldenberg et al.) **443**, 266
Polyether
A new route to electroactive poly(2,2′-bithiophene-methylene)s from the anodic oxidation of triaryl ether units (Fabre et al.) **455**, 5
Polyethers
What anodic and chemical stability for 2-thienyl carbinol ethers? Polymerization and/or cleavage? (Marrec, Simonet) **459**, 35
Polyethylene
Electrochemical impedance spectroscopy of conductor–insulator composite electrodes: properties in the blocking and diffusive regimes (Navarro-Laboulais et al.) **444**, 173
Polyethylene glycol
Electrochemical characterization of polyethylene glycols as solid polymer electrolytes (Cha, Park) **459**, 135
Polyheme *c*-type cytochromes
Kinetic studies on the electron transfer between bacterial c-type cytochromes and metal oxides (Lojou et al.) **452**, 167
Polylayer formation
A molecular model for polylayer formation on electrode surfaces (Nikitas) **451**, 249
Polymer
A rapid half-cell technique for the pre-screening of polymer fuel cell catalysts (TamizhMani et al.) **444**, 121
Polymer-coated electrode
Temperature dependence in charge hopping between redox centers in a polymer membrane as studied by potential-step chronocoulospectrometry (Yagi et al.) **448**, 131
Polymer electrodes
Impedance of constant phase element (CPE)-blocked diffusion in film electrodes (Bisquert et al.) **452**, 229
Polymer electrolyte
A study on the diffusion of quinhydrone in polymer electrolyte (Dong et al.) **441**, 95
Long-lived visible light induced voltages in all-polymeric thin film systems (Mehta et al.) **458**, 257
Studies of ferrocene derivative diffusion and heterogeneous kinetics in polymer electrolyte by using microelectrode voltammetry (Zhou et al.) **441**, 153
Polymer electrolyte fuel cell
Modelling the performance of the cathode catalyst layer of polymer electrolyte fuel cells (Eikerling, Kornyshev) **453**, 89
Polymer membrane
Amperometric detection of alkali metal ions on micro-fabricated composite polymer membranes (Lee et al.) **453**, 211
Amperometric ion sensors based on laser-patterned composite polymer membranes (Lee et al.) **440**, 73
Polymer-modified electrode
Dependence of redox-kinetic parameters at poly(*o*-phenylenediamine)-modified electrodes upon the oxidation and protonation levels of the polymer (Komura et al.) **446**, 113
Electron and ion transport in polypyrrole/polystyrenesulfonate composite films (Komura et al.) **456**, 121
Polymer-modified electrodes
Modification of electrodes with porphyrin-functionalised conductive polymers (Ballarin et al.) **449**, 173
Polymeric films
β,β-Disubstituted oligothiophenes, a new oligomeric approach towards the synthesis of conducting polymers (Smie et al.) **452**, 87
Characterization of polymeric films derived from α- and β-substituted *N*-vinylpyrroles (DuBois Jr, McCarley) **454**, 99
Polymerisation
Anodic oxidation of aniline and *N*-alkylanilines in aqueous sulphuric acid studied by electrochemical thermospray mass spectrometry (Stassen, Hambitzer) **440**, 219
Polymerization
In situ AFM/STM characterization of porphyrin electrode films for electrochemical detection of neurotransmitters (Duong et al.) **447**, 63
Polymerization efficiencies
Preparation and electrochemical evaluation of poly (3-phenylthiophene) derivatives: potential materials for electrochemical capacitors (Ferraris et al.) **459**, 57
Polymerization mode
Anodic oxidation of dipyrrolyls linked with flexible or rigid spacers: study of the electropolymerization mode (Chane-Ching et al.) **453**, 139
Polymers
The dependence of lithium transference numbers on temperature, salt concentration and anion type in poly (vinylidene fluoride)–hexafluoropropylene copolymer-based gel electrolytes (Dai, Zawodzinski) **459**, 111
Polynuclear hexacyanometallate film electrodes
On the ability of ruthenium to stabilize polynuclear hexacyanometallate film electrodes (Cataldi, De Benedetto) **458**, 149
Polynuclear inorganic film
X-ray photoelectron spectroscopic investigation and electrochemistry of polynuclear indium(III) hexacyanoferrate films (Cataldi et al.) **448**, 111
Polynuclear inorganic films
On the ability of ruthenium to stabilize polynuclear hexacyanometallate film electrodes (Cataldi, De Benedetto) **458**, 149
Polyphenol oxidase
Enhancement of biosensor sensitivity in aqueous and organic solvents using a combination of poly(pyrrole-ammonium) and poly(pyrrole-lactobionamide) films as host matrices (Cosnier et al.) **449**, 165
Polypyrrole
Charging process in polypyrrole films: effect of ion association (Vorotyntsev et al.) **450**, 121
Electron and proton transport in gas diffusion electrodes containing electronically conductive proton-exchange polymers (Qi et al.) **459**, 9
Enhancement of biosensor sensitivity in aqueous and organic solvents using a combination of poly(pyrrole-ammonium) and poly(pyrrole-lactobionamide) films as host matrices (Cosnier et al.) **449**, 165
Ex-situ study by X-ray absorption near-edge spectroscopy of the topography of complexing cavities immobilized in an electronically conducting polymer (Billon et al.) **456**, 91
Impedance analysis of electrodeposited insulating polypyrrole (Komaba, Osaka) **453**, 19
Polypyrrole as a model membrane for drug delivery (Kontturi et al.) **453**, 231
Potentiometric studies of bilayers of conducting polymers (Wojda, Maksymiuk) **441**, 205
Polypyrrole films
Electrochemical properties of cation sensitive polypyrrole films (Tamm et al.) **448**, 25

Polypyrrole–flavin mononucleotide composite film
An electrochemical impedance and spectroelectrochemical study of the polypyrrole–flavin composite electrode (Bonazzola, Calvo) **449**, 111
Polypyrrole/polystyrenesulfonate composites
Electron and ion transport in polypyrrole/polystyrenesulfonate composite films (Komura et al.) **456**, 121
Polyrotaxane
Ex-situ study by X-ray absorption near-edge spectroscopy of the topography of complexing cavities immobilized in an electronically conducting polymer (Billon et al.) **456**, 91
Polysiloxane
The effects of covalent binding of the electroactive components in durable CHEMFET membranes—impedance spectroscopy and ion sensitivity studies (Lugtenberg et al.) **452**, 69
Polysulfides
Polysulfides in dimethylformamide: only the redox couples S_n^-/S_n^{2-} are involved (Levillain et al.) **440**, 243
Polythiophene
Electrochemical molecular recognition by thin films of ether-substituted polythiophenes (Goldenberg et al.) **447**, 1
Electrochemically pH-controllable 3-substituted polythiophene films (Li, Aoki) **458**, 155
The electrochemistry of fluorine-substituted polyphenylthiophenes for charge storage applications (Gofer et al.) **443**, 103
Polythiophene films
Apparent negative activation energy in electrochemical insulating-to-conducting conversion at polymethylthiophene films (Aoki, Li) **441**, 161
Polythiophenes
Modification of electrodes with porphyrin-functionalised conductive polymers (Ballarin et al.) **449**, 173
What anodic and chemical stability for 2-thienyl carbinol ethers? Polymerization and/or cleavage? (Marrec, Simonet) **459**, 35
Polytoluidine
Electrochemical polymerization of aniline and toluidines on a thermally prepared Pt electrode (Yang) **459**, 71
Polyvinylchloride
Amperometric ion sensors based on laser-patterned composite polymer membranes (Lee et al.) **440**, 73
Pore utilization
Hydrogen evolution/oxidation reactions on porous electrodes (Lasia) **454**, 115
Pores
Development of a theory for the determination of the composition of the anodizing solution inside the pores during the growth of porous anodic Al_2O_3 films on aluminium by a transport phenomenon analysis (Patermarakis) **447**, 25
Porosity
The influence of porosity and the nature of the charge storage capacitance on the impedance behaviour of electropolymerized polyaniline films (Roßberg et al.) **443**, 49
Porous electrodes
Hydrogen evolution/oxidation reactions on porous electrodes (Lasia) **454**, 115
Porous graphitic carbon
Electrochemically modulated liquid chromatography (EMLC) as a probe of the adsorption characteristics of monosubstituted benzenes at porous graphitic carbon (Ting, Porter) **443**, 180
Porphyrin
In situ AFM/STM characterization of porphyrin electrode films for electrochemical detection of neurotransmitters (Duong et al.) **447**, 63
Porphyrin-functionalised polythiophenes
Modification of electrodes with porphyrin-functionalised conductive polymers (Ballarin et al.) **449**, 173
Porphyrin-modified platinum electrode
Electrochemically initiated polymerization of zinc(II)5-vinyl-10,15,20-triphenylporphyrin (Kuester et al.) **452**, 13
Porphyrins
An electrochemical and spectroelectrochemical (IR) investigation of the reduction of RCo(II)TPP (R = benzyl or butyl; TPP = tetraphenylporphyrin): mechanistic implications in the CoTPP catalyzed electrocarboxylation of alkyl halides (Zheng et al.) **453**, 79
Positron lifetime spectroscopy
Application of positron lifetime spectroscopy to the study of electrodeposited chromium layers (Süvegh et al.) **455**, 69
Potassium sorption
Microgravimetric monitoring of transport of cations during redox reactions of indium(III) hexacyanoferrate(III,II) .Radiotracer evidence for the flux of anions in the film (Malik et al.) **452**, 57
Potential cycling
Incorporation and expulsion of electrolyte species by tungsten trioxide-, WO_3 | Polyaniline-, and WO_3 | PAn | polyvinylsulfate-confined electrodes during potential cycling (Ogura et al.) **451**, 219
Potential distribution
Potential-modulated reflectance spectroscopy of the methyl orange transfer across the water|1,2-dichloroethane interface (Fermín et al.) **447**, 125
Potential frequency
Potential oscillations of a stainless steel electrode during galvanostatic polarization in a mixed solution of sulfuric and chromic acids (Ogura et al.) **441**, 191
Potential modulated reflectance
Spectroelectrochemical approaches to heterogeneous electron transfer reactions at the polarised water | 1,2-dichloroethane interfaces (Ding et al.) **458**, 139
Potential-modulated reflectance
Potential-modulated reflectance spectroscopy of the methyl orange transfer across the water|1,2-dichloroethane interface (Fermín et al.) **447**, 125
Potential oscillations
Coupling of the electrochemical oscillations from the cathode and anode in the $Fe(CN)_6^{3-}$/$Fe(CN)_6^{4-}$ system (Li et al.) **445**, 105
Potential oscillations of a stainless steel electrode during galvanostatic polarization in a mixed solution of sulfuric and chromic acids (Ogura et al.) **441**, 191
Potential-step chronoamperospectrometry (PSCAS)
Enhancing effect of amino acid residue models on the charge transfer in a Nafion® film incorporating $Ru(bpy)_3^{2+}$ complex (Zhang et al.) **445**, 109
Potential-step chronocoulometry
The effect of magnesium ion on the electrochemistry of cytochrome c and cytochrome b_5 at a gold electrode modified with cysteine (Qian et al.) **447**, 187
Potential-step chronocoulospectrometry
Temperature dependence in charge hopping between redox centers in a polymer membrane as studied by potential-step chronocoulospectrometry (Yagi et al.) **448**, 131
Potential window
Electrochemical investigations in liquid and supercritical 1,1,1,2-tetrafluoroethane (HFC 134a) and difluoromethane (HFC 32) (Abbott et al.) **457**, 1
Potentiometric and pH measurements in high-temperature high-pressure aqueous solutions
Advanced flow-through external pressure-balanced reference electrode for potentiometric and pH studies in high temperature aqueous solutions (Lvov et al.) **443**, 186
Potentiometric sensor
A novel PVC membrane sensor for potentiometric determination of thallium(I) (Saleh) **448**, 33

Potentiometric sensors
Characterization of the ^{E}MOSFET, a novel one-electrode chemical transducer for redox measurements (Hendrikse et al.) **458**, 23
Electrochemical behaviour of poly(neutral red) on an ITO electrode (Benito et al.) **446**, 47
Potentiometric stripping analysis
Carbon fiber microelectrodes for adsorptive stripping analysis of trace nucleic acids (Wang et al.) **441**, 167
Potentiometry
Mediated bioelectrocatalysis based on NAD-related enzymes with reversible characteristics (Takagi et al.) **445**, 211
Thermodynamic and electrochemical behavior of nickel in molten Li_2CO_3–Na_2CO_3 modified by addition of calcium carbonate (Cassir et al.) **452**, 127
Potentiostatic current transient
Diffusion controlled growth of hemispheres in ordered arrays (Scharifker) **458**, 253
Potentiostatic electrolyses
Formation of nickel hydrides by hydrogen evolution in alkaline media (Bernardini et al.) **442**, 125
Potentiostatic macroelectrolysis
Inosine reduction study at low pH by a combination of electrochemical methods (Havran et al.) **454**, 65
Pre-screening
A rapid half-cell technique for the pre-screening of polymer fuel cell catalysts (TamizhMani et al.) **444**, 121
Preconcentration
Voltammetric in situ investigation of an MCM-41-modified carbon paste electrode—a new sensor (Walcarius et al.) **453**, 249
Premonolayer oxidation
Multicomponent hydrous oxide films grown on gold in acid solution (Burke, Nugent) **444**, 19
Preparation
Manganese-doped fullerene film electrodes (Szücs et al.) **442**, 59
Probe beam deflection
A combined electrochemical quartz crystal microbalance (EQCM) and probe beam deflection (PBD) study of a poly(*o*-toluidine) modified electrode in perchloric acid solution (Henderson et al.) **454**, 1
Combined electrochemical quartz crystal microbalance (EQCM) and probe beam deflection (PBD): validation of the technique by a study of silver ion mass transport (Henderson et al.) **458**, 241
Probe beam deflection study of the transport of ions during the redox reaction of indium-hexacyanoferrate films (Csahók et al.) **457**, 251
Probe beam deflection technique
Probe beam deflection study of p-Si electrodissolution in acidic fluoride medium in the oscillating regimes (Dini et al.) **446**, 7
Product analysis
Electro-oxidation of ethanol on gold: analysis of the reaction products and mechanism (Tremiliosi-Filho et al.) **444**, 31
Progressive nucleation
Nucleation and growth of metal catalysts. Part I. Electrodeposition of platinum on tungsten (Kelaidopoulou et al.) **444**, 195
Properties
Electrochemical properties of cation sensitive polypyrrole films (Tamm et al.) **448**, 25
Protein
Protein electrochemistry at carbon nanotube electrodes (Davis et al.) **440**, 279
Protein adsorption
Adsorption behaviour of insulin and soybean trypsin inhibitor at the mercury | solution interface (Vidić et al.) **452**, 151
Protein electrochemistry
Bioelectrocatalysis by a selenoenzyme (Lehmann et al.) **455**, 259
Protein structure
Spectroelectrochemical studies of cytochrome b_5 Phe35 mutants (Yao et al.) **445**, 197
Proton-exchange membrane fuel cell
Rotating ring-disk electrode study on the cathodic oxygen reduction at Nafion®-coated gold electrodes (Maruyama et al.) **458**, 175
Prussian blue
In situ FTIR studies on Prussian blue (PB)-, polyaniline (PAn)- and inner PB|outer PAn film-modified electrodes (Nakayama et al.) **440**, 125
The electrocatalytic activity of Prussian blue in hydrogen peroxide reduction studied using a wall-jet electrode with continuous flow (Karyakin et al.) **456**, 97
Prussian blue–polyaniline-modified electrodes
In situ infrared spectroscopic investigations on the electrochemical properties of Prussian blue–polyaniline-modified electrodes with various anionic Fe(II) complexes working as a mediator for the electroreduction of CO_2 (Nakayama et al.) **440**, 251
Pseudo-first order catalytic process
Unified treatment of the pseudo-first order catalytic process for all stepped-potential methods (Fatouros, Krulic) **456**, 211
Pseudo-spinel phase
SPES, 6Li MAS NMR, and Ni^{3+} EPR evidence for the formation of Co^{2+}-containing spinel phases in $LiCoO_2$ cycled electrode materials (Alcántara et al.) **454**, 173
Pseudostationary mercury electrode
The pseudostationary mercury electrode (Laviron, Raveau-Fouquet) **458**, 43
PSPICE simulation
A study of the electrical properties of permselective membranes with symmetric, reversible interfacial processes using the network method (Moya, Horno) **459**, 145
Pt
Specificity of the kinetics of H_2 evolution to the structure of single-crystal Pt surfaces, and the relation between opd and upd H (Barber et al.) **446**, 125
Pt(111)
Underpotential deposition of lead on Pt(111) in the presence of bromide: $RRD_{Pt(111)}E$ and X-ray scattering studies (Marković et al.) **448**, 183
Pt-coated electrode
Electrochemical polymerization of aniline and toluidines on a thermally prepared Pt electrode (Yang) **459**, 71
Pt electrode
An in situ UV–vis and IR spectroelectrochemical study of the disposition of a hydroquinone anion salt on platinum electrodes from dichloromethane solutions (Babaei, McQuillan) **441**, 197
In situ FTIR spectroscopic studies of electrooxidation of C_4 alcohols on platinum electrodes in acid solutions. Part II. Reaction mechanism of 1,3-butanediol oxidation (Li, Sun) **448**, 5
Study of nickel upd at a polycrystalline Pt electrode and its influence on HCOOH oxidation in acidic and nearly neutral media (El-Shafei) **447**, 81
Underpotential–overpotential transition of a Ag overlayer on Pt. Part 3. Influence of the rearrangement of the overlayer structure on the blocking of hydrogen upd (Vaskevich, Gileadi) **442**, 147
Pt(100) electrode
Electrochemical behaviour of amino acids on Pt(*hkl*). A voltammetric and in situ FTIR study. .Part III. Glycine on Pt(100) and Pt(110) (Huerta et al.) **445**, 155
Kinetic and mechanistic study of methanol oxidation on a Pt(100) surface in alkaline media (Tripković et al.) **448**, 173
Pt(110) electrode
Electrochemical behaviour of amino acids on Pt(*hkl*). A voltammetric and in situ FTIR study. .Part III. Glycine on Pt(100) and Pt(110) (Huerta et al.) **445**, 155

Pt microelectrodes
Oxidation of formaldehyde, methanol, formic acid and glucose at ac heated cylindrical Pt microelectrodes (Zerihun, Gründler) **441**, 57
Pt single crystal electrodes
Correlation of the underpotential deposition (upd) of zinc ions on Pt(111), Pt(100), and Pt(110) with anion specific adsorption (Taguchi, Aramata) **457**, 73
Pulsed-current copper electrodeposition
In situ probing of interfacial processes in the electrodeposition of copper by confocal Raman microspectroscopy (Texier et al.) **446**, 189
PVC membrane sensor
A novel PVC membrane sensor for potentiometric determination of thallium(I) (Saleh) **448**, 33
Pyrethroid compounds
Electrochemical reduction of the synthetic pyrethroid insecticides tralomethrin and tralocythrin at glassy carbon and mercury electrodes (Coomber et al.) **452**, 5
Pyridine
Vibrational spectroscopic study of the adsorption of pyridine at the Au(111)-electrolyte interface by in situ difference frequency generation (Hébert et al.) **447**, 5
Pyrrole
Electroreductive coating of electrodes from soluble polypyrrole-ruthenium (II) complexes: ion modulation effects on their electroactivity (Deronzier et al.) **453**, 179
Synthetic and electrochemical studies of anthraquinone-substituted poly(pyrrole) films (Moteki, Sykes) **447**, 91
Pyrroloquinoline quinone
Electrochemical monitoring of in vivo reconstitution of glucose dehydrogenase in *Escherichia coli* cells with externally added pyrroloquinoline quinone (Ikeda et al.) **449**, 219

QCM
Mass transport on an anionic clay-modified electrode as studied by a quartz crystal microbalance (Yao et al.) **457**, 119
Quantitative analysis
Electrochemical behaviour and micromolar determination of the antineoplastic agent azaribine and its mixtures with cytidine (Marín et al.) **440**, 95
Quantum chemistry
Asymmetry of inner-sphere reorganization energy for heterogeneous electron transfer (Tsirlina et al.) **450**, 63
Coupled chemistry revisited in the tentative cathodic electropolymerization of 2-butenenitrile (Deniau et al.) **451**, 145
Quantum mechanical model
A theoretical study of the electrochemical reduction of oxygen (Bockris, Abdu) **448**, 189
Quartz crystal
Electrochemical quartz crystal microbalance studies on the electropolymerization processes of *ortho*-phenylenediamine in sulfuric acid solutions (Dai et al.) **456**, 47
Quartz crystal microbalance
Electrochemical and mass measurements during small voltage amplitude perturbations of conducting polyaniline films (Dinh, Birss) **443**, 63
Multi-technique study of the anodic degradation of polyaniline films (Dinh et al.) **459**, 45
Quartz microbalance
Charging process in polypyrrole films: effect of ion association (Vorotyntsev et al.) **450**, 121
Quinhydrone
A study on the diffusion of quinhydrone in polymer electrolyte (Dong et al.) **441**, 95
Quinone
Mechanistic study of the autoxidation of reduced flavin and quinone compounds (Tatsumi et al.) **443**, 236
Mediated catalytic current for the oxidation of ethanol produced by Acetobacter aceti cells suspended in solution (Ikeda et al.) **440**, 265
Quinones
A voltammetric investigation of the reactions between surface-confined amines and quinones on gold electrodes: evidence for imine formation (He et al.) **458**, 7
Continuous-flow column electrolytic spectroelectrochemistry for two-step one-electron transfer reactions (Torimura et al.) **451**, 229
Quinoxaline derivative
Spectroelectrochemical study of the copper(II) transfer assisted by 6,7-dimethyl-2,3-di(2-pyridyl)quinoxaline at the water|1,2-dichloroethane interface (Tomaszewski et al.) **453**, 171

Rabbit liver
Electrochemical study of metallothioneins using cyclic voltammetry (Harlyk et al.) **458**, 199
Radial distribution function
MD studies of electrolyte solution|liquid mercury interfaces (Bopp, Heinzinger) **450**, 165
Radical anion
Reaction of electrogenerated oxamniquine radical anion with glutathione (Radi, Belal) **441**, 39
Radical anions
Correlation of voltammetric and spectroscopic data obtained from open- and closed-shell aromatic esters and those obtained from AM1 calculations (Webster et al.) **442**, 217
Dissociative electron transfer to polyhalogen methanes CY_3X (Y = H, F, Cl and Br; X = Cl and Br) in solvent: a semiempirical PM3 method study (Tikhomirov, German) **450**, 13
New methods for the accurate determination of extinction and diffusion coefficients of aromatic and heteroaromatic radical anions in *N,N*-dimethylformamide (Pedersen et al.) **454**, 123
Radical cations
Increase of conjugation length within SAMs of terthiophene-derivatives, through electrochemical intermolecular coupling (Michalitsch et al.) **457**, 129
Radiometry
Effect of surface order on adsorption of sulfate ions on silver electrodes (Smoliński et al.) **442**, 41
Radiotracer method
Adsorption of Au-containing species and heterogeneous isotope exchange of Au atoms at the Au electrode|dicyanoaurate solution interface (Poškus, Agafonovas) **457**, 171
On the calculation of surface concentration from measurements by the radiotracer 'electrode lowering' technique (Poškus) **442**, 5
Radiotracer study
Microgravimetric monitoring of transport of cations during redox reactions of indium(III) hexacyanoferrate(III,II). Radiotracer evidence for the flux of anions in the film (Malik et al.) **452**, 57
Radiotracer technique
Radiotracer study of the specific adsorption of HCO_3^- ions on a platinum electrode (Horányi) **453**, 113
Raman spectroscopy
Anodic electrosynthesis of Cu_2S and $CuInS_2$ films (Schimmel et al.) **453**, 187
Thin layer electrochemical Raman study of ion pair formation between the tetrachlorobenzoquinone anion radical and alkaline earth metal cations (Yamanuki et al.) **458**, 191
Rate constants
Comparison of rotating disk and wall-jet electrode systems for studying the kinetics of direct and mediated electron transfer for horseradish peroxidase on a graphite electrode (Lindgren et al.) **458**, 113

Rates of the halide ion cleavage from halo-9,10-diphenylanthracene anion radicals in DMF (Jaworski et al.) **440**, 163

Rate-determining step
Electrochemical reduction of acids in dimethyl sulfoxide. Comparison of weak C–H, N–H and O–H acids (Treimer, Evans) **455**, 19

Reaction mechanism
Kinetic and mechanistic study of methanol oxidation on a Pt(100) surface in alkaline media (Tripković et al.) **448**, 173
Reaction mechanism and kinetics of alcohol oxidation at nitroxyl radical modified electrodes (Kishioka et al.) **452**, 179
Spectroelectrochemical studies of poly-*o*-phenylenediamine. Part 2. In situ UV–vis subtractive reflectance spectroscopy (Wu et al.) **440**, 173

Reaction mechanisms
Use of sensitivity analysis methods in the modelling of electrochemical transients. .Part 2. Model expansion and model reduction (Bieniasz et al.) **447**, 173

Real time polarization modulation
An in situ infrared spectroscopic study of imidazole films on copper electrodes (Richmond et al.) **448**, 237

Rearrangement
Ultrasound-assisted anodic oxidation of diuron (Macounova et al.) **457**, 141

Recombination of radicals
Inosine reduction study at low pH by a combination of electrochemical methods (Havran et al.) **454**, 65

Reconstruction
The voltammetric features associated with the lifting of charge-induced surface reconstruction on Au(100) (Skołuda) **442**, 9

Redox behavior of fullerene layers
The electroreduction of C_{60} films in solutions containing crown ether complexes of alkali metal cations (Winkler et al.) **456**, 229

Redox couple
Polysulfides in dimethylformamide: only the redox couples S_n^- / S_n^{2-} are involved (Levillain et al.) **440**, 243

Redox couples
Electrochemistry of GaAs/AlGaAs superlattice electrodes in acetonitrile solutions with metallocene redox couples (Watts, Koval) **443**, 33

Redox electrodes
On the theory of the coulostatic pulse technique as applied to redox electrodes with two consecutive charge transfer steps (Kopistko, Nauryzbaev) **451**, 19

Redox enzymes
C_{60}-mediated bioelectrocatalyzed oxidation of glucose with glucose oxidase (Patolsky et al.) **454**, 9

Redox-kinetic parameters
Dependence of redox-kinetic parameters at poly(*o*-phenylenediamine)-modified electrodes upon the oxidation and protonation levels of the polymer (Komura et al.) **446**, 113

Redox mechanism
Polythiophene puzzle—a plausible solution (Visy, Kankare) **442**, 175

Redox potential
Electrochemical stability of redox active ions and molecules in liquid and frozen stoichiometric electrolytes (Opallo) **446**, 39
Monomolecular films of a nickel(II) pentaazamacrocyclic complex for the electrocatalytic oxidation of hydrogen peroxide at gold electrodes (Gobi et al.) **444**, 145
The electrode reactions of $Fe(CN)_6^{3-}$ and $Fe(CN)_6^{4-}$ ions studied at temperatures below the melting point of stoichiometric electrolytes (Opallo) **444**, 187

Redox process
Combined electrochemical quartz crystal microbalance (EQCM) and probe beam deflection (PBD): validation of the technique by a study of silver ion mass transport (Henderson et al.) **458**, 241
Mathematical analyses of ac voltammetry of a surface confined redox process (Yap) **454**, 33

Redox properties
Electrochemical properties of peroxotitanium-containing phosphotungstate with Dawson–Wells structure (Gong et al.) **455**, 39

Redox reaction
The electrode reactions of $Fe(CN)_6^{3-}$ and $Fe(CN)_6^{4-}$ ions studied at temperatures below the melting point of stoichiometric electrolytes (Opallo) **444**, 187

Redox switching
Effect of time scale on redox-driven ion and solvent transfers at nickel hydroxide films in aqueous lithium hydroxide solutions (Gonsalves, Hillman) **454**, 183

Reduced rubredoxin
Electrochemical mimicking of reduced rubredoxin by iron(II) complexes of cysteine peptide thiolate in aqueous micelle solution (Sun et al.) **448**, 105

Reduced state
Electrogeneration of conducting poly(2,5-di-(-2-thienyl)-furan) (Brillas et al.) **445**, 125

Reduction
About potential measurements in steady state voltammetry at low electrolyte/analyte concentration ratios (Bento et al.) **443**, 137

Reduction mechanism
Electrochemical behaviour and micromolar determination of the antineoplastic agent azaribine and its mixtures with cytidine (Marín et al.) **440**, 95

Reduction of CO_2
Electrochemical reduction of CO_2 on single crystal electrodes of silver Ag(111), Ag(100) and Ag(110) (Hoshi et al.) **440**, 283
Electroreduction of CO_2 catalyzed by polymeric $[Ru(bpy)(CO)_2]_n$ films in aqueous media: parameters influencing the reaction selectivity (Chardon-Noblat et al.) **444**, 253

Reduction of tetrachlorobenzoquinone
Thin layer electrochemical Raman study of ion pair formation between the tetrachlorobenzoquinone anion radical and alkaline earth metal cations (Yamanuki et al.) **458**, 191

Reduction–oxidation
Electrochemistry of heteropolyanions in coulombically linked self-assembled monolayers (Liu et al.) **458**, 87

Reduction potential
Self-assembly and catalytic properties of 1,1′-bridged-2,2′-dipyridinium amphiphiles (Judkins et al.) **451**, 39
Spectroelectrochemical studies of cytochrome b_5 Phe35 mutants (Yao et al.) **445**, 197

Reflection spectroscopy
A voltammetric and FTIR–ATR study of the electropolymerization of phenol on platinum electrodes in carbonate medium. Influence of sulfide (Lapuente et al.) **451**, 163

Refractory metals
A chemical and electrochemical study of titanium ions in the molten equimolar $CaCl_2 + NaCl$ mixture at 550°C. (Martínez et al.) **449**, 67

Regenerative processes
Comproportionation and disproportionation reactions in the electrochemical reduction of nitroprusside at a hanging mercury drop electrode in acidic solution (Carapuça et al.) **455**, 93

Relative stabilities of copper(II) complexes
Electrochemical reduction of copper(II) salen at carbon cathodes in dimethylformamide (Samide, Peters) **443**, 95

Reorganization energies
Reorganization energetics for ferrocene oxidation/reduction in self-assembled monolayers on gold (Weber, Creager) **458**, 17

Reversibility
Mediated bioelectrocatalysis based on NAD-related enzymes with reversible characteristics (Takagi et al.) **445**, 211

Reversible trap
Theoretical analysis of hydrogen transport through an electrode at the coexistence of two hydrogen-poor and -rich phases based upon the concept of hydrogen trapping (Pyun, Yang) **441**, 183
Rhenium complex
The effect of weak Brönsted acids on the electrocatalytic reduction of carbon dioxide by a rhenium tricarbonyl bipyridyl complex (Wong et al.) **453**, 161
Rhodoxime
Electrocatalytic dioxygen reduction in the presence of a rhodoxime (Tavagnacco et al.) **448**, 41
RNA
Carbon fiber microelectrodes for adsorptive stripping analysis of trace nucleic acids (Wang et al.) **441**, 167
Room temperature fuel cell
A preliminary study of room temperature direct ethyl formate fuel cells for consumer electronic applications (Chen, Tseung) **451**, 1
Rotating disk electrode
Comparison of rotating disk and wall-jet electrode systems for studying the kinetics of direct and mediated electron transfer for horseradish peroxidase on a graphite electrode (Lindgren et al.) **458**, 113
Influence of Nafion® film on the kinetics of anodic hydrogen oxidation (Maruyama et al.) **447**, 201
Reaction mechanism and kinetics of alcohol oxidation at nitroxyl radical modified electrodes (Kishioka et al.) **452**, 179
Rotating ring-disk electrode
Rotating ring-disk electrode study on the cathodic oxygen reduction at Nafion®-coated gold electrodes (Maruyama et al.) **458**, 175
Rotation rate effect
Influence of the rotation rate of a rotary viscometer on the photoelectrorheological properties of TiO_2 particle suspensions (Komoda et al.) **459**, 155
RRDE
Underpotential deposition of lead on Pt(111) in the presence of bromide: $RRD_{Pt(111)}E$ and X-ray scattering studies (Marković et al.) **448**, 183
$Ru(bpy)_3^{2+}$
Enhancing effect of amino acid residue models on the charge transfer in a Nafion® film incorporating $Ru(bpy)_3^{2+}$ complex (Zhang et al.) **445**, 109
Ru complex
Temperature dependence in charge hopping between redox centers in a polymer membrane as studied by potential-step chronocoulospectrometry (Yagi et al.) **448**, 131
RuS_2
The scanning microscope for semiconductor characterization (SMSC): electrolyte electroreflectance and photovoltage imaging study of the electrochemical activation of RuS_2 photoelectrodes for oxygen evolution (Turrión et al.) **458**, 99
Ruthenium
Comparison of methanol oxidations on Pt, Pt|Ru and Pt|Sn electrodes (Morimoto, Yeager) **444**, 95
On the ability of ruthenium to stabilize polynuclear hexacyanometallate film electrodes (Cataldi, De Benedetto) **458**, 149
Ruthenium complexes
Electroreduction of CO_2 catalyzed by polymeric $[Ru(bpy)(CO)_2]_n$ films in aqueous media: parameters influencing the reaction selectivity (Chardon-Noblat et al.) **444**, 253
Ruthenium dioxide electrodes
Evaluation of the surface area of RuO_2 electrodes by periodic current signals (Fernández et al.) **457**, 109
Ruthenium tris(bipyridyl) complexes
Electroreductive coating of electrodes from soluble polypyrroleruthenium (II) complexes: ion modulation effects on their electroactivity (Deronzier et al.) **453**, 179
Scanning electrochemical microscope
Scanning electrochemical microscopy (SECM): study of the formation and reduction of oxides on platinum electrode surfaces in Na_2SO_4 solution (pH = 7) (Yang, Denuault) **443**, 273
Scanning electron micrography
Electrochemical oxidation of nickel in alkaline solutions: a voltammetric study and modelling (Seghiouer et al.) **442**, 113
Scanning tunneling microscope (STM)
Metal deposition near the tip of a scanning tunneling microscope (Divisek et al.) **440**, 169
Scanning tunneling microscopy
A primitive model for hexamethylpararosaniline (crystal violet) monomolecular adlayer: a Monte Carlo simulation study (Batina et al.) **450**, 213
Phase separation of binary self-assembled thiol monolayers composed of 1-hexadecanethiol and 3-mercaptopropionic acid on Au(111) studied by scanning tunneling microscopy and cyclic voltammetry (Hobara et al.) **444**, 113
Structural transitions in 2,2′-bipyridine adlayers on Au(111)—an in-situ STM study (Dretschkow et al.) **458**, 121
Scanning tunnelling microscopy
An in situ STM study of sulphate adsorption on copper(111) in acidic aqueous electrolytes (Li, Nichols) **456**, 153
Schiff-base complexes
Redox and electrocatalytic properties of electrodes modified by films of polypyrrole nickel(II) Schiff-base complexes (Losada et al.) **447**, 147
SECM
Scanning electrochemical microscopy (SECM): study of the formation and reduction of oxides on platinum electrode surfaces in Na_2SO_4 solution (pH = 7) (Yang, Denuault) **443**, 273
Second-harmonic generation
Second harmonic generation from silver single-crystal electrodes (Beltramo et al.) **447**, 71
Second-order reactions
The application of the concept of reaction layer to the study of electrode processes coupled with the second-order chemical reactions at microelectrodes under steady-state conditions (Zhuang, Sun) **440**, 103
Secondary β- and γ(X)-radiations
A detailed study of the reliability of some crucial parameters used in the in-situ radiotracer sorption studies (Hirschberg et al.) **456**, 171
Selenium
Surface cleavage of oxocarbons to CO adspecies on Pt(111) electrodes induced by metal adatoms (Carbó et al.) **449**, 193
Self-assembled films
Probability theory of desorption kinetics of self-assembled alkanethiols stabilized with pair interaction (Aoki, Kakiuchi) **452**, 187
Self assembled monolayer
Electrostatic interactions at self assembled molecular films of charged thiols on gold (Molinero, Calvo) **445**, 17
Self-assembled monolayer
A reagentless amperometric hydrogen peroxide biosensor based on covalently binding horseradish peroxidase and thionine using a thiol-modified gold electrode (Ruan et al.) **455**, 121
Effect of immobilized electron relay on the interfacial photoinduced electron transfer at a layered inorganic–organic composite film on gold (Nakanishi et al.) **455**, 229
Impedance analysis of self-assembled naphthalene disulfide monolayer on gold using external redox probes (Bandyopadhyay et al.) **447**, 11
Voltammetry of defect sites at a self-assembled monolayer on a gold surface (Che et al.) **453**, 9
Self-assembled monolayer electrode
Electrocatalytic oxidation of hydrazines at a 4-pyridyl hydroquinone self-assembled platinum electrode and its application

to amperometric detection in capillary electrophoresis (Niu et al.) **448**, 79
Self-assembled monolayers
Constructing different 'bridges' for interfacial electron transfer in azobenzene LB/SAM composite bilayers (Yu et al.) **448**, 119
Self-assembled monolayers with biospecific affinity for NAD(H)-dependent dehydrogenases: characterization by surface plasmon resonance combined with electrochemistry 'in situ' (Schlereth, Kooyman) **444**, 231
Self-assembled monolayers (SAM)
Characterization of 6-mercaptopurine monolayers on Hg surfaces (Sevilla et al.) **442**, 107
Self-assembly
Electrochemistry of ITO and gold electrodes covalently modified with dithizone and the effect of Cu(II) and Pb(II) ions (Mirkhalaf et al.) **452**, 203
Self-assembly and catalytic properties of 1,1′-bridged-2,2′-dipyridinium amphiphiles (Judkins et al.) **451**, 39
SEM
Electrochemical characterisation of a semiconductor–metal junction: n-type InP|Cu; influence of the structure of the metallic layer (Moulayat et al.) **453**, 129
Nature of the passive film formed at a zinc anode in zinc–nickel containing solutions (Velichenko et al.) **448**, 1
SEM spectroscopy
Thermodynamic and electrochemical behavior of nickel in molten Li_2CO_3–Na_2CO_3 modified by addition of calcium carbonate (Cassir et al.) **452**, 127
Semi-differentiation
Adsorption in semi-differential voltammetry (Klička) **455**, 253
Semi-empirical molecular orbital AM1 calculations
Correlation of voltammetric and spectroscopic data obtained from open- and closed-shell aromatic esters and those obtained from AM1 calculations (Webster et al.) **442**, 217
Semi-integration
Adsorption in semi-differential voltammetry (Klička) **455**, 253
Semiconductor
Electrochemistry of GaAs/AlGaAs superlattice electrodes in acetonitrile solutions with metallocene redox couples (Watts, Koval) **443**, 33
Semiconductor electrodes
Synthetic semiconductor diamond electrodes: The comparative study of the electrochemical behaviour of polycrystalline and single crystal boron-doped films (Pleskov et al.) **455**, 139
Semiconductor|electrolyte junctions
Photocurrent and excess microwave reflectivity at semiconductor|electrolyte junctions. I. Minority carrier profiles (Schlichthörl, Lewerenz) **443**, 9
Semiconductor thin film
Electrosynthesis of indium sulfide on sulfur-modified polycrystalline gold electrodes (de Tacconi, Rajeshwar) **444**, 7
Semiempirical methods
Adsorption configurations of ethylene and acetylene on gold (Zinola, Castro Luna) **456**, 37
Semiintegrals
Voltammetric modelling via extended semiintegrals (Mahon, Oldham) **445**, 179
Semiquinone radical
Mechanistic study of the autoxidation of reduced flavin and quinone compounds (Tatsumi et al.) **443**, 236
Sensitivity analysis
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 3. Statistical error/uncertainty propagation in simulation and in nonlinear least-squares parameter estimation (Bieniasz, Speiser) **458**, 209
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 1. Gaining more insight into the behaviour of kinetic models (Bieniasz, Speiser) **441**, 271
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 2. Model expansion and model reduction (Bieniasz et al.) **447**, 173
Sensors
Electrochemistry of ITO and gold electrodes covalently modified with dithizone and the effect of Cu(II) and Pb(II) ions (Mirkhalaf et al.) **452**, 203
Shielding effects
Metal deposition near the tip of a scanning tunneling microscope (Divisek et al.) **440**, 169
Signal-to-background ratio
A unified approach to trace analysis and evaluation of electrode kinetics with fast Fourier transform electrochemical instrumentation (Schiewe et al.) **451**, 129
Signal-to-noise ratio
A unified approach to trace analysis and evaluation of electrode kinetics with fast Fourier transform electrochemical instrumentation (Schiewe et al.) **451**, 129
Silasesquioxane
Characterization of organosilasesquioxane-intercalated-laponite-clay modified electrodes and (bio)electrochemical applications (Coche-Guérente et al.) **458**, 73
Silica sol-gel immobilization
Silica sol-gel immobilized amperometric enzyme electrode for peroxide determination in the organic phase (Li et al.) **448**, 69
Silicomolybdic anion doping
EQCM study of the process of silicomolybdic anion doping in polyaniline films electrosynthesized in the presence of various anions (Mahmoud et al.) **446**, 211
Silicon electropolishing
Probe beam deflection study of p-Si electrodissolution in acidic fluoride medium in the oscillating regimes (Dini et al.) **446**, 7
Silicon oxide
Micromorphology changes of silicon oxide on Si(111) during current oscillations: a comparative in situ AFM and FTIR study (Nast et al.) **442**, 169
Silicon oxide etching
Probe beam deflection study of p-Si electrodissolution in acidic fluoride medium in the oscillating regimes (Dini et al.) **446**, 7
Silicon subsurface region
Silicon surface states and subsurface hydrogen (Belaïdi et al.) **444**, 55
Silver
Combined electrochemical quartz crystal microbalance (EQCM) and probe beam deflection (PBD): validation of the technique by a study of silver ion mass transport (Henderson et al.) **458**, 241
Second harmonic generation from silver single-crystal electrodes (Beltramo et al.) **447**, 71
Thermodynamics and kinetics of adsorption of cyanide ions on silver. Part II (Rogozhnikov, Beck) **457**, 31
Silver (111)
Voltammetric measurement of anion adsorption on Ag(111) (Stevenson et al.) **447**, 43
Silver deposition
Underpotential–overpotential transition of a Ag overlayer on Pt:. Part 3. Influence of the rearrangement of the overlayer structure on the blocking of hydrogen upd (Vaskevich, Gileadi) **442**, 147
Silver electrode
Effect of anions on the underpotential deposition of thallium(I) on polycrystalline silver (Daujotis, Gaidamauskas) **446**, 151
Kinetics of electrochemical processes in the system: silver/cyanide solutions (Bek, Rogozhnikov) **447**, 109
Silver electrodeposition
Influence of thiourea on silver deposition: Spectroscopic investigation (Reents et al.) **453**, 121

Silver monocrystals
Effect of surface order on adsorption of sulfate ions on silver electrodes (Smoliński et al.) **442**, 41
Simplified model
Potential measurements in steady state voltammetry at low electrolyte/analyte concentration ratios. Role of convection on ohmic drop: a simplified model (Bento et al.) **446**, 91
Simulation
Computer simulation of electron transfer processes across the electrode|electrolyte interface: a treatment of solvent and electrode polarizability (Calhoun, Voth) **450**, 253
Molecular dynamics simulation of the water|nitrobenzene interface (Michael, Benjamin) **450**, 335
On the dynamics of electrochemical ion-transfer reactions (Pecina, Schmickler) **450**, 303
Spatial distribution of electrochemically deposited clusters: a simulation study (Tsakova, Milchev) **451**, 211
Single crystal
An impedance and chronocoulometric study of the adsorption of chloride and bromide ions on bismuth single crystal planes from solutions in methanol (Väärtnõu, Lust) **445**, 165
Contrasting electrochemical behavior of irreversibly adsorbed Sb monolayer on Pt(100) and Pt(111) single crystal electrode surfaces (Jung et al.) **453**, 243
Specificity of the kinetics of H_2 evolution to the structure of single-crystal Pt surfaces, and the relation between opd and upd H (Barber et al.) **446**, 125
Single-crystal electrodes
A lattice-gas model for halide adsorption on single-crystal electrodes (Koper) **450**, 189
Second harmonic generation from silver single-crystal electrodes (Beltramo et al.) **447**, 71
Single crystal films
Synthetic semiconductor diamond electrodes: The comparative study of the electrochemical behaviour of polycrystalline and single crystal boron-doped films (Pleskov et al.) **455**, 139
Single-crystalline
Effect of electron and hole acceptors on the photoelectrochemical behaviour of nanocrystalline microporous TiO_2 electrodes (Poznyak et al.) **442**, 99
SiO_2 gels
Low-temperature ionic conductivity of relevant solutions and of SiO_2 gels before and after exchanges in propylene carbonate solutions (Wasiucionek, Breiter) **443**, 117
Slit pores
Adsorption of water molecules in slit pores (Spohr et al.) **450**, 281
S_n^-/S_n^{2-}
Polysulfides in dimethylformamide: only the redox couples S_n^-/S_n^{2-} are involved (Levillain et al.) **440**, 243
Sniftirs
In-situ infrared spectroscopic studies of thymine adsorption on a Au(111) electrode (Haiss et al.) **454**, 107
Sodium chlorate
Electrochemical behavior of nanocrystalline Ti_2RuFe alloy prepared by high energy ball-milling (Roué et al.) **455**, 83
Sol–gel
Electrochemical characterization of inorganic | organic hybrid films prepared from ferrocene modified silanes (Wang, Collinson) **455**, 127
Sol-gel chemistry
Matrix effects on coupled chemical reactions in solid-state voltammetry: disproportionation of uranium(V) in a silica xerogel (Tess, Cox) **457**, 163
Solid electrodes
Impedance of rough capacitive electrodes: the role of surface disorder (Kerner, Pajkossy) **448**, 139
On the electrical capacitance of interfaces exhibiting constant phase element behaviour (Zoltowski) **443**, 149
Superficial work and surface stress at solid electrodes: a thermodynamic assessment (Guidelli) **453**, 69
Solid electrolyte
The electrochemical behavior of tetrachlorobenzoquinone in dimethyl sulphoxide at low temperature (Diao, Zhang) **457**, 247
Solid|liquid interface
Mechanism of solid|liquid interfacial reactions. The reactive dissolution of p-chloranil in aqueous solution as studied by the channel flow cell with electrochemical detection and atomic force microscopy (Booth et al.) **440**, 83
Solid polymer electrolyte
Application of SPE composite microelectrodes to the study of the spillover of adsorbed species on electrode surfaces (Jiang et al.) **445**, 13
Investigation of the mass transport of electroactive compounds in an SPE membrane used for electro-organic synthesis (Jiang et al.) **446**, 159
Solid polymer electrolyte interface
Surface reconstruction at metal|solid polymer electrolyte interfaces: Au(111)|Nafion® interface (Wang, Adžić) **448**, 205
Solid polymer electrolytes
Electrochemical characterization of polyethylene glycols as solid polymer electrolytes (Cha, Park) **459**, 135
Solubilities
Electrogeneration of conducting poly(2,5-di-(-2-thienyl)-furan) (Brillas et al.) **445**, 125
Solubility
Electrochemical gelation of poly(3-hexylthiophene) film (Li, Aoki) **453**, 107
Solubility products
A chemical and electrochemical study of titanium ions in the molten equimolar $CaCl_2 + NaCl$ mixture at 550°C. (Martínez et al.) **449**, 67
Solvation energies
Nonlocal nonlinear static dielectric response of polar liquids (Kornyshev, Sutmann) **450**, 143
Solvent
The role of metal and solvent in the structure of the electrode|surface-inactive electrolyte solution interface (Bagotskaya et al.) **448**, 229
Solvent effect
Solvent effect on the electrografting of acrylonitrile on nickel (Mertens et al.) **441**, 237
Solvent effects
Coupled chemistry revisited in the tentative cathodic electropolymerization of 2-butenenitrile (Deniau et al.) **451**, 145
Solvent exchange
Low-temperature ionic conductivity of relevant solutions and of SiO_2 gels before and after exchanges in propylene carbonate solutions (Wasiucionek, Breiter) **443**, 117
Solvent extraction
Electrochemical studies of ion transfer at micro-machined supported liquid membranes (Beriet, Girault) **444**, 219
Solvent trapping
Solvent trapping during the self-assembly of octadecanethiol monolayer on roughened gold electrodes from surface-enhanced Raman scattering studies (Kudelski, Krysiński) **443**, 5
Soybean trypsin inhibitor
Adsorption behaviour of insulin and soybean trypsin inhibitor at the mercury | solution interface (Vidić et al.) **452**, 151
Spatial distribution
A computer simulation model for the diffusion controlled nucleation and growth processes on electrode surfaces—a two-dimensional study (Vilaseca et al.) **458**, 55
Spatial distribution of electrochemically deposited clusters: a simulation study (Tsakova, Milchev) **451**, 211

Spatial distribution of nuclei. Inhibition of local nucleation rates by the most influential neighbours (García-Pastoriza et al.) **441**, 13

Speciation
Amalgamation effects in reverse pulse polarography at spherical electrodes. Influence on speciation measurements (Galceran et al.) **442**, 151
Influence of the adsorption phenomena on the NPP and RPP limiting currents for labile metal-macromolecule systems (Puy et al.) **457**, 229

Specific adsorption
Radiotracer study of the specific adsorption of HCO_3^- ions on a platinum electrode (Horányi) **453**, 113
The potential of mean force on halide ions near the Cu(100) surface (Ignaczak et al.) **450**, 175

Spectroelectrochemical analysis
Spectroelectrochemical and electrochemical determination of ligand binding and electron transfer properties of myoglobin, cyanomyoglobin, and imidazolemyoglobin (Cohen et al.) **447**, 53

Spectroelectrochemical behavior of copper
In-situ synchrotron far infrared spectroscopy of surface films on a copper electrode in aqueous solutions (Melendres et al.) **449**, 215

Spectroelectrochemical study
Spectroelectrochemical study of the generation of *tris*-(1,10-phenanthroline)iron(II/III) from μ-oxo-bis[aquabis(1,10-phenanthroline)iron(III)] (Walczak, Flynn) **441**, 43

Spectroelectrochemistry
An in situ UV–vis and IR spectroelectrochemical study of the disposition of a hydroquinone anion salt on platinum electrodes from dichloromethane solutions (Babaei, McQuillan) **441**, 197
Continuous-flow column electrolytic spectroelectrochemistry for two-step one-electron transfer reactions (Torimura et al.) **451**, 229
Electrochemical and in-situ UV-visible-near-IR and FTIR spectroelectrochemical characterisation of the mixed-valence heteropolyanion $PMo_{12}O_{40}^{n-}$ ($n = 4, 5, 6, 7$) in aprotic media (Sun et al.) **455**, 57
Electrochemical quartz crystal microbalance and spectroelectrochemical studies of the influence of cations on the formation and electroactivity of poly(*N*-vinylcarbazole) films in acetonitrile solutions (Carlier et al.) **456**, 139
Electrochemically initiated polymerization of zinc(II)5-vinyl-10,15,20-triphenylporphyrin (Kuester et al.) **452**, 13
Influence of dopant, pH and potential on the spectral changes of poly(*o*-methoxyaniline): relationship with the redox processes (Gazotti Jr. et al.) **440**, 193
Spectroelectrochemical studies of cytochrome b_5 Phe35 mutants (Yao et al.) **445**, 197
Spectroelectrochemical studies of tetrasulfonated metallophthalocyanines adsorbed on the basal plane of graphite in the presence of cysteine (Lezna et al.) **452**, 221
The surface-enhanced Raman spectroelectrochemical study on the interaction between β-cyclodextrin and the electrochemically generated radical intermediate of flavin (Wang et al.) **451**, 187

Spectroscopic
Electrochemical, spectroscopic and structural investigations of the Cd|Cd(II) system in alkaline media. I. Cation effects (Simic, Ahlberg) **451**, 237

Spectroscopy
Micromorphology changes of silicon oxide on Si(111) during current oscillations: a comparative in situ AFM and FTIR study (Nast et al.) **442**, 169

SPES
SPES, 6Li MAS NMR, and Ni^{3+} EPR evidence for the formation of Co^{2+}-containing spinel phases in $LiCoO_2$ cycled electrode materials (Alcántara et al.) **454**, 173

Spherical diffusion
Amalgamation effects in reverse pulse polarography at spherical electrodes. Influence on speciation measurements (Galceran et al.) **442**, 151

Spherical electrode
Cyclic voltammetry at constant sphericity (Martínez-Ortiz et al.) **443**, 243

Spillover
Application of SPE composite microelectrodes to the study of the spillover of adsorbed species on electrode surfaces (Jiang et al.) **445**, 13

Spinel oxide electrode
XPS and voltammetric studies on $Ni_{1-x}Cu_xCo_2O_4$ spinel oxide electrodes (Tavares et al.) **449**, 91

Square wave voltammetry
Contribution to the study of square wave voltammetry in the case of simple irreversible reactions (Fatouros, Krulic) **443**, 262
The voltammetry of C_{84} isomers (Anderson et al.) **444**, 151

Stability
Multi-technique study of the anodic degradation of polyaniline films (Dinh et al.) **459**, 45

Stacking interaction
Inosine reduction study at low pH by a combination of electrochemical methods (Havran et al.) **454**, 65

Staircase voltammetry
Contribution to the study of square wave voltammetry in the case of simple irreversible reactions (Fatouros, Krulic) **443**, 262

Standard chemical potential of phases
Qualitative and quantitative assessment of phases in electrodeposited Ni + Cd alloys by the ALSV technique (Jović, Tošić) **441**, 69

State variables
State variable approach to electrochemical dynamics (Sadkowski) **454**, 39

Static linear polarization
An in situ infrared spectroscopic study of imidazole films on copper electrodes (Richmond et al.) **448**, 237

Static mercury drop electrode
Cyclic chronopotentiometry with non-linear current–time functions at an SMDE .Amalgamation and reversibility effects and experimental verification (González et al.) **440**, 111

Static species
Electrochemical impedance of multistep mechanisms: mechanisms with static species (Harrington) **449**, 29

Stationary phases
Electrochemically modulated liquid chromatography (EMLC) as a probe of the adsorption characteristics of monosubstituted benzenes at porous graphitic carbon (Ting, Porter) **443**, 180

Statistical mechanics
Mechanisms behind concentration profiles illustrated by charge and concentration distributions around ions in double layers (Kjellander, Greberg) **450**, 233

Statistical fluctuations
First-principles simulations of the electrode|electrolyte interface (Halley et al.) **450**, 273

Steady-state
Large signal (global) analysis of non-linear response of electrocatalytic reaction. I. Multiple steady states (Sadkowski) **447**, 97
State variable approach to electrochemical dynamics (Sadkowski) **454**, 39

Steady-state diffusion
Analytical solution for the steady-state diffusion towards an inlaid disc microelectrode in a multi-layered medium (Galceran et al.) **440**, 1

STM
An in situ STM investigation of uracil on Ag(111) (Cavallini et al.) **444**, 75

An in situ STM study of sulphate adsorption on copper(111) in acidic aqueous electrolytes (Li, Nichols) **456**, 153
Underpotential deposition of zinc ions on Au(111) in phosphate solution (pH 4.6): kinetic and STM studies (Nakamura et al.) **446**, 227
Stripping chronopotentiometry
Stripping chronopotentiometry of immobilized microparticles (Komorsky-Lovrić, Scholz) **445**, 81
Structural
Electrochemical, spectroscopic and structural investigations of the Cd|Cd(II) system in alkaline media. I. Cation effects (Simic, Ahlberg) **451**, 237
Structural transitions
Structural transitions in 2,2′-bipyridine adlayers on Au(111)—an in-situ STM study (Dretschkow et al.) **458**, 121
Structural variations
In situ study of polypyrrole morphology by STM: effect of the doping state (Chaînet, Billon) **451**, 273
Structure/dynamics
Structure and dynamics of water at water|Pt interface as seen by molecular dynamics computer simulation (Yeh, Berkowitz) **450**, 313
Structure formation
Structure formation and dynamics of water in strong external electric fields (Sutmann) **450**, 289
Substituted oligothiophenes
β,β-Disubstituted oligothiophenes, a new oligomeric approach towards the synthesis of conducting polymers (Smie et al.) **452**, 87
Sulfide
A voltammetric and FTIR–ATR study of the electropolymerization of phenol on platinum electrodes in carbonate medium .Influence of sulfide (Lapuente et al.) **451**, 163
Sulfate ion
Effect of surface order on adsorption of sulfate ions on silver electrodes (Smoliński et al.) **442**, 41
Sulfate penetration
Microgravimetric monitoring of transport of cations during redox reactions of indium(III) hexacyanoferrate(III,II) .Radiotracer evidence for the flux of anions in the film (Malik et al.) **452**, 57
Sulfonimide ionomer
Steady-state and time-resolved fluorescence spectroscopic probing of microstructures and properties of perfluorinated polyelectrolyte membranes (Bunker et al.) **459**, 15
Sulfuric acid
Electrochemical quartz crystal microbalance study of copper adatoms on Au(111) electrodes in solutions of perchloric and sulfuric acid (Uchida et al.) **452**, 97
Sulfuric acid solutions
Electrochemical quartz crystal microbalance studies on the electropolymerization processes of *ortho*-phenylenediamine in sulfuric acid solutions (Dai et al.) **456**, 47
Sulphate
An in situ STM study of sulphate adsorption on copper(111) in acidic aqueous electrolytes (Li, Nichols) **456**, 153
Superficial work
Superficial work and surface stress at solid electrodes: a thermodynamic assessment (Guidelli) **453**, 69
Supercritical fluid
Electrochemical investigations in liquid and supercritical 1,1,1,2-tetrafluoroethane (HFC 134a) and difluoromethane (HFC 32) (Abbott et al.) **457**, 1
Superlattice electrodes
Electrochemistry of GaAs/AlGaAs superlattice electrodes in acetonitrile solutions with metallocene redox couples (Watts, Koval) **443**, 33
Supported bilayer
Kinetics of redox conversion at a gold electrode of water-insoluble ubiquinone ($UQ_{(10)}$) and plastoquinone ($PQ_{(9)}$) incorporated in supported phospholipid layers (Marchal et al.) **451**, 139
Surface area
Evaluation of the surface area of RuO_2 electrodes by periodic current signals (Fernández et al.) **457**, 109
Surface degradation
Effects of mercury electrodeposition on the surface degradation of microlithographically fabricated iridium ultramicroelectrodes (Nolan, Kounaves) **453**, 39
Surface diffusion
Application of SPE composite microelectrodes to the study of the spillover of adsorbed species on electrode surfaces (Jiang et al.) **445**, 13
Surface-enhanced Raman scattering
Solvent trapping during the self-assembly of octadecanethiol monolayer on roughened gold electrodes from surface-enhanced Raman scattering studies (Kudelski, Krysiński) **443**, 5
Surface-enhanced Raman spectroscopy
The surface-enhanced Raman spectroelectrochemical study on the interaction between β-cyclodextrin and the electrochemically generated radical intermediate of flavin (Wang et al.) **451**, 187
Surface enhanced Raman spectroscopy
Influence of thiourea on silver deposition: Spectroscopic investigation (Reents et al.) **453**, 121
Surface force
Adsorption of water molecules in slit pores (Spohr et al.) **450**, 281
Surface fouling
Electrochemical quartz crystal microbalance investigation of surface fouling due to phenol oxidation (Wang et al.) **444**, 127
Surface functional groups
Effects of carbon electrode surface states for the electro-reduction of (hmc)$CoOOH^{2+}$ which is an intermediate during the catalytic reduction of O_2 (Kang) **452**, 161
Surface layers
Determination of Au(III) in the surface layers formed anodically on the gold electrode (Juodkazis et al.) **441**, 19
Electrochemical STM observation of $[Fe(CN)_6]^{3-}$ ions adsorbed on a hydrotalcite crystal surface (Yao et al.) **458**, 249
Surface modification
Surface modification of a MCFC anode by electrodeposition of niobium (Baizeng et al.) **441**, 1
The mechanism of surface modification of a MCFC anode (Fang et al.) **441**, 65
Surface-modified electrodes
Self-assembled monolayers with biospecific affinity for NAD(H)-dependent dehydrogenases: characterization by surface plasmon resonance combined with electrochemistry 'in situ' (Schlereth, Kooyman) **444**, 231
Surface oxidation
Effects of carbon electrode surface states for the electro-reduction of (hmc)$CoOOH^{2+}$ which is an intermediate during the catalytic reduction of O_2 (Kang) **452**, 161
Surface plasmon resonance
Self-assembled monolayers with biospecific affinity for NAD(H)-dependent dehydrogenases: characterization by surface plasmon resonance combined with electrochemistry 'in situ' (Schlereth, Kooyman) **444**, 231
Surface pressure–molecular area isotherms
Phospholipid monolayers at water | oil interfaces: theoretical modelling of surface pressure–molecular area isotherms (Mafé et al.) **457**, 155
Surface Raman spectroscopy
Electrochemistry of ITO and gold electrodes covalently modified with dithizone and the effect of Cu(II) and Pb(II) ions (Mirkhalaf et al.) **452**, 203

Surface reconstruction
Surface reconstruction at metal|solid polymer electrolyte interfaces: Au(111)|Nafion® interface (Wang, Adžić) **448**, 205
Surface states
Investigation of the oxidation of glassy carbon by the method of electroreflectance—relevance to activation processes (Korshin) **446**, 13
Surface stress
A note on the surface stress and tension of solid metal electrodes (Schmickler, Leiva) **453**, 61
Comments on the thermodynamics of solid electrodes (Lipkowski et al.) **452**, 193
Linear correlation between surface stress and surface charge in anion adsorption on Au(111) (Haiss et al.) **452**, 199
Superficial work and surface stress at solid electrodes: a thermodynamic assessment (Guidelli) **453**, 69
Surface treatment
Origin of a sharp current peak appearing at a potential slightly more positive than 0 V versus Li | Li^+ on the cyclic voltammograms of carbonaceous materials (Takamura et al.) **455**, 223
Surface X-ray scattering
Underpotential deposition of lead on Pt(111) in the presence of bromide: $RRD_{Pt(111)}E$ and X-ray scattering studies (Marković et al.) **448**, 183
Surfactant film
Electron transfer and electrochemical catalysis using cobalt-reconstituted myoglobin in a surfactant film (Gao, Rusling) **449**, 1
Suspended particle systems
The Parsons–Zobel plot for systems of suspended particles: a specific experimental test (De Faria, Trasatti) **448**, 159
Sweep rate
Linear sweep voltammetry in flooded porous electrodes at low sweep rates (Srikumar et al.) **458**, 161
Synchrotron far IR spectroscopy
In-situ synchrotron far infrared spectroscopy of surface films on a copper electrode in aqueous solutions (Melendres et al.) **449**, 215
Synchrotron source
In-situ synchrotron far infrared spectroscopy of surface films on a copper electrode in aqueous solutions (Melendres et al.) **449**, 215
Synthesis
Synthesis, electrochemistry and complexation studies of ferrocene crown ethers (Ion et al.) **440**, 145
System dynamics
State variable approach to electrochemical dynamics (Sadkowski) **454**, 39

Tafel curves
Hydrogen evolution/oxidation reactions on porous electrodes (Lasia) **454**, 115
Tailer-made polymer
Novel water-borne polyurethane based electrolytes for lithium batteries—(I) tailor-made polymer (Cheng, Wen) **459**, 99
Tautomerization
Electrochemical reduction of acids in dimethyl sulfoxide. CE mechanisms and beyond (Treimer, Evans) **449**, 39
Temperature
Calorimetry close to the boiling temperature of the D_2O/Pd electrolytic system (Mengoli et al.) **444**, 155
Electrochemical stability of redox active ions and molecules in liquid and frozen stoichiometric electrolytes (Opallo) **446**, 39
Effect of temperature on electrolytic loading of hydrogen into palladium (Bernardini et al.) **453**, 221
On the theoretical aspects of thermal effects in electrochemical cells (Kharkats et al.) **450**, 37
Temperature dependence
Apparent negative activation energy in electrochemical insulating-to-conducting conversion at polymethylthiophene films (Aoki, Li) **441**, 161
Temperature effects
Formation of nickel hydrides by hydrogen evolution in alkaline media: effect of temperature (Bernardini et al.) **457**, 205
Templated silica
Voltammetry of phosphotungstic acid immobilized in templated silica gel (Holmstrom et al.) **456**, 239
Teflon tubing HMDE
Teflon tubing mercury electrode for electrochemical analysis (Maleki et al.) **448**, 143
Ternary oxide
The Parsons–Zobel plot for systems of suspended particles: a specific experimental test (De Faria, Trasatti) **448**, 159
Terpyridine
Electrochemical switching of fluorescence emission between red and blue from complexed europium ions in poly(ethylene oxide) (Mukaigawa, Ohno) **452**, 141
Tessellation
Spatial distribution of nuclei. Inhibition of local nucleation rates by the most influential neighbours (García-Pastoriza et al.) **441**, 13
Tetraalkylammonium reduction
On the cathodic behaviour of tetraalkylammonium cations at a platinum electrode (Simonet et al.) **451**, 5
Tetrahydroxy-*p*-benzoquinone
Electrochemical behaviour of oxocarbons on single crystal platinum electrodes. Part V. Tetrahydroxy-*p*-benzoquinone in 0.5 M sulphuric acid medium (Carbó et al.) **440**, 57
Thallium
A novel PVC membrane sensor for potentiometric determination of thallium(I) (Saleh) **448**, 33
Reaction mechanism and partial charge transfer of Tl|Tl^+-systems studied by impedance spectroscopy (SSSS method). Part 1. The Tl(Hg)|Tl^+-reaction in the presence of SCN^- (Salié) **447**, 211
Thallium upd
Effect of anions on the underpotential deposition of thallium(I) on polycrystalline silver (Daujotis, Gaidamauskas) **446**, 151
The Pitzer equation
Applicability of the modified Pitzer equations to the fitting of activity coefficients in electrolyte-aminoacid aqueous mixtures: the case of NaCl + β-Alanine at 298.15 K (Raposo et al.) **454**, 59
Theoretical modelling
Phospholipid monolayers at water | oil interfaces: theoretical modelling of surface pressure–molecular area isotherms (Mafé et al.) **457**, 155
Theory
A theory for amalgam forming electrode reactions (Koper, Schmickler) **450**, 83
A theory for electron transfer between an electrode and a multilevel acceptor/donor species in an electrolyte solution (Boroda, Voth) **450**, 95
Non-steady-state electrochemical nucleation under potentiostatic conditions (Isaev) **453**, 25
Thermal decomposition
XPS and voltammetric studies on $Ni_{1-x}Cu_xCo_2O_4$ spinel oxide electrodes (Tavares et al.) **449**, 91
Thermodynamic analysis
Photoinjection of excess electrons into liquid hydrocarbons: a thermodynamic treatment (Schiller et al.) **450**, 21
Thermodynamic behavior
Thermodynamic and electrochemical behavior of nickel in molten Li_2CO_3–Na_2CO_3 modified by addition of calcium carbonate (Cassir et al.) **452**, 127
Thermogalvanic cells
Study of the Cu|$Cu(NO_3)_2$||bru|·||bru|H_2O|Cu electrochemical thermocouple at low temperatures (Szabó, Földesi) **452**, 107
Thermoresponsive gel films
Electrochemistry of Ru (EDTA) coordinated to pyridine group within thermoresponsive gel films (Iwaku et al.) **442**, 27

Thermospray mass spectrometry
Anodic oxidation of aniline and *N*-alkylanilines in aqueous sulphuric acid studied by electrochemical thermospray mass spectrometry (Stassen, Hambitzer) **440**, 219
Electrochemical thermospray mass spectrometry—anodic oxidation of *N*,*N*-dialkylanilines (Hambitzer et al.) **447**, 117
Thin films
Electrochemically deposited thin films of amorphous Fe–P alloy. Part I. Chemical composition and phase structure characterization (Zečević et al.) **448**, 245
Impedance of constant phase element (CPE)-blocked diffusion in film electrodes (Bisquert et al.) **452**, 229
'Thin gap' and 'foil' methods
A detailed study of the reliability of some crucial parameters used in the in-situ radiotracer sorption studies (Hirschberg et al.) **456**, 171
Thin layer
Adsorption in semi-differential voltammetry (Klička) **455**, 253
Thin layer electrochemical measurement
Thin layer electrochemical Raman study of ion pair formation between the tetrachlorobenzoquinone anion radical and alkaline earth metal cations (Yamanuki et al.) **458**, 191
Thin organic films
Electrochemical molecular recognition by thin films of ether-substituted polythiophenes (Goldenberg et al.) **447**, 1
Thio-crown ligands
Electrochemical extraction of heavy metal ions assisted by cyclic thioether ligands (Lagger et al.) **451**, 29
Facilitated ion transfer reactions across oil|water interfaces .Part II. Use of the convoluted current for the calculation of the association constants and for an amperometric determination of the stoichiometry of ML_j^{z+} complexes (Reymond et al.) **451**, 59
Thiocyanate
Reaction mechanism and partial charge transfer of Tl|Tl^+-systems studied by impedance spectroscopy (SSSS method). Part 1. The Tl(Hg)|Tl^+-reaction in the presence of SCN^- (Salié) **447**, 211
Thiocynate
Electrocatalysis by vanadium haloperoxidase (Kulys, Vidziunaite) **455**, 161
Thiol self-assembled monolayer
Chronoamperometric study of the reductive desorption of alkanethiol self-assembled monolayers (Yang, Morin) **441**, 173
Thiols
Electrostatic interactions at self assembled molecular films of charged thiols on gold (Molinero, Calvo) **445**, 17
Thionine
A reagentless amperometric hydrogen peroxide biosensor based on covalently binding horseradish peroxidase and thionine using a thiol-modified gold electrode (Ruan et al.) **455**, 121
Thiophene
Synthetic and electrochemical studies of anthraquinone-substituted poly(pyrrole) films (Moteki, Sykes) **447**, 91
Thiophenes
A new route to electroactive poly(2,2′-bithiophene-methylene)s from the anodic oxidation of triaryl ether units (Fabre et al.) **455**, 5
Thiourea
Influence of thiourea on silver deposition: Spectroscopic investigation (Reents et al.) **453**, 121
Third H-adatom current peak
The possible existence of subsurface H-atom adsorbates and H_2 electrochemical evolution reaction intermediates on platinum in acid solutions (Martins et al.) **445**, 135
Thymine adlayers
In-situ infrared spectroscopic studies of thymine adsorption on a Au(111) electrode (Haiss et al.) **454**, 107
Tin
Comparison of methanol oxidations on Pt, Pt|Ru and Pt|Sn electrodes (Morimoto, Yeager) **444**, 95
Stripping chronopotentiometry of immobilized microparticles (Komorsky-Lovrić, Scholz) **445**, 81
TiO_2
Effect of adsorbed water on the photoelectrorheology of TiO_2 particle suspensions (Sakai et al.) **445**, 1
Influence of the rotation rate of a rotary viscometer on the photoelectrorheological properties of TiO_2 particle suspensions (Komoda et al.) **459**, 155
Titanium and peroxotitanium
Electrochemical properties of peroxotitanium-containing phosphotungstate with Dawson–Wells structure (Gong et al.) **455**, 39
Titanium chlorides
A chemical and electrochemical study of titanium ions in the molten equimolar $CaCl_2 + NaCl$ mixture at 550°C. (Martínez et al.) **449**, 67
Titanium dioxide
Photoelectrochemistry of oxalate on particulate TiO_2 electrodes (Byrne, Eggins) **457**, 61
Titanium electrodeposition
A chemical and electrochemical study of titanium ions in the molten equimolar $CaCl_2 + NaCl$ mixture at 550°C. (Martínez et al.) **449**, 67
Transference number
A novel electrochemical method for simultaneously measuring diffusion coefficient and ion transference number (Zhou et al.) **443**, 1
Cation mobility in poly(ethylene oxide) solid electrolytes (Plancha et al.) **442**, 91
Transference numbers
The dependence of lithium transference numbers on temperature, salt concentration and anion type in poly (vinylidene fluoride)–hexafluoropropylene copolymer-based gel electrolytes (Dai, Zawodzinski) **459**, 111
Transient methods
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 3. Statistical error/uncertainty propagation in simulation and in nonlinear least-squares parameter estimation (Bieniasz, Speiser) **458**, 209
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 2. Model expansion and model reduction (Bieniasz et al.) **447**, 173
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 1. Gaining more insight into the behaviour of kinetic models (Bieniasz, Speiser) **441**, 271
Transition metal complex
Electrochemistry of zeolite-encapsulated complexes: new observations (Briot et al.) **454**, 83
Transmission electron microscopy
Multi-technique study of the anodic degradation of polyaniline films (Dinh et al.) **459**, 45
Transport
Electrochemical characteristics of the microhole ITIES (Murtomäki, Kontturi) **449**, 225
Transport and equilibrium properties of Nafion® membranes with H^+ and Na^+ ions (Okada et al.) **442**, 137
Transport across monolayer
The enhanced transport of the cadmium acetylacetone complex across the adsorbed aliphatic alcohol monolayer during electroreduction on mercury electrodes (Schmidt et al.) **456**, 131
Transport analysis
Development of a theory for the determination of the composition of the anodizing solution inside the pores during the growth of porous anodic Al_2O_3 films on aluminium by a transport phenomenon analysis (Patermarakis) **447**, 25

Transport mechanism
High frequency dielectric studies of hydrated Nafion® (Paddison et al.) **459**, 91
Transport properties
Molecular simulation of electrolytes in nanopores (Lo et al.) **450**, 265
Transported entropy
Heat of formation of the surface and the Gibbs-Helmholtz equation (Grafov) **450**, 3
Trichloramine
Electrode processes of chloramines in aqueous solutions (Wrona) **453**, 197
Tris(2,2′-bipyridine)ruthenium(II)
Multistep one-electron photoelectrocatalytic reduction of oxygen at tris(2,2′-bipyridine)ruthenium(II)-incorporated Nafion®- and clay-coated electrodes in the presence of macrocyclic cobalt(III) complexes (Gobi, Ramaraj) **449**, 81
Tris(bipyridyl)-osmium complexes
A comparative study of the impedance properties of glassy-carbon electrodes covered with poly(styrenesulphonate) and Nafion® films containing $Os(bpy)_3^{3+/2+}$ redox sites (Sharp, Åberg) **449**, 137
Tris-(1,10-phenanthroline)iron(II/III)
Spectroelectrochemical study of the generation of *tris*-(1,10-phenanthroline)iron(II/III) from μ-oxo-bis[aquabis(1,10-phenanthroline)iron(III)] (Walczak, Flynn) **441**, 43
Tungsten
New electroactive metal oxides electrodeposited from selected Keggin and Dawson-type heteropolyanions (Keita et al.) **443**, 168
Two-dimensional condensation
Characterization of 6-mercaptopurine monolayers on Hg surfaces (Sevilla et al.) **442**, 107
Two-electron oxidation
Spectral and electrocatalytic studies for unusual oxidation and reduction states of chromium porphyrins in aqueous solutions (Lu, Su) **446**, 25
Two-phase coexistence
Theoretical analysis of hydrogen transport through an electrode at the coexistence of two hydrogen-poor and -rich phases based upon the concept of hydrogen trapping (Pyun, Yang) **441**, 183
Two-step one-electron transfer
Continuous-flow column electrolytic spectroelectrochemistry for two-step one-electron transfer reactions (Torimura et al.) **451**, 229
n-Type
Determination of flat-band potentials of silicon electrodes in HF by means of ac resistance measurements (Ottow et al.) **455**, 29
n-Type InP electrode
Electrochemical characterisation of a semiconductor–metal junction: n-type InP|Cu; influence of the structure of the metallic layer (Moulayat et al.) **453**, 129
p-Type
Determination of flat-band potentials of silicon electrodes in HF by means of ac resistance measurements (Ottow et al.) **455**, 29

Ubiquinone
Kinetics of redox conversion at a gold electrode of water-insoluble ubiquinone ($UQ_{(10)}$) and plastoquinone ($PQ_{(9)}$) incorporated in supported phospholipid layers (Marchal et al.) **451**, 139
Ultramicroelectrode
The electrochemical behavior of tetrachlorobenzoquinone in dimethyl sulphoxide at low temperature (Diao, Zhang) **457**, 247
Electrochemical stability of redox active ions and molecules in liquid and frozen stoichiometric electrolytes (Opallo) **446**, 39
Effect on electrochemistry of hexacyanoferrate at carbon fibers after pretreatment with titanium chloride (de Carvalho et al.) **457**, 83
Microgravimetric monitoring of transport of cations during redox reactions of indium(III) hexacyanoferrate(III,II). Radiotracer evidence for the flux of anions in the film (Malik et al.) **452**, 57
The ac-voltammetric study of fast charge transfer processes in benzene solutions (Baranski, Winkler) **453**, 29
Ultrasound
Ultrasound-assisted anodic oxidation of diuron (Macounova et al.) **457**, 141
Uncertainty analysis
Use of sensitivity analysis methods in the modelling of electrochemical transients. Part 3. Statistical error/uncertainty propagation in simulation and in nonlinear least-squares parameter estimation (Bieniasz, Speiser) **458**, 209
Underpotential deposition
Contrasting electrochemical behavior of irreversibly adsorbed Sb monolayer on Pt(100) and Pt(111) single crystal electrode surfaces (Jung et al.) **453**, 243
Correlation of the underpotential deposition (upd) of zinc ions on Pt(111), Pt(100), and Pt(110) with anion specific adsorption (Taguchi, Aramata) **457**, 73
Embedded atom method study of Cu deposition on Ag(111) (Del Pópolo, Leiva) **440**, 271
Glucose oxidation at bismuth-modified platinum electrodes (Wittstock et al.) **444**, 61
Underpotential deposition of lead on Pt(111) in the presence of bromide: $RRD_{Pt(111)}E$ and X-ray scattering studies (Marković et al.) **448**, 183
Underpotential versus overpotential deposition: a first-principles calculation (Sánchez, Leiva) **458**, 183
Upd kinetics
Underpotential deposition of zinc ions on Au(111) in phosphate solution (pH 4.6): kinetic and STM studies (Nakamura et al.) **446**, 227
UPD-OPD transition
Underpotential–overpotential transition of a Ag overlayer on Pt: .Part 3. Influence of the rearrangement of the overlayer structure on the blocking of hydrogen upd (Vaskevich, Gileadi) **442**, 147
Uracil
An in situ STM investigation of uracil on Ag(111) (Cavallini et al.) **444**, 75
Effect of the crystallographic orientation of gold single-crystal electrodes on the occurrence of 2D phase transitions in adsorbed organic monolayers (Baré et al.) **445**, 7
Uranium(VI)
Matrix effects on coupled chemical reactions in solid-state voltammetry: disproportionation of uranium(V) in a silica xerogel (Tess, Cox) **457**, 163
Uranium(V) disproportionation
Matrix effects on coupled chemical reactions in solid-state voltammetry: disproportionation of uranium(V) in a silica xerogel (Tess, Cox) **457**, 163
Uranium organometallic complex
Electrochemical studies of tricyclopentadienyl uranium IV chloride complexes: $(RCp)_3UCl$ ($RCp = RC_5H_4$ with R = H; Me: CH_3; tBu: $(CH_3)_3C$); TMS: $(CH_3)_3Si$) .Evidence of a disproportionation mechanism in oxidation (Clappe et al.) **448**, 95
Urea formation
Electrochemical synthesis of urea at gas-diffusion electrodes. Part II. Simultaneous reduction of carbon dioxide and nitrite ions at Cu, Ag and Au catalysts (Shibata et al.) **442**, 67
Uridine
Effect of the crystallographic orientation of gold single-crystal electrodes on the occurrence of 2D phase transitions in adsorbed organic monolayers (Baré et al.) **445**, 7
UV spectrophotometry
Synthesis, electrochemistry and complexation studies of ferrocene crown ethers (Ion et al.) **440**, 145

UV-visible reflectance spectroscopy
A UV-visible study of the electropolymerization of CoTAPP at vitreous carbon and investigation of its catalytic activity towards the electroreduction of dioxygen (El Mouahid et al.) **455**, 209
UV-visible spectro-electrochemistry
An electrochemical impedance and spectroelectrochemical study of the polypyrrole–flavin composite electrode (Bonazzola, Calvo) **449**, 111
UV-visible spectrophotometry
Anodic electrodeposition of iridium oxide films (Petit, Plichon) **444**, 247
UV-visible spectroscopy
Inclusion of the parent molecules of some drugs with β-cyclodextrin studied by electrochemical and spectrometric methods (Dang et al.) **448**, 61
UV–Vis spectroscopy
Correlation of voltammetric and spectroscopic data obtained from open- and closed-shell aromatic esters and those obtained from AM1 calculations (Webster et al.) **442**, 217

V-substituted Keggin anions
A voltammetric study on the formation of V(V)- and V(IV)-substituted molybdophosphate(V) complexes in aqueous solution (Himeno, Ishio) **451**, 203
V_2O_5
Electrochromism of annealed vacuum-evaporated V_2O_5 films (Guan et al.) **443**, 175
Vacuum-evaporated films
Electrochromism of annealed vacuum-evaporated V_2O_5 films (Guan et al.) **443**, 175
Valinomycin
Amperometric detection of alkali metal ions on micro-fabricated composite polymer membranes (Lee et al.) **453**, 211
Vanadium
Electrocatalysis by vanadium haloperoxidase (Kulys, Vidziunaite) **455**, 161
4-Vinylpyridine
Electrochemistry of Ru (EDTA) coordinated to pyridine group within thermoresponsive gel films (Iwaku et al.) **442**, 27
Vitamin K
Electron and proton transferring properties of vitamin K_1 across a self-assembled phospholipid monolayer (Herrero et al.) **445**, 71
Voltammetric measurements
Potential measurements in steady state voltammetry at low electrolyte/analyte concentration ratios. Role of convection on ohmic drop: a simplified model (Bento et al.) **446**, 91
Voltammetric modelling
Voltammetric modelling via extended semiintegrals (Mahon, Oldham) **445**, 179
Voltammetric oxidation/reduction processes
The passivating films on nickel in alkaline solutions I. General aspects of the Ni (II) region (D'Alkaine, Santanna) **457**, 5
Voltammetric response
Electrochemical properties of Langmuir–Blodgett films of polyesters derived from oligothiophenes (Goldenberg et al.) **443**, 266
Voltammetry
A voltammetric study on the formation of V(V)- and V(IV)-substituted molybdophosphate(V) complexes in aqueous solution (Himeno, Ishio) **451**, 203
Adsorption in semi-differential voltammetry (Klička) **455**, 253
Analytical solution corresponding to the i/t response to a multipotential step for a catalytic mechanism (Molina) **443**, 163
Anodic electrosynthesis of Cu_2S and $CuInS_2$ films (Schimmel et al.) **453**, 187
Correlation of voltammetric and spectroscopic data obtained from open- and closed-shell aromatic esters and those obtained from AM1 calculations (Webster et al.) **442**, 217
Dissolution of partially immersed nickel during in situ oxidation in molten carbonate: cyclic, stripping and square wave voltammetry measurements (Yazici, Selman) **457**, 89
Influence of the adsorption phenomena on the NPP and RPP limiting currents for labile metal-macromolecule systems (Puy et al.) **457**, 229
Kinetic studies on the electron transfer between bacterial c-type cytochromes and metal oxides (Lojou et al.) **452**, 167
Matrix effects on coupled chemical reactions in solid-state voltammetry: disproportionation of uranium(V) in a silica xerogel (Tess, Cox) **457**, 163
Microgravimetric monitoring of transport of cations during redox reactions of indium(III) hexacyanoferrate(III,II). Radiotracer evidence for the flux of anions in the film (Malik et al.) **452**, 57
Novel voltammetric responses of a 1,1′-ferrocene bis(methylene aza-18-crown-6) receptor to group 1 and 2 metal cations in acetonitrile (Chen et al.) **444**, 209
Nucleophilic substitution reaction of 2,4-dinitrofluorobenzene with hydroxide ions at the polarized nitrobenzene|water interface (Kong, Kakiuchi) **446**, 19
Synthesis, electrochemistry and complexation studies of ferrocene crown ethers (Ion et al.) **440**, 145
The voltammetric features associated with the lifting of charge-induced surface reconstruction on Au(100) (Skołuda) **442**, 9
Thermodynamic and electrochemical behavior of nickel in molten Li_2CO_3–Na_2CO_3 modified by addition of calcium carbonate (Cassir et al.) **452**, 127
Voltammetry of defect sites at a self-assembled monolayer on a gold surface (Che et al.) **453**, 9
Voltammetry of metal ions in mixtures of ligands. Part III: Application to systems including inert complexes (Berbel et al.) **453**, 151
Voltammogram
Electrochemical reduction of CO_2 on single crystal electrodes of silver Ag(111), Ag(100) and Ag(110) (Hoshi et al.) **440**, 283

Walden products
Conductivity properties and potentiometric studies of NaBr solutions in mixtures of water with propan-2-ol at 298.15 K (Gregorowicz et al.) **452**, 63
Wall jet disk electrode
Application of a wall jet disk electrode combined with an electrochemical quartz crystal microbalance to the study of the dissolution of copper in acidic chloride media (Itagaki et al.) **440**, 139
Wall-jet electrode
The electrocatalytic activity of Prussian blue in hydrogen peroxide reduction studied using a wall-jet electrode with continuous flow (Karyakin et al.) **456**, 97
Wall-jet system
Comparison of rotating disk and wall-jet electrode systems for studying the kinetics of direct and mediated electron transfer for horseradish peroxidase on a graphite electrode (Lindgren et al.) **458**, 113
Water
In situ IR spectroscopic study of water at a polycrystalline gold electrode surface (Kitamura et al.) **452**, 241
MD simulation of water at imperfect platinum surfaces. III. Hydrogen bonding (Nagy, Denuault) **450**, 159
Transport and equilibrium properties of Nafion® membranes with H^+ and Na^+ ions (Okada et al.) **442**, 137
Water-borne polyurethane
Novel water-borne polyurethane based electrolytes for lithium batteries—(I) tailor-made polymer (Cheng, Wen) **459**, 99
Water|1,2-dichloroethane interface
Potential-modulated reflectance spectroscopy of the methyl orange transfer across the water|1,2-dichloroethane interface (Fermín et al.) **447**, 125

Water|1,2-dichloroethane interphase
Facilitated alkali ion transfer at the water|1,2-dichloroethane interphase: ab initio calculations concerning alkaline metal cation–1,10-phenanthroline complexes (Sánchez et al.) **451**, 111
Water content
High frequency dielectric studies of hydrated Nafion® (Paddison et al.) **459**, 91
Water dynamics
Structure formation and dynamics of water in strong external electric fields (Sutmann) **450**, 289
Water effect
Effect of adsorbed water on the photoelectrorheology of TiO_2 particle suspensions (Sakai et al.) **445**, 1
Water/nitrobenzene interface
Electrochemical studies on molecular recognition of anions: complex formation between xylylenyl bis-iminoimidazolinium and dicarboxylates in nitrobenzene and water (Shao et al.) **441**, 33
Water|nitrobenzene interface
Molecular dynamics simulation of the water|nitrobenzene interface (Michael, Benjamin) **450**, 335
Water|Pt interface
Structure and dynamics of water at water|Pt interface as seen by molecular dynamics computer simulation (Yeh, Berkowitz) **450**, 313
Water-soluble oligomer
Electrochemical behaviour of 3,4-ethylenedioxythiophene functionalized by a sulphonate group. Application to the preparation of poly(3,4-ethylenedioxythiophene) having permanent cation-exchange properties (Stéphan et al.) **443**, 217
Water structure
Adsorption of water molecules in slit pores (Spohr et al.) **450**, 281
Weak adsorption
Impedance study of the electrochemical reduction of adrenochrome on glassy carbon (Zhang et al.) **444**, 169
WO_3-, PAn-, PVS-confined electrodes
Incorporation and expulsion of electrolyte species by tungsten trioxide-, WO_3 | Polyaniline-, and WO_3 | PAn | polyvinylsulfate-confined electrodes during potential cycling (Ogura et al.) **451**, 219
Work function
Characterization of the ^{E}MOSFET, a novel one-electrode chemical transducer for redox measurements (Hendrikse et al.) **458**, 23
Wurtzite-type structure
Anodic electrosynthesis of Cu_2S and $CuInS_2$ films (Schimmel et al.) **453**, 187

XANES
Ex-situ study by X-ray absorption near-edge spectroscopy of the topography of complexing cavities immobilized in an electronically conducting polymer (Billon et al.) **456**, 91
Xerogel
Matrix effects on coupled chemical reactions in solid-state voltammetry: disproportionation of uranium(V) in a silica xerogel (Tess, Cox) **457**, 163
XPS
Electrochemistry of heteropolyanions in coulombically linked self-assembled monolayers (Liu et al.) **458**, 87
Effect of immobilized electron relay on the interfacial photoinduced electron transfer at a layered inorganic–organic composite film on gold (Nakanishi et al.) **455**, 229
Nature of the passive film formed at a zinc anode in zinc–nickel containing solutions (Velichenko et al.) **448**, 1
XPS data
Pyridine and aniline adsorption from an apolar solvent: the role of the solid adsorbent (Ardizzone et al.) **447**, 17
XPS investigation
Investigations of the interaction between $Cu_{2-x}S$ coating and Ag(I) ions using cyclic voltammetry and X-ray photoelectron spectroscopy (Vinkevičius et al.) **442**, 73
X-ray absorption spectroscopy
Effect of particle size on the electrocatalysis by carbon-supported Pt electrocatalysts: an in situ XAS investigation (Mukerjee, McBreen) **448**, 163
X-ray crystal structure
Synthesis, electrochemistry and complexation studies of ferrocene crown ethers (Ion et al.) **440**, 145
X-ray photoelectron spectroscopy
X-ray photoelectron spectroscopic investigation and electrochemistry of polynuclear indium(III) hexacyanoferrate films (Cataldi et al.) **448**, 111
X-ray photoelectron spectroscopy (XPS)
XPS investigations of the electrochemical double layer on silver in alkaline chloride solutions (Hecht, Strehblow) **440**, 211
XRD
Electrochemical study of iron ferrite sludge obtained under the conditions proposed for the purification of waste water at a carbon paste electrode (Barrado et al.) **441**, 227

Zeolite
Electrochemistry of zeolite-encapsulated complexes: new observations (Briot et al.) **454**, 83
Zeroth-order solution
Analysis of the double pulse response for the following chemical reaction in the EC mechanism (Galvez) **452**, 19
Zeroth-order solution and higher-order corrections for the CE mechanism in double potential step techniques (Galvez) **441**, 259
Zinc
Electrochemical study of a metallothionein related peptide in the presence of zinc using cyclic voltammetry (Harlyk et al.) **451**, 267
Zinc electrodeposition
Modeling of the cathode layer in the case of zinc electrolysis from aminoacetate electrolyte (Kublanovsky, Belinsky) **455**, 247
Zinc oxide
Photocatalytic ZnO films prepared by anodizing (Yamaguchi et al.) **442**, 1
Zinc polymer electrolytes
Cation mobility in poly(ethylene oxide) solid electrolytes (Plancha et al.) **442**, 91
Zinc upd
Correlation of the underpotential deposition (upd) of zinc ions on Pt(111), Pt(100), and Pt(110) with anion specific adsorption (Taguchi, Aramata) **457**, 73
Zn underpotential deposition
Underpotential deposition of zinc ions on Av(111) in phosphate solution (pH 4.6): kinetic and STM studies (Nakamura et al.) **446**, 227
